Just come and buy our 1Z1-947 exam questions as the pass rate is more than 98%!

## **Oracle GoldenGate 19c Implementation Professional Sample Questions (Q41-Q46):**

### **NEW QUESTION # 41**

Using adminclient, you can add a data pump Extract using the command: "ADD EXTRACT <ext name>, EXTTRAILSOURCE <trail file>"

- A. TRUE
- B. FALSE

**Answer: B**

Explanation:

adminclient doesn't support EXTTRAILSOURCE; it's not used in Extract setup.

#### NEW QUESTION # 42

What is implemented by Oracle GoldenGate to be able to obtain trail files from the source when the source Distribution Server cannot initiate communication with the target where the Receiver Server is?

- A. The Extract will directly send trail files for the Replicat to receive and apply changes.
- B. Microservices Architecture Authentication will initiate communication for the Distribution Server.
- **C. A Receiver Server can pull trail files from Distribution Server using a single port for Reverse proxy.**
- D. A secured port must be implemented and opened by the target to enable the source Distribution Server to be able to initiate communication with the target's Receiver Server.

**Answer: C**

Explanation:

In Oracle GoldenGate Microservices Architecture, when the source Distribution Server cannot initiate outbound communication (e.g., due to firewall or network restrictions), the Receiver Server on the target can be configured to pull trail files using Reverse Proxy mode - establishing a single, secure inbound connection.

#### NEW QUESTION # 43

You want to eliminate the reporting output from processing a Macro. How should you proceed?

- A. Use the optional parameter NOREPORT.
- B. Use the optional parameter UNLIST.
- **C. Use the optional parameter NOLIST.**
- D. Use the optional parameter NOMACROOUTPUT.

**Answer: C**

Explanation:

The NOLIST parameter is used in Oracle GoldenGate to suppress the listing of macros and included parameter files in the process report file. This is particularly useful when including long macro libraries to keep the report concise.

#### NEW QUESTION # 44

Identify the scenario in which you cannot configure GoldenGate.

- **A. Snapshot database backups**
- B. Real-time Change Data Capture from transaction logs
- C. Initial Load synchronization
- D. Batch Data Transfer from table data

**Answer: A**

Explanation:

Snapshot database backups are not a replication scenario - GoldenGate does not operate on backups. It's designed for live, transactional, and log-based data movement, not static snapshots.

#### NEW QUESTION # 45

A database that requires replication contains sensitive data that is not required on the target. How should you prevent this sensitive data from being replicated?

- **A. Use the COLS and COLSEXCEPT options in the TABLE parameter.**
- B. Use the FILTER option in the MAP parameter.
- C. Do not specify those columns in the ADD TRANDATA command.
- D. Use the COLMAP option in the MAP parameter.

**Answer: A**

Explanation:

To prevent sensitive data from being replicated, you should use the COLS and COLSEXCEPT options in the TABLE parameter. These options allow you to explicitly include or exclude specific columns from the replication process, ensuring that sensitive data is not transferred to the target database.

## NEW QUESTION # 46

.....

Learning with our 1Z1-947 learning guide is quiet a simple thing, but some problems might emerge during your process of 1Z1-947 exam materials or buying. Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service on 1Z1-947 training guide twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time.
