

Pass Guaranteed Quiz Unparalleled Fortinet - NSE5_FNC_AD-7.6 - New Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Exam Prep

We provide the best resources for the preparation of all the NSE5_FNC_AD-7.6 exams. We have curated guides for NSE5_FNC_AD-7.6 certifications. NSE5_FNC_AD-7.6 practice exam questions can be challenging and technical for sure. However, we have NSE5_FNC_AD-7.6 certified experts who curated the best study and practice materials for passing the NSE5_FNC_AD-7.6 exams with higher success rate. Our NSE5_FNC_AD-7.6 answers are verified and up to date products will help you prepare for the NSE5_FNC_AD-7.6 exams. All those professional who looking to find the best practice material for passing the NSE5_FNC_AD-7.6 exams should consider checking out our test products for better understanding.

Hence, memorizing them will help you get prepared for the Fortinet NSE5_FNC_AD-7.6 examination in a short time. The product of PassExamDumps comes in PDF, desktop practice exam software, and Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) web-based practice test. To give you a complete understanding of these formats, we have discussed their features below.

>> [New NSE5_FNC_AD-7.6 Exam Prep](#) <<

100% Pass Fortinet - NSE5_FNC_AD-7.6 –Valid New Exam Prep

In addition, a 24/7 customer assistance is also available at NSE5_FNC_AD-7.6 to assist you in using the product during any technical hitch. In summary, getting ready for 60 certification test might be challenging, but with the appropriate strategy and our NSE5_FNC_AD-7.6 Actual Exam questions, you can clear the test in a short time.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q40-Q45):

NEW QUESTION # 40

An administrator wants to use FortiNAC-F to prevent internal engineers from accessing specific websites as defined in web filter categories on FortiGate.

In addition to a security trigger and associated action, which configuration must also be defined on FortiNAC-F?

- A. A firewall policy
- **B. A user/host profile**
- C. A compliance policy
- D. A profiling method

Answer: B

Explanation:

To enforce restrictions based on web filter categories for internal engineers, FortiNAC-F must identify and group those users or their devices. A user/host profile defines the specific users or hosts (such as internal engineers) to which the security trigger and associated action will apply, enabling targeted enforcement.

NEW QUESTION # 41

Refer to the exhibit.

Network Access Policy configuration wizard

Create Network Access Policy

Name: Guests

Notes:

Configuration: Guest-VLAN

Enabled:

User/Host Profile: Guests

Conditions

Name: Guests

Who/What:

Attributes (Satisfy Any of the Following)

Where: Host Security Access Value Guest

OR Where: User Security Access Value Guest

RADIUS Attributes (Satisfy Any of the Following) ?

Groups:

Where: Any

When: Always

Notes:

When configuring guest access using a network access policy, where would an administrator configure the Guest-VLAN value?

- A. In the Model configuration
- B. In the User/Host profile
- C. In the Guest template
- D. In the Guest portal configuration

Answer: A

Explanation:

The Guest-VLAN value is defined within the switch Model configuration, where VLAN mappings and enforcement actions are configured. The network access policy references this configuration to apply the appropriate VLAN when the policy conditions are met.

NEW QUESTION # 42

Refer to the exhibits. What would happen if the highlighted port with connected hosts was placed in both the Forced Registration and Forced Remediation port groups?

Ports tab

Status	Device	Label	IP Address	Connection State	Default VLAN	Current VLAN	Admin Status	Operational Status
🟢	Building 1 Switch	IF#5	192.168.10.6	Not Connected			On	Link Up
🟢	Building 1 Switch	IF#6	192.168.10.6	Registered Host			On	Link Up
🟢	Building 1 Switch	IF#7	192.168.10.6	Not Connected			On	Link Up
🟢	Building 1 Switch	IF#8	192.168.10.6	Not Connected			On	Link Up
🟡	Building 1 Switch	IF#9	192.168.10.6	Not Connected			On	Link Down
🟡	Building 1 Switch	IF#10	192.168.10.6	Registered Host			On	Link Up
🟡	Building 1 Switch	IF#11	192.168.10.6	Not Connected			On	Link Down
🟡	Building 1 Switch	IF#12	192.168.10.6	Not Connected			On	Link Down
🟡	Building 1 Switch	IF#13	192.168.10.6	Multiple Hosts			On	Link Up
🟡	Building 1 Switch	IF#14	192.168.10.6	Not Connected			On	Link Down

Adapters tab

Status	Host Status	IP Address	Physical Address	All IPs	Connected Container	Rule Name	Media	Acc
🟢	+		00:06:D6:AC:7F:17		Wired Infrastructure	Lab Hosts		
🟢	-		00:11:2F:CB:61:52		Wired Infrastructure			

- A. Both types of enforcement would be applied
- B. Only the higher ranked enforcement group would be applied.
- C. Enforcement would be applied only to rogue hosts
- D. Multiple enforcement groups could not contain the same port.

Answer: B

Explanation:

In FortiNAC-F, Port Groups are used to apply specific enforcement behaviors to switch ports.

When a port is assigned to an enforcement group, such as Forced Registration or Forced Remediation, FortiNAC-F overrides normal policy logic to force all connected adapters into that specific state. The exhibit shows a port (IF#13) with "Multiple Hosts" connected, which is a common scenario in environments using unmanaged switches or hubs downstream from a managed switch port.

According to the FortiNAC-F Administrator Guide, it is possible for a single port to be a member of multiple port groups. However,

when those groups have conflicting enforcement actions--such as one group forcing a registration state and another forcing a remediation state--FortiNAC-F utilizes a ranking system to resolve the conflict. In the FortiNAC-F GUI under Network > Port Management > Port Groups, each group is assigned a rank. The system evaluates these ranks, and only the higher ranked enforcement group is applied to the port. If a port is in both a Forced Registration group and a Forced Remediation group, the group with the numerical priority (rank) will dictate the VLAN and access level assigned to all hosts on that port.

This mechanism ensures consistent behavior across the fabric. If the ranking determines that

"Forced Registration" is higher priority, then even a known host that is failing a compliance scan (which would normally trigger Remediation) will be held in the Registration VLAN because the port-level enforcement takes precedence based on its rank.

"A port can be a member of multiple groups. If more than one group has an enforcement assigned, the group with the highest rank (lowest numerical value) is used to determine the enforcement for the port. When a port is placed in a group with an enforcement, that enforcement is applied to all hosts connected to that port, regardless of the host's current state."

NEW QUESTION # 43

An administrator wants FortiNAC-F to pass firewall tags to FortiGate to leverage dynamic address groups used in firewall policies. On FortiNAC-F, what determines the values that are passed?

- A. RADIUS group attribute
- B. Model configuration
- C. Security rule
- D. Device profiling rule

Answer: C

Explanation:

The values of firewall tags sent from FortiNAC-F to FortiGate are defined within the security rule.

The security rule determines the action applied to a host or user, including which tags are assigned and passed to FortiGate for use in dynamic address groups and associated firewall policies.

NEW QUESTION # 44

Refer to the exhibit. What will happen to the host of a guest user created from this template if the time of connection is 8:00 PM?

- A. The host will be marked as at-risk.
- B. The host will be administratively disabled.
- C. The host will be marked as a rogue device.
- D. The host will be marked as non-authenticated.

Answer: D

Explanation:

In FortiNAC-F, the Guest & Contractor Template is a configuration object that defines the parameters for accounts created by sponsors or through self-registration. One of the critical security controls within this template is the Login Availability setting. This setting restricts the specific days and times during which a guest or contractor is permitted to authenticate and access the network. As shown in the exhibit, the "StandardGuest" template has Login Availability set to "Specify Time", with a schedule defined as Mon-Fri, 6:00 AM to 7:00 PM. If a guest user attempts to connect or authenticate at 8:00 PM, which is outside of the permitted window, FortiNAC-F's policy engine will automatically deny the authentication request. When an authentication attempt is denied due to schedule restrictions, the system does not move the host into the "Authenticated" or "Registered" state required for production access. Instead, the host is marked as non-authenticated in the adapter or host view.

NEW QUESTION # 45

.....

There are many ways to help you pass Fortinet certification NSE5_FNC_AD-7.6 exam and selecting a good pathway is a good protection. PassExamDumps can provide you a good training tool and high-quality reference information for you to participate in the Fortinet certification NSE5_FNC_AD-7.6 exam. PassExamDumps's practice questions and answers are based on the research of Fortinet certification NSE5_FNC_AD-7.6 examination Outline. Therefore, the high quality and high authoritative information provided by PassExamDumps can definitely do our best to help you pass Fortinet certification NSE5_FNC_AD-7.6 exam. PassExamDumps will continue to update the information about Fortinet certification NSE5_FNC_AD-7.6 exam to meet your need.

NSE5_FNC_AD-7.6 Latest Materials: https://www.passexamdumps.com/NSE5_FNC_AD-7.6-valid-exam-dumps.html

We can understand your apprehension before you buy it, but we want to tell you that you don't worry about it anymore, because we have provided a free trial, you can download a free trial version of the NSE5_FNC_AD-7.6 latest dumps from our website, there are many free services and training for you, Buy the NSE5_FNC_AD-7.6 test preparation material now and start your journey towards success in the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator (NSE5_FNC_AD-7.6) examination, It saves you're a lot of time as NSE5_FNC_AD-7.6 learning material are already given and prepared which are updated and verified by professionals.
