Cisco Implementing Cisco Collaboration Cloud and Edge Solutions Sample Questions (Q123-Q128):

NEW QUESTION # 123

Which two statements about Mobile and Remote Access certificate are true? (Choose two.)

- A. Expressway Edge must use public CA signed certificate.
- **B. The Jabber client can work with public or private CA signed certificate.**
- C. You must upload the root certificates in the phone trust store.
- D. Expressway must generate certificate signing request.

- E. Expressway Core can use private CA signed certificate.

Answer: B,E

NEW QUESTION # 124

What is a requirement when configuring the Cisco Webex Hybrid Message account for accessing the API of the Cisco UCM IM and Presence Service?

- A. Use an application user not the main administrator account with the "Standard AXL API Access" role
- B. Add a new end-user with the "Standard AXL API Access" role
- C. Use an application user with only the "Standard CTI Allow Control of All Devices" role
- D. Use the main administrator account if it includes the "Standard AXL API Access" role

Answer: A

NEW QUESTION # 125

Cisco Collaboration deployment has video endpoints that can do B2B calls over the internet, but they also can make audio calls through a gateway. This ability means that someone from the internet can make fraud calls through the system. Which action must an engineer take to set up the search rules for calls that are being headed to the PSTN gateway?

- A. Add registered devices only in the zone for the PSTN gateway.
- B. Ensure that only requests that are authenticated are allowed to make a PSTN call.
- C. Add registered devices only in the search rule for the PSTN gateway.
- D. Avoid using any wild card in the source settings in the search rules.

Answer: D

NEW QUESTION # 126

What are two reasons why port 8443 is unreachable from the Internet to the Expressway-E? (Choose two.)

- A. Transform is not configured on Expressway-E.
- B. The firewall is blocking the port.
- C. The Unified Communications zone is down.
- D. The MRA license is missing on the Expressway-E.
- E. The SRV record for _cisco-uds is misconfigured.

Answer: B,E

NEW QUESTION # 127

An administrator must configure the DNS SRV records for Mobile and Remote Access for a company with the domain example.com, the Expressway-E FQDN is ExpE.example.com, and the Expressway-C FQDN is Exp-C.example.com. What must the administrator configure to allow external clients to discover the Expressway-E server?

- A. SRV record _cisco-uds._tcp.example.com that resolves to ExpC.example.com on port 8443
- B. SRV record _cisco-uds._tcp.example.com that resolves to ExpE.example.com on port 5061
- C. SRV record _collab-edge._tls.example.com that resolves to ExpE.example.com on port 5061
- D. SRV record _collab-edge._tls.example.com that resolves to ExpE.example.com on port 8443

Answer: D

Explanation:

To allow external clients to discover the Expressway-E server, the administrator must configure the SRV record _collab-edge._tls.example.com that resolves to ExpE.example.com on port 8443.

This SRV record is used for Mobile and Remote Access to allow external clients to connect securely to the Expressway-E server. The _collab-edge._tls prefix is used to identify the service as a "collaboration edge" service and the .example.com suffix is the domain name for the organization. Port 8443 is the default port used for secure HTTPS connections to the Expressway-E server.
