NEW QUESTION # 171

An engineer is troubleshooting connectivity to the DNS servers from hosts behind a new Cisco FTD device. The hosts cannot send DNS queries to servers in the DMZ. Which action should the engineer take to troubleshoot this issue using the real DNS packets?

- A. Use the Connection Events dashboard to check the block reason and adjust the inspection policy as needed.
- B. Use the packet tracer tool to determine at which hop the packet is being dropped.
- C. Use the show blocks command in the Threat Defense CLI tool and create a policy to allow the blocked traffic.
- D. Use the packet capture tool to check where the traffic is being blocked and adjust the access control or intrusion policy as needed.

Answer: A

NEW QUESTION # 172

A consultant is working on a project where the customer is upgrading from a single Cisco Firepower 2130 managed by FDM to a pair of Cisco Firepower 2130s managed by FMC for high availability. The customer wants the configuration of the existing device being managed by FDM to be carried over to FMC and then replicated to the additional device being added to create the high availability pair. Which action must the consultant take to meet this requirement?

- A. The FTD configuration must be converted to ASA command format, which can then be migrated to FMC.
- B. The current FDM configuration must be configured by hand into FMC before the devices are registered.
- C. The current FDM configuration must be migrated to FMC using the Secure Firewall Migration Tool.
- D. The current FDM configuration will be converted automatically into FMC when the device registers.

Answer: C

NEW QUESTION # 173

Which two conditions must be met to enable high availability between two Cisco FTD devices? (Choose two.)

- A. same DHCP/PPoE configuration
- B. same NTP configuration
- C. same number of interfaces
- D. same host name
- E. same flash memory size

Answer: B,C

NEW QUESTION # 174

Which two routing options are valid with Cisco FTD? (Choose Two)

- A. ECMP with up to three equal cost paths across a single interface
- B. BGPv4 in transparent firewall mode
- C. ECMP with up to three equal cost paths across multiple interfaces
- D. BGPv4 with nonstop forwarding
- E. BGPv6

Answer: A,E
