NEW QUESTION # 58

Your client is involved in automation control systems installation. Over the years, they have analyzed their total project spend on specific resource classes. They have identified that their cost spread distribution factor on a 10 spread point scale resembles: 0-4-10-11-14-13-10-4-0-0. Identify two ways to handle this kind of a spread on their budgets and forecasts. (Choose two)

- A. Use the predefined S-Curve spread with small deviations on the spread points.
- **B. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to the resource class.**
- C. Use the predefined Bell Curve spread with small deviations on the spread points.
- **D. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to a project template.**

Answer: B,D

Explanation:

To handle a custom spread on budgets and forecasts, you can either create a new spread curve or edit an existing one to match the desired spread points. Then, you can attach the spread curve to a project template or a resource class, depending on whether you want to apply it to all projects using that template or all transactions using that resource class. NEW QUESTION # 59

Which four standard objects can you configure to include business specific attributes by using Application Composer for Project Execution Management? (Choose four.)

- **A. Project Gates**
- B. Project Resource Assignment
- **C. Project Issues**
- **D. Project Deliverables**
- **E. Project Milestones**
- F. Project Resource Request

Answer: A,C,D,E

Explanation:

Application Composer is a tool that allows you to configure standard objects or create custom objects to include business specific attributes for Project Execution Management. Four of the standard objects that you can configure using Application Composer are:

* Project Gates: These are checkpoints that mark the completion of a phase or stage in a project lifecycle.

* Project Issues: These are problems or risks that affect the progress or outcome of a project.

* Project Milestones: These are significant events or achievements that indicate the status or completion of a project or task.

* Project Deliverables: These are products or services that are produced or provided as part of a project or task. Project Resource Request and Project Resource Assignment are not standard objects that you can configure using Application Composer. These are features that allow you to request and assign resources for projects and tasks based on various criteria such as availability, qualifications, preferences, etc. Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/20c/oapfm/manage-project-execution.html#OAPFM2356201>

NEW QUESTION # 60

Green House Corporation has decided to enable the budgetary control feature for their projects. At which two levels will they be able to enter the amounts in the budget versions for these projects?

(Choose two.)

- **A. Project**
- B. Expenditure Category
- C. Expenditure Type
- D. Top resource
- **E. Task**

Answer: A,E

Explanation:

Budgetary control is a feature that allows you to monitor and control project costs against approved budgets.

You can enter the amounts in the budget versions for these projects at two levels: Task and Project. These levels correspond to the budgetary control levels that are defined for the project type. You can also view and compare the budget amounts and actual costs at these levels using reports and dashboards. Expenditure Type, Top Resource, and Expenditure Category are not levels at which you can enter the amounts in the budget versions for these projects. These are attributes that can be used to group and filter the budget and actual amounts for reporting purposes.
