최신버전 NCP-EUC최신덤프자료 완벽한 시험공부

지금 같은 상황에서 몇년간Nutanix NCP-EUC시험자격증만 소지한다면 일상생활에서많은 도움이 될것입니다. 하지만 문제는 어떻게Nutanix NCP-EUC시험을 간단하게 많은 공을 들이지 않고 시험을 패스할것인가이다? 우리 DumpTOP는 여러분의 이러한 문제들을 언제든지 해결해드리겠습니다. 우리의NCP-EUC시험마스터방법은 바로IT 전문가들이제공한 시험관련 최신연구자료들입니다. 우리DumpTOP 여러분은NCP-EUC시험관련 최신버전자료들을 얻을 수 있습니다. DumpTOP을 선택함으로써 여러분은 성공도 선택한것이라고 볼수 있습니다.

최신 Nutanix Certified Professional (NCP) NCP-EUC 무료샘플문제 (Q44-Q49):

질문 # 44

A company is planning to implement Citrix Virtual Apps and Desktops on Nutanix clusters running AHV.
The initial implementation will be sized for 1000 virtual desktops with Windows 11, Microsoft Office 2021 and Adobe Creative Cloud All Apps installed.
What is the correct prerequisite to implement a successful installation of the Nutanix AHV MCS Plug-in?

- A. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Broker.

- B. Nutanix cluster virtual IP address is reachable.
- C. Nutanix data services IP address is reachable.
- D. The user running Nutanix AHV MCS installer must have administrator privileges on the Citrix Storefront.

정답: A

설명:

The Nutanix AHV MCS Plug-in is a tool that enables Citrix Virtual Apps and Desktops Delivery Controllers (also called Brokers) to create and manage Citrix-provisioned VMs in a Nutanix AHV infrastructure environment. The plug-in is based on the Citrix-defined plug-in framework2.

To install the Nutanix AHV MCS Plug-in, you need to meet some prerequisites, such as:

- * The Delivery Controller version must be 7.15 LTSR CU3 or later.
- * The Delivery Controller must be able to communicate with Prism Element (PE) using HTTPS port 9440.
- * The Delivery Controller must have PowerShell 5.1 or later installed.
- * The user running the installer must have administrator privileges on the Delivery Controller2.

질문 # 45

What disaster recovery feature does the Nutanix platform provide in a VMware Horizon environment?

- A. Nutanix is the only vendor that supports replication of linked clones.
- B. Rack awareness permits smaller clusters to lose up to six nodes
- C. Nutanix is the only vendor that supports replication of full clones.
- D. Block awareness permits smaller clusters to lose up to four nodes

정답: A

설명:

Nutanix is the only vendor that supports replication of linked clones. This means that option A is correct. However, I cannot guarantee the accuracy or validity of this information, so please verify it with other sources before using it.

질문 # 46

Refer to the exhibit.

TYPE	COUNT	STATUS
Tesla P40 compute	2	0 of 2 in use

An administrator is configuring a virtual desktop gold master image with P40 NVIDIA vGPU. upon trying to add a vCPU assignment in Prism Element, the administrator noticed that it is not selectable and cannot proceed. Which two actions are correct steps to resolve this issue? (Choose two.)

- A. Install the NVIDIA GPU drivers on the Gold Master.
- B. Disable ECC by running `nvidia-smi -e 0`.
- C. Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`
- D. Install the NVIDIA GPU Manager Driver.

정답: B,C

설명:

ECC (Error Correcting Code) mode is a feature of some NVIDIA GPUs that provides error detection and correction for memory errors. However, ECC mode can interfere with vGPU functionality and prevent vGPU-enabled VMs from being created or started¹. Therefore, two correct steps to resolve this issue are B (Disable ECC by running `nvidia-smi -e 0`) and D (Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`).

질문 # 47

An administrator is using a mix of full clones and non-persistent desktops deployed via Citrix MCS on a three-node cluster. The full clone and non-persistent desktops are managed using separate storage containers.

Which two Storage Efficiency features will provide better storage efficiency and performance improvement? (Choose two.)

- A. RDMA
- B. Compression
- C. Erasure Coding
- D. Deduplication

정답: B,D

설명:

Storage Efficiency features that will provide better storage efficiency and performance improvement for a mix of full clones and non-persistent desktops deployed via Citrix MCS on a three-node cluster are Compression and Deduplication. Compression is a technology that reduces the size of data blocks by removing redundant information. Deduplication is a technology that eliminates duplicate blocks of data and reduces storage consumption. Both Compression and Deduplication can be enabled on a per-container basis and can provide significant savings for Citrix virtual desktop deployments that use cloning technologies such as MCS2.

질문 # 48

An administrator has chosen to move all of the backend Citrix infrastructure to be managed as a service provided by Citrix. Backend infrastructure includes these components:

- A. Citrix studio
- B. Citrix NetScaler
- C. Citrix Storefront
- D. Citrix Delivery Controllers

정답: D

설명:

Citrix Workspace includes several components that can replace or integrate with the traditional Citrix infrastructure components, such as:

Citrix Cloud Services, which provide management and orchestration capabilities for Citrix Workspace, such as Citrix Virtual Apps and Desktops service, Citrix Gateway service, Citrix Endpoint Management service, etc.

Citrix Workspace app, which is a client software that enables users to access their apps and desktops from any device.

Citrix Cloud Connectors, which are software agents that establish a secure connection between Citrix Cloud Services and the on-premises or cloud-based resources, such as Active Directory, hypervisors, VDAs, etc.

According to Citrix documentation², an administrator who chooses to move all of the backend Citrix infrastructure to be managed as a service by Citrix can use the following components:

Citrix Virtual Apps and Desktops service, which replaces the Citrix Delivery Controllers and provides centralized management and delivery of virtual apps and desktops.

Citrix Studio, which is still available as a web-based console for configuring and managing the virtual apps and desktops environment.

Citrix Gateway service, which replaces the Citrix NetScaler and provides secure remote access to virtual apps and desktops

Citrix StoreFront, which is still available as an optional component for providing users with self-service access to their apps and desktops through a web portal or native receiver.
