In our lives, we will encounter many choices. Some choices are so important that you cannot treat them casually. The more good choice you choose in your life, the more successful you are. Perhaps our AZ-120 exam guide can be your correct choice. Our study guide is different from common test engine. Also, the money you have paid for our AZ-120 Study Guide will not be wasted. We sincerely hope that our test engine can teach you something. Of course, you are bound to benefit from your study of our AZ-120 practice material.

How to study the AZ-120: Planning and Administering Microsoft Azure for SAP Workloads Exam

Preparation of certification exams could be covered with two resource types. The first one are the study guides, reference books and study forums that are elaborated and appropriate for building information from ground up. Apart from them video tutorials and lectures are a good option to ease the pain of through study and are relatively make the study process more interesting nonetheless these demand time and concentration from the learner. Smart candidates who wish to create a solid foundation altogether examination topics and connected technologies typically mix video lectures with study guides to reap the advantages of each but

practice exams or practice exam engines is one important study tool which goes typically unnoted by most candidates. Practice exams are designed with our experts to make exam prospects test their knowledge on skills attained in course, as well as prospects become comfortable and familiar with the real exam environment. Statistics have indicated exam anxiety plays much bigger role of students failure in exam than the fear of the unknown. VCE4Dumps expert team recommends preparing some notes on these topics along with it don't forget to practice **AZ-120 exam dumps** which had been written by our expert team, each of these can assist you loads to clear this exam with excellent marks.

Exam Topics

The AZ-120 Exam focuses on a range of domains. These areas are designed to equip the candidates with the knowledge and skills that will be measured in the test. The highlights of these topics are as follows:

- **Transfer SAP Workloads to Microsoft Azure: 10-15%**

Here, you need to be able to develop an inventory of current SAP landscapes. This includes SAP landscape architecture, operations system, network and security inventory, and SAP Database Inventory. It also covers availability & resiliency inventory and computing inventory, migration considerations, as well as SAP Workloads performance metrics and SLA. In addition, the individuals should learn about the migration strategy design. They need to build their skills in designing requirements for TDI (Tailored Datacenter Integration) solutions, Azure Migrate SAP, and databox. It also covers competence in HANA System Replication, optimization of infrastructure for migration, and restore and backup solutions and methods.

- **Develop & Deploy Azure for SAP Workloads: 35-40%**

This section covers the learners' competence in VM automated configuration, ARM templates, and usage of automation tools for scripting, including development and modification of scripts, and dependencies deployment. Also, they need to be able to manage and implement VM. This requires an in-depth understanding of the subnetting strategy, IPS/IDS for Azure, segmentation & isolation for the SAP landscape, and routing fundamentals. The subtopic about the administration of authentication and access on Azure will measure your knowledge of the custom domains, service principal, Azure AD join, and Azure AD Identification Protection. It includes the conditional access policies, Just-in-Time access, and Role-based access control as well. Your skill set should also include the ability to manage identities and implement them. This means that the candidates should demonstrate an extensive understanding of AD Federation & Single Sign-on, Azure AD Connect, and LDAP/SSH/Kerberos. It also requires their understanding of authentication of SAP HANA Cloud Identity and Linux VMs AD Domain membership mechanism. It is important to monitor SAP Workloads on Azure. Therefore, you need to have the skills in Log Analytics metrics and workspaces, Azure Monitor, and Azure Extension for SAP.

- **Certify Azure Infrastructures for SAP Workloads: 10-15%**

The questions from this subject area will test your ability to perform the checks on the Infrastructure Validation. This requires the skills in storage verification, network throughput and performance verification, as well as flexible I/O tester & DD. It also covers the knowledge of Microfocus LoadRunner, Spirent Avalanche, and Apache JMeter. Besides that, the individuals need to be able to perform the checks for the Operational Readiness. This covers the areas, such as high availability checks, print test, failover test, backup & restore, and DR test.

- **Design Azure Solutions for Support of SAP Workloads: 20-25%**

First of all, it is important to know how to design the major infrastructure solution within Azure for support of SAP Workloads. The candidates will need to demonstrate their understanding of the network topology prerequisites, bare or virtual metal, and OS prerequisites. It also covers their knowledge of security requirements, computes, storage requirements, infrastructure requirements, supported SAP versions/products, and proximity placement group. Moreover, you are required to plan the Azure infrastructure services to support SAP Workloads. This requires the expertise in SLA/High Availability, dependencies, licensing, application interfaces, compliance, data protection, monitoring, and backup & restoration prerequisites. Besides that, a potential candidate needs to be skillful enough to design Resilient Azure Solutions for support of SAP Workloads. You should understand the fundamentals of SAP Central services, Database HA, availability zones, and applications servers. It also requires your grasp of availability sets, Disaster Recovery with paired regions, and HANA-supported HA/DR models.

- **Operationalize Azure SAP Architecture: 10-15%**

Optimizing the performance is what you should be able to do for this domain to succeed. It covers your skills in the storage structure, adjustment of bandwidth for ExpressRoute, unplanned outages recovery plan, planned outages scheduled maintenance, and infrastructure housekeeping and SAP application. It is important to know about the migration process of

SAP Workloads to Azure. The potential candidates need to demonstrate their expertise in the migration strategy, storage configuration, Azure Migrate, data backup & restoration, and preparation of target & source environments, among others.

Microsoft AZ-120: Planning and Administering Microsoft Azure for SAP Workloads is an exam that tests the knowledge and skills required to plan, deploy, and manage SAP workloads on the Azure platform. Planning and Administering Microsoft Azure for SAP Workloads certification is designed for professionals who want to specialize in cloud solutions for enterprise applications, specifically SAP systems. It is also ideal for IT professionals who want to expand their knowledge in cloud computing and SAP.

AZ-120 – 100% Free Valid Mock Test | Valid Exam AZ-120 Blueprint

We try our best to provide the most efficient and intuitive learning methods to the learners and help them learn efficiently. Our AZ-120 exam reference provides the instances to the clients so as to they can understand them intuitively. Based on the consideration that there are the instances to our AZ-120 test guide to concretely demonstrate the knowledge points. Through the stimulation of the Real AZ-120 Exam the clients can have an understanding of the mastery degrees of our AZ-120 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q40-Q45):

NEW QUESTION # 40

You need to provide the Azure administrator with the values to complete the Azure Resource Manager template. Which values should you provide for diskCount, StorageAccountType, and domainName? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

diskCount:  ▼

0
1
2
4

storageAccountType: ▼

Premium_LRS
Standard_GRS
Standard_LRS

domainName: ▼

ad.contoso.com
ad.contoso.onmicrosoft.com
contoso.com
contoso.onmicrosoft.com

Answer:

Explanation:

diskCount:

storageAccountType:

domainName:

- 0
- 1
- 2
- 4

- Premium_LRS
- Standard_GRS
- Standard_LRS

- ad.contoso.com
- ad.contoso.onmicrosoft.com
- contoso.com
- contoso.onmicrosoft.com

Explanation:

diskCount:

storageAccountType:

domainName:

- 0
- 1
- 2
- 4

- Premium_LRS
- Standard_GRS
- Standard_LRS

- ad.contoso.com
- ad.contoso.onmicrosoft.com
- contoso.com
- contoso.onmicrosoft.com

Box 1: 4

Scenario: the Azure Resource Manager template that will be used to provision the production application servers. Ensure that each production application server has four 1-TB data disks.

Box 2: Standard_LRS

Scenario: Minimize costs whenever possible.

Box 3: contoso.onmicrosoft.com

The network contains an on-premises Active Directory domain named ad.contoso.com.

The Initial domain: The default domain (onmicrosoft.com) in the Azure AD Tenant. For example, contoso.onmicrosoft.com.

NEW QUESTION # 41

You plan to deploy an SAP environment on Azure that will use Azure Availability Zones.

Which load balancing solution supports the deployment?

- A. Azure Application Gateway v1 SKU
- B. Azure Basic Load Balancer
- C. Azure Standard Load Balancer

Answer: C

Explanation:

When you deploy Azure VMs across Availability Zones and establish failover solutions within the same Azure region, some restrictions apply:

You can't use an Azure Basic Load Balancer to create failover cluster solutions based on Windows Server Failover Clustering or Linux Pacemaker. Instead, you need to use the Azure Standard Load Balancer SKU.

NEW QUESTION # 42

You plan to deploy SAP HANA to an Azure virtual machine that has a constrained vCPU size.

You need to validate that the virtual machine complies with SAP-defined resource requirements by using the SAP HANA Hardware and Cloud Measurement Tools (HCMT).

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Run the hcmtsetup command.
- Run the hcmt command and specify the hcmtsetup.exe parameter.
- Upload the ZIP file to the SAP HANA Hardware and Cloud Measurement Analysis...
- Run the SAPCAR utility.
- Download the HCMT.

Answer Area

-
-
-
-
-

Answer:

Explanation:

Answer Area

- Download the HCMT.
- Run the hcmtsetup command.
- Run the hcmt command and specify the hcmtsetup.exe parameter.
- Upload the ZIP file to the SAP HANA Hardware....
- Run the SAPCAR utility.

1 - Download the HCMT.

- 2 - Run the hcmtsetup command.
- 3 - Run the hcmt command and specify the
- 4 - Upload the ZIP file to the SAP HANA Hardware....
- 5 - Run the SAPCAR utility.

NEW QUESTION # 43

You deploy on SAP environment on Azure.

You need to monitor the performance of the SAP NetWeaver environment by using the Azure Enhanced Monitoring Extension for What should you do first?

- A. From Azure CLI. run the az v aem m set command.
- B. From Azure CLI, install the Linux Diagnostic Extension.
- C. From the Azure portal, enable the Custom Script Extension.
- **D. From the Azure portal, enable the Azure Network Watcher Agent.**

Answer: D

NEW QUESTION # 44

You plan to deploy SAP on Azure.

The deployment must meet the following requirements:

- * Support failover to another Azure region in the event of a regional outage.
- * Minimize data loss during a failover.
- * Minimize costs.

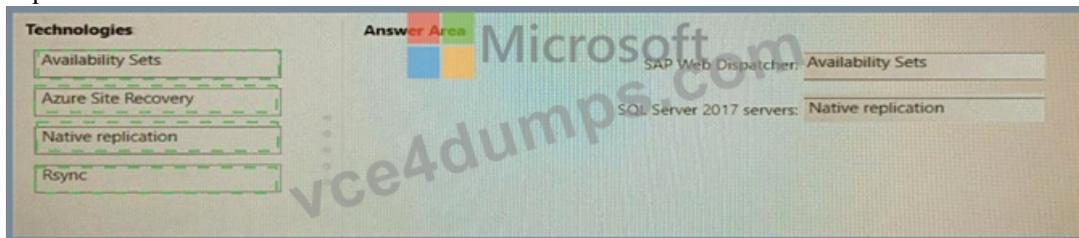

Which fault tolerance technology should you choose for the SAP Web Dispatcher and the Microsoft SQL Server 2017 servers to meet the requirements? To answer, drag the appropriate technologies to The correct targets. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

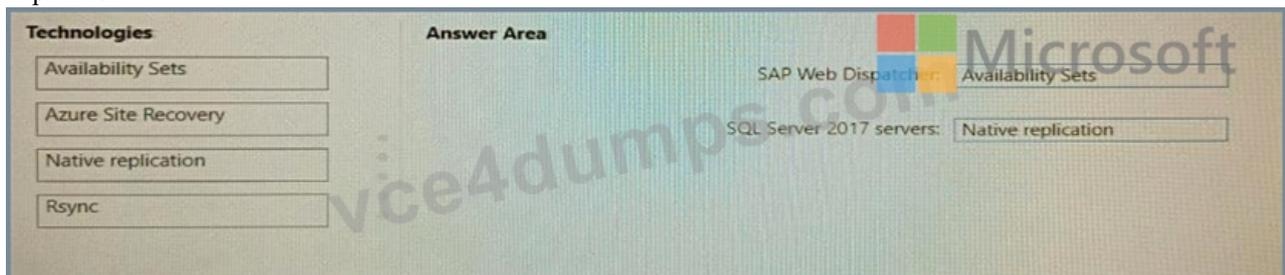

Answer:

Explanation:

Explanation

NEW QUESTION # 45
