Free download Snowflake certification COF-C02 exam practice questions and answers

Now passing Snowflake certification COF-C02 exam is not easy, so choosing a good training tool is a guarantee of success. Lead2PassExam will be the first time to provide you with exam information and exam practice questions and answers to let you be fully prepared to ensure 100% to pass Snowflake Certification COF-C02 Exam. Lead2PassExam can not only allow you for the first time to participate in the Snowflake certification COF-C02 exam to pass it successfully, but also help you save a lot of valuable time.

The SnowPro Core Certification exam is an excellent way for professionals to boost their careers and enhance their job prospects. SnowPro Core Certification Exam certification demonstrates that an individual has the skills and knowledge required to work with Snowflake's cloud data platform effectively. With the demand for Snowflake professionals increasing rapidly, earning the SnowPro Core Certification can help individuals stand out in the job market and gain a competitive advantage. Moreover, the certification can also lead to higher salaries and better job opportunities.

Snowflake SnowPro Core Certification Exam Sample Questions (Q645-Q650):

NEW QUESTION # 645

By definition, a secure view is exposed only to users with what privilege?

- A. USAGE
- B. IMPORT SHARE
- C. OWNERSHIP
- D. REFERENCES

Answer: A

NEW QUESTION # 646

When retrieving data from a table which type of query will benefit the MOST from use of the search optimization service?

- A. Queries that involve one or more columns inside the cluster key using the lowest cardinality to select filters.
- B. Queries with highly-selective table filters that return a small subset of rows.
- C. Queries with unpredictable data volumes.
- D. Queries on fields in a VARIANT column that will return all data as structured data.

Answer: D

NEW QUESTION # 647

Which activities are managed by Snowflake's Cloud Services layer? (Select TWO).

- A. Data pruning
- B. Query parsing and optimization
- C. Authorisation
- D. Data compression
- E. Access delegation

Answer: B,C

Explanation:

Snowflake's Cloud Services layer is responsible for managing various aspects of the platform that are not directly related to computing or storage. Specifically, it handles authorisation, ensuring that users have appropriate access rights to perform actions or access data. Additionally, it takes care of query parsing and optimization, interpreting SQL queries and optimizing their execution plans for better performance. This layer abstracts much of the platform's complexity, allowing users to focus on their data and queries without managing the underlying infrastructure. NEW QUESTION # 648

Which of the following describes the Snowflake Cloud Services layer?

- A. Executes queries submitted by the Snowflake account users
- B. Manages quotas on the Snowflake account storage
- C. Manages the virtual warehouse cache to speed up queries
- D. Coordinates activities in the Snowflake account

Answer: D
