We believe that the Software version of our 100-160 actual exam will help you make a good learning plan which is a model test in limited time simulating the Real 100-160 Exam, if you finish the model 100-160 test, our system will generate a report according to your performance.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q184-Q189):

NEW QUESTION # 184

Which of the following is NOT a component of AAA?

- A. Accountability
- B. Authentication
- C. Accurate accounting
- D. Authorization

Answer: C

Explanation:

The components of AAA are Authentication, Authorization, and Accounting. Accounting refers to the process of tracking and logging user activities, but its focus is not on accuracy. Instead, accounting provides information about resource usage, user activities, and system utilization for auditing and analysis purposes.

NEW QUESTION # 185

Which of the following is an example of a strong password?

- A. "Password123"
- B. "abcdabcd"
- C. "StR0ngP@\$Sw0rd!"
- D. "123456"

Answer: C

Explanation:

A strong password is one that is complex, long, and difficult to guess. It should contain a combination of uppercase and lowercase letters, numbers, and special characters. In this case, "StR0ngP@\$Sw0rd!" meets these criteria, making it a strong password. The other options are weak passwords as they are easily guessable, commonly used, or lack complexity.

NEW QUESTION # 186

Move each worm mitigation step from the list on the left to the correct description on the right.

Note: You will receive partial credit for each correct answer.

Containment Inoculation

Treatment Quarantine

Clean and patch infected systems.

Remove or block infected systems from the network.

Patch uninfected systems to deprive the worm of more available targets.

Compartmentalize and segment the network to limit the spread of the worm to areas already infected.

Answer:

Explanation:

Containment Inoculation

Treatment Quarantine

Clean and patch infected systems.

Remove or block infected systems from the network.

Patch uninfected systems to deprive the worm of more available targets.

Compartmentalize and segment the network to limit the spread of the worm to areas already infected.

NEW QUESTION # 187

What is a common vulnerability in Internet of Things (IoT) devices?

- A. Weak encryption protocols used for data transmission.
- B. Lack of user access controls and authentication mechanisms.
- C. All of the above.
- D. Insufficient physical security measures.

Answer: C

Explanation:

IoT devices often suffer from multiple vulnerabilities. Weak encryption protocols make data transmission susceptible to interception and unauthorized access. Insufficient physical security measures can result in the theft or compromise of the device itself. Furthermore, the lack of user access controls and authentication mechanisms can allow unauthorized individuals to infiltrate and manipulate IoT devices.

NEW QUESTION # 188

What is an insider threat?

- A. The accidental disclosure of sensitive information.
- B. A vulnerability in an organization's network infrastructure.
- C. A security breach caused by an external attacker.
- **D. A threat posed by an individual with authorized access to an organization's systems and data.**

Answer: D

Explanation:

Insider threats refer to risks and vulnerabilities that arise from individuals who have authorized access to an organization's systems, networks, or data. These individuals may intentionally or unintentionally cause harm, such as stealing confidential information, sabotaging systems, or disclosing sensitive data to unauthorized entities.

NEW QUESTION # 189

.....

The PDF version of our Cisco 100-160 exam materials has the advantage that it can be printable.
