If you use Plat-Arch-202test prep, you will have a very enjoyable experience while improving your ability. We have always advocated customer first. If you use our Plat-Arch-202 Learning Materials to achieve your goals, we will be honored. And our Plat-Arch-202 pdf files give you more efficient learning efficiency and allows you to achieve the best results in a limited time. Our Plat-Arch-202 pdf files are the best exam tool that you have to choose.

Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q226-Q231):

NEW QUESTION # 226
Universal Containers (\)C) is on the Unlimited Edition of Salesforce orgs. Currently, there are four Developer Pro sandboxes used by dev teams for various purposes, one partial copy sandboxes used for training, one full sandbox used for user acceptance testing. There is another full sandbox used for performance testing during the initial launch, and it is no longer being actively used.
A system administrator had reported yesterday that none of the sandboxes can be refreshed.
What is the most probable action an architect can help the system administrator with?

- A. Create a Salesforce support case, someone should know what is wrong.
- B. Contact the Salesforce Account Team to do a sandbox License Count.
- C. Delete the full sandbox used for performance testing.
- D. It appears the org is using more sandboxes than the license permits. The Partial Copy sandbox shouldn't be used.

Answer: B

NEW QUESTION # 227
Universal containers have recently replaced a custom service center application with Salesforce Service Cloud. Administrators are now confused about which fields and classes are actively being utilized and how future implementations can be maintained. Choose 2 answers

- A. Create a governance framework focused on high-level business strategy and goals.
- B. Create a design standard requiring integration to use declarative configurations patterns
- C. Create a governance process requiring all projects to create project deliverable documentation.
- D. Create an adoption plan for end users using Salesforce dashboards and reports.
- E. Create a standard method for deprecating classes and fields using design standards.

Answer: C,E

NEW QUESTION # 228
Universal Containers CUC) is embarked on an enterprise salesforce transformation journey, UC would like to streamline and automate deployment to different sandboxes during the build phase. Upon customer acceptance in UAT, the company requested to automate the production deployment as well.
As the deployment architect, what is the recommendation to satisfy the customer requirements?

- A. Recommend using an AppExchange solution that packages the deployment components and you can run the deployment wizard to track deployment result.
- B. Recommend using SFDX and documents the deployment commands with steps to be executed for each environment.
- C. Recommend using the Continues integration and the Continues deployment tool and build the pipeline to deploy to sandboxes and production.
- D. Recommend using the ANT script and build a custom application to run the script and use change sets to deploy supported metadata.

Answer: C

NEW QUESTION # 229
Universal Containers (UC) deploys major releases on a monthly schedule. In recent months, the team has noticed the deployment time has increased two-fold from 2 hours to 4 hours .The team wants to get back to reasonable deployment times. Which three issues could be affecting their deployment times? Choose 3 ans

- A. The deployments are being scheduled during off peak hours, which is not the best time.
- B. Users are working in the org during deployment locking can affect users and the deployment.
- C. The team is highly constrained with pre-deployment and post-deployment changes.
- D. The number and complexity of Apex tests will have a large impact on the deployment time.
- E. Some components profiles, custom junction objects, and fields take longer to process than others.

Answer: B,D,E

NEW QUESTION # 230
In architect is working on a project that relies on functionality that cannot be deployed via the Metadata API. What is the best practice for making sure these components are deployed successfully?

- A. Generate and deploy a change set that enables the required settings
- B. Generate and install a managed package that enables the required settings
- C. Utilize the metadata API's deployAllComponents call
- D. Document deployment steps for any components that cannot be automatically deployed

Answer: D

NEW QUESTION # 231

......
