

EAPA_2025 Pass-Sure Torrent - EAPA_2025 Actual Braindumps & EAPA_2025 Test Cram

P.S. Free 2025 Esri EAPA_2025 dumps are available on Google Drive shared by DumpStillValid: <https://drive.google.com/open?id=14gRKooJHNQjYXW1WU6pewKBucErp5Kjs>

Through our investigation and analysis of the real problem over the years, our EAPA_2025 prepare questions can accurately predict the annual EAPA_2025 exams. And the EAPA_2025 quiz guide's experts still have the ability to master propositional trends. Believe that such a high hit rate can better help users in the review process to build confidence, and finally help users through the qualification examination to obtain a certificate. All in all, we want you to have the courage to challenge yourself, and our EAPA_2025 ExamPrep will do the best for the user's expectations.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Manage and Create Geospatial Data: This section of the exam measures skills of GIS Analyst and covers the creation, organization, and management of both vector and attribute data including proper handling of coordinate systems, schema modifications, and metadata practices.
Topic 2	<ul style="list-style-type: none">Automate Workflows: This section of the exam measures skills of GIS Specialist and examines your ability to build and manage models using ModelBuilder, construct geoprocessing workflows, chain together tools, and automate repeatable GIS tasks effectively.
Topic 3	<ul style="list-style-type: none">Use Raster and Imagery Data: This section of the exam measures skills of GIS Analyst and tests your ability to work with rasters and imagery including mosaic datasets, raster functions like NDVI, mosaic methods, exporting rasters, and managing raster analysis environments.

Free EAPA_2025 Practice Exams & Latest EAPA_2025 Braindumps Questions

Learning is sometimes extremely dull and monotonous, so few people have enough interest in learning, so teachers and educators have tried many ways to solve the problem. Research has found that stimulating interest in learning may be the best solution. Therefore, the EAPA_2025 prepare guide' focus is to reform the rigid and useless memory mode by changing the way in which the EAPA_2025 Exams are prepared. EAPA_2025 practice materials combine knowledge with the latest technology to greatly stimulate your learning power. By simulating enjoyable learning scenes and vivid explanations, users will have greater confidence in passing the qualifying exams.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q62-Q67):

NEW QUESTION # 62

An organization that manages vector data as shapefiles wants to use topology rules for editing data.

What should be the initial steps to implement topology?

- A. Convert the shapefile to a geodatabase feature class in a feature dataset > Right-click the feature dataset > Point to New > Topology
- B. In the Catalog pane, right-click the file folder that the shapefile resides in > Point to New > Topology
- C. Open the Create Topology geoprocessing tool > For Input Feature Dataset, select the file folder that the shapefile resides in > Name the topology and run tool

Answer: A

Explanation:

Topology in ArcGIS Pro requires a geodatabase feature dataset. Shapefiles do not support topology directly.

Therefore, the shapefile must first be converted to a feature class within a feature dataset in a geodatabase.

Topology can then be created and applied.

* Options A and B are incorrect because topology cannot be applied directly to file folders or shapefiles.

Therefore, the correct answer is C.

NEW QUESTION # 63

An organization with many editors needs to know when features have been created and edited, as well as who edited the features.

Where should the GIS administrator enable this capability?

- A. The Design options accessed by right-clicking the shapefile
- B. The Manage options accessed by right-clicking the feature dataset
- C. The Manage options accessed by right-clicking geodatabase

Answer: B

Explanation:

Editor tracking (which records who edited a feature and when) is enabled on individual feature classes or feature datasets in a geodatabase under the Manage menu. Shapefiles do not support editor tracking.

* The geodatabase (Option A) controls higher-level administrative functions but not editor tracking.

* Shapefiles (Option B) do not support editor tracking.

* The feature dataset (Option C) allows enabling editor tracking for included feature classes.

Therefore, the correct answer is C.

-

NEW QUESTION # 64

A GIS analyst is using the Raster Calculator to determine the best location to start a coffee tree farm. The soil should be deep sandy loam (represented by class code 5 in raster) or fertile volcanic red earth (class code 12).

Temperatures should remain between 17.8 to 21.1 degrees Celsius (64 and 70 degrees Fahrenheit), and the area should get at least 60 inches (1.52 meters) of rain per year.

Which expression should be used to produce suitable areas?

- A. (Precipitation>='60') & (Temperature <= '70') & (Temperature>='64') &((SoilType='5') & (SoilType='12'))
- B. ("Temperature" <= 70) & ("Temperature">=64) & ("SoilType"=5) | (SoilType=12) &("Precipitation">=60)
- C. ("Precipitation">=60) &(("SoilType"=5)|(SoilType=12)) &("Temperature" <= 70) &("Temperature">=64)

Answer: C

Explanation:

The correct logical expression should:

* Use logical OR (|) for multiple acceptable soil types.

* Use logical AND (&) to combine precipitation, temperature, and soil criteria.

* Respect proper operator precedence with parentheses.

Option C correctly groups the conditions: precipitation # 60, temperature between 64 and 70, and soil type equal to either 5 or 12. Therefore, the correct answer is C.

-

NEW QUESTION # 65

A GIS analyst is creating a spatial map series based on the name field for a given feature. The analyst wants to automate the map sheet's title based on that feature name.

Which tag using dynamic text will provide the desired result?

- A. Layout Name
- B. Map Name
- C. Page Name

Answer: C

Explanation:

The Page Name dynamic text tag references the current index feature's value (such as the feature name field) when creating a spatial map series. This allows the title to update automatically based on the feature used for each map sheet.

* Layout Name (Option A) references the name of the layout itself.

* Map Name (Option C) references the map's name, not the page name from the map series.

Therefore, the correct answer is B.

-

NEW QUESTION # 66

A GIS analyst receives a project and data from a colleague. When opening the project, the analyst notices that the data links are broken. All the data is located in the same folder, and the analyst wants to repair all the broken links simultaneously.

Which workflow should the analyst use?

- A. View > Catalog View > Data Sources > Item > New Path > Apply
- B. Click the red exclamation point > Change Data Source
- C. Right-click the layer > Properties > Source > Set Data Source

Answer: A

Explanation:

The Data Sources tab in the Catalog View allows the analyst to repair multiple broken data paths simultaneously by assigning a new folder location. This is the most efficient way to repair multiple broken links at once.

* Set Data Source (Option A) and Change Data Source (Option B) only repair one layer at a time.

* Catalog View > Data Sources (Option C) supports batch repairs.

Therefore, the correct answer is C.

-

NEW QUESTION # 67

.....

We provide you with two kinds of consulting channels if you are confused about some questions on our EAPA_2025 study materials. You can email us or contact our online customer service. We will reply you as soon as possible. You are free to ask questions about EAPA_2025 training prep at any time since that we are working 24/7 online. Our staff is really very patient and friendly. They are waiting to give you the most professional suggestions on our EAPA_2025 exam questions.
