Salesforce Certified Industries CPQ Developer Sample Questions (Q272-Q277):

NEW QUESTION # 272

The Salesforce Industries Process Library is a portal providing training on Salesforce Industry Cloud products.

- A. False
- B. True

Answer: A

Explanation:

* B. False: The Salesforce Industries Process Library is not primarily a training portal but a repository that provides process templates and best practices specific to Salesforce Industries solutions. While it does support learning and adaptation of Salesforce Industry Cloud products, its main purpose is to facilitate the implementation and customization of industry-specific processes rather than formal training.

NEW QUESTION # 273

An Advanced Rule can have how many filters?

Note: This question displayed answer options in random order when taking this Test.

- A. 0-3
- B. 1 or more
- C. 0, 1 or more
- D. 0

Answer: B

Explanation:

In Salesforce Industries CPQ, an Advanced Rule can have multiple filters to define its conditions and actions based on those conditions:

* B. 1 or more - Advanced Rules in Salesforce Industries CPQ can include one or more filters. These filters determine the conditions under which the rule applies. The ability to use multiple filters allows for complex rule configurations that can handle various business scenarios.

NEW QUESTION # 274

What is the CpqAppHandler method to use when you need to create an order?

- A. postCart
- B. createCart
- C. getCart
- D. newCart

Answer: B

Explanation:

* C. createCart: The createCart method is typically used in Salesforce Industries CPQ to initiate a new cart, which can be equivalent to creating a new order. This method sets up a new cart instance where products and services can be added before finalizing the order.

NEW QUESTION # 275

What operations are available to users with regard to asset management?

Note: This question displayed answer options in random order when taking this Test

- A. MACD, ABO and Copy to Order
- B. Move, Reprice and Check Contract
- C. Change to Quote, Change to Order and Move
- D. Change to Opportunity, Change to Order and Move

Answer: A

Explanation:

In the context of Salesforce Industries CPQ asset management, the operations available are typically referred to as MACD (Move, Add, Change, Delete), ABO (Asset-Based Ordering), and Copy to Order. These operations allow users to manage and manipulate assets throughout their lifecycle in various ways, such as changing service arrangements, upgrading or adding new services, or duplicating existing orders for new opportunities. This set of functionalities is fundamental to the flexible asset management system in Salesforce Industries CPQ.

NEW QUESTION # 276

A developer needs to create a context rule in a Digital Commerce guided selling experience to evaluate the technology configuration installed at the account's location. The developer configures a new context dimension for the rule as shown below.

The developer prepares to test the rule by running the appropriate API cache job, but the job fails. Which two properties are causing the job to fail?

Choose 2 answers

- A. Values for caching
- B. Data Type
- C. Code
- D. Default Value

Answer: A,D

Explanation:

* B. Values for caching

* D. Default Value: These two properties are crucial when configuring a context dimension for a rule in a Digital Commerce guided selling experience. If either the values for caching are not set correctly or the default value is missing or improperly configured, it can lead to issues during the API cache job.

Properly setting these properties ensures that the caching mechanism can correctly interpret and store the necessary data for the context dimension, supporting efficient rule execution.
