

# NCP-CI-Azure Reliable Test Test: Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) - Nutanix NCP-CI-Azure Exams Pass for sure

What's more, part of that PassLeaderVCE NCP-CI-Azure dumps now are free: [https://drive.google.com/open?id=1mlkTVssdpuuM4\\_Qo5tfGwXJA\\_-vR7Mev](https://drive.google.com/open?id=1mlkTVssdpuuM4_Qo5tfGwXJA_-vR7Mev)

We have three formats of study materials for your leaning as convenient as possible. Our NCP-CI-Azure question torrent can simulate the real operation test environment to help you pass this test. You just need to choose suitable version of our NCP-CI-Azure guide question you want, fill right email then pay by credit card. It only needs several minutes later that you will receive products via email. After your purchase, 7\*24\*365 Day Online Intimate Service of NCP-CI-Azure question torrent is waiting for you. We believe that you don't encounter failures anytime you want to learn our NCP-CI-Azure guide torrent.

## Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.</li> </ul>

## NCP-CI-Azure Exams, NCP-CI-Azure Reliable Test Topics

If you have interests with our NCP-CI-Azure practice materials, we prefer to tell that we have contacted with many former buyers of our NCP-CI-Azure exam questions and they all talked about the importance of effective NCP-CI-Azure practice material playing a crucial role in your preparation process. Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real NCP-CI-Azure Guide materials.

### Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

Exhibit.

AN NC2 on Azure Cluster was deployed with two Flow gateways in HA (FGW1 and FGW2). After a week of use. Four bare-metal nodes, were added to the NC2 cluster and additional workloads were added.

It was determined that additional bandwidth for north/South traffic would be needed. Two additional Flow gateways were added (FGW3 and FGW4) from the NC2 portal configuration menu.

The existing workloads prior to expansion on the NC2 cluster will be able to use which Flow Gateways using the No-Nat (routed) traffic path?

- A. Only the Flow Gateway that each workload was originally using.
- **B. All Flow Gateways can be used.**
- C. FGW1 & FGW2 only, new workloads can use FGW3 & FGW4.
- D. All Flow Gateways can be used after the existing workloads reboot.

**Answer: B**

Explanation:

In the scenario presented, the NC2 cluster was initially deployed with two Flow Gateways (FGW1 and FGW2) in HA. After adding four bare-metal nodes and additional workloads, two more Flow Gateways (FGW3 and FGW4) were added to handle the increased bandwidth for north/south traffic. Given the configuration, the existing workloads can utilize all available Flow Gateways (FGW1, FGW2, FGW3, and FGW4) for No-NAT (routed) traffic paths. This setup allows for Equal Cost Multipath (ECMP) routing, distributing traffic load across all Flow Gateways.

#### NEW QUESTION # 40

An administrator has been tasked with ensuring NC2 VMs are able to access Azure and on-premises resources.

The NC2 VM traffic must not traverse the internet.

How can the administrator achieve this?

- A. By using an Interface Endpoint
- B. By using a Site-to-Site VPN
- **C. By using ExpressRoute**
- D. By using an SSH connection

**Answer: C**

Explanation:

\* Requirement Analysis: The NC2 VMs need to access Azure and on-premises resources without traversing the internet, ensuring secure and direct connectivity.

\* Solution Options:

\* SSH Connection: Suitable for individual remote access, not for full VM connectivity to Azure and on-premises resources.

\* Interface Endpoint: Facilitates private connectivity to specific Azure services, but not comprehensive for all resources.

\* ExpressRoute: Provides private, dedicated connectivity between Azure and on-premises environments. This ensures that traffic

does not traverse the public internet, meeting the security and performance requirements.

\* Site-to-Site VPN: Provides secure connectivity but can involve traversing the internet, which is against the requirements.

\* Conclusion: ExpressRoute is the optimal solution as it offers a private connection that does not involve internet traversal, ensuring secure and efficient access to both Azure and on-premises resources.

#### NEW QUESTION # 41

A new subnet needs to be created within Flow Virtual Networking to accommodate a new type of workload in the company's NC2 Azure instance.

Which type of network will satisfy this task?

- A. Underlay
- **B. Overlay**
- C. VPC
- D. VNET

**Answer: B**

Explanation:

\* Flow Virtual Networking: Nutanix Flow Virtual Networking allows for the creation of overlay networks to segment and manage network traffic.

\* Network Types:

\* Underlay: Refers to the physical network infrastructure.

\* Overlay: Logical network built on top of the physical infrastructure, providing flexibility for creating isolated subnets and accommodating different workloads.

\* VPC: Virtual Private Cloud, a network within a public cloud provider.

\* VNET: Azure-specific virtual network.

\* Requirement: Creating a subnet for new workloads within Flow Virtual Networking suggests using an overlay network for logical separation and management.

\* Conclusion: An overlay network within Flow Virtual Networking will satisfy the task of accommodating a new type of workload in the NC2 Azure instance.

\* Azure Virtual Network Documentation

#### NEW QUESTION # 42

An administrator has been tasked with deploying a new production NC2 cluster on Azure and is studying the deployment requirements.

How many Azure Ready Nodes, at a minimum, must the administrator ensure are deployed within the cluster?

- **A. 0**
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

\* Minimum Node Requirement: For production deployments, Nutanix typically requires a minimum of three nodes to ensure high availability and fault tolerance within the cluster.

\* Azure Ready Nodes: Deploying at least three Azure Ready Nodes allows the cluster to provide redundancy, ensuring that the failure of a single node does not affect the overall availability and performance of the cluster.

### NEW QUESTION # 43

Native Azure VMs exist in a subnet (10.20.80.0/20) in the Prism Central VNet that need access to the workload running on the Nutanix User.

What needs to be modified to allow access from the native Azure VMs to the workloads running in the Nutanix User VPC?

- A. Adjust the Inbound Network Security Group on the Flow Gateway VM Internal NIC to allow traffic 102030.0/20.
- B. Remove the ERP value on the transit VPC and Nutanix User VPC.
- C. Change the ERP value to the the subnet range of the native Azure VMs (10.20.80.0/20) on the Transit VPC and the Nutanix User VPC.
- D. Adjust the Inbound Network Security Group on the Flow Gateway VM External NIC to allow traffic 102030.0/20.

**Answer: A**

Explanation:

To allow access from the native Azure VMs to the workloads running in the Nutanix User VPC, the administrator needs to:

\* Adjust the Inbound Network Security Group (NSG) on the Flow Gateway VM's Internal NIC.

\* Specifically, allow traffic from the subnet range of the native Azure VMs (10.20.80.0/20) in the Inbound rules of the NSG associated with the Internal NIC of the Flow Gateway VM.

This configuration change permits the desired network traffic, ensuring that the native Azure VMs can communicate with the workloads in the Nutanix User VPC. References

### NEW QUESTION # 44

.....

We continually improve the versions of our NCP-CI-Azure study materials so as to make them suit all learners with different learning levels and conditions. The clients can use the APP/Online test engine of our NCP-CI-Azure study materials in any electronic equipment such as the cellphones, laptops and tablet computers. Our after-sale service is very considerate and the clients can consult our online customer service about the price and functions of our NCP-CI-Azure Study Materials and refund issues on the whole day and year.
