

# COF-C03 Exam Testking Exam Latest Release | Updated Snowflake COF-C03: SnowPro® Core Certification (COF-C03)

P.S. Free & New COF-C03 dumps are available on Google Drive shared by VCE4Plus: <https://drive.google.com/open?id=1-VL7FMS--mLbip3hPt9lbeqVY6ThK0UJ>

The chance of making your own mark is open, and only smart one can make it. We offer COF-C03 exam materials this time and support you with our high quality and accuracy COF-C03 learning quiz. Comparing with other exam candidates who still feel confused about the perfect materials, you have outreached them. So it is our sincere suggestion that you are supposed to get some high-rank practice materials like our COF-C03 Study Guide.

Our COF-C03 learning guide is very efficient tool in the world. As is known to us, in our modern world, everyone is looking for to do things faster, better, smarter, so it is no wonder that productivity hacks are incredibly popular. So we must be aware of the importance of the study tool. In order to promote the learning efficiency of our customers, our COF-C03 Training Materials were designed by a lot of experts from our company. Our COF-C03 study materials will be very useful for all people to improve their learning efficiency.

## COF-C03 Pass4sure | COF-C03 Certification Dumps

In the process of preparing the passing test, our COF-C03 guide materials and service will give you the oriented assistance. We can save your time and energy to arrange time schedule, search relevant books and document, ask the authorized person. As our COF-C03 study materials are surely valid and high-efficiency, you should select us if you really want to pass exam one-shot. With so many advantages of our COF-C03 training engine to help you enhance your strength, you will pass the exam by your first attempt!

## Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q479-Q484):

### NEW QUESTION # 479

How can a Snowsight user change a Standard virtual warehouse to a Snowpark-optimized virtual warehouse?

- A. Use the ALTER warehouse command on a suspended Standard virtual warehouse.
- B. Use the alter warehouse command on an active Snowpark-optimized warehouse.
- C. Use the ALTER WAREHOUSE command on a suspended Snowpark-optimized warehouse.
- D. Use the ALTER WAREHOUSE command on an active Standard virtual warehouse

**Answer: A**

Explanation:

To change a Standard virtual warehouse to a Snowpark-optimized virtual warehouse, the warehouse must be in a suspended state. This ensures that no operations are disrupted during the modification process.

Suspend the Warehouse: Ensure that the warehouse is suspended.

```
ALTER WAREHOUSE my_warehouse SUSPEND;
```

Alter the Warehouse: Modify the warehouse to be Snowpark-optimized.

```
ALTER WAREHOUSE my_warehouse SET WAREHOUSE_TYPE = 'SNOWPARK-OPTIMIZED';
```

Resume the Warehouse: Resume the warehouse to make it operational.

```
ALTER WAREHOUSE my_warehouse RESUME;
```

References:

Snowflake Documentation: Creating Snowpark-Optimized Warehouses

Snowflake Documentation: ALTER WAREHOUSE

### NEW QUESTION # 480

What does Snowflake recommend as a best practice for using secure views?

- A. Use secure views solely for query convenience.
- B. Use sequence-generated values
- **C. Do not expose the sequence-generated column(s)**
- D. Programmatically reveal the identifiers.

**Answer: C**

Explanation:

Snowflake recommends not exposing sequence-generated columns in secure views. Secure views are used to protect sensitive data by ensuring that users can only access data for which they have permissions. Exposing sequence-generated columns can potentially reveal information about the underlying data structure or the number of rows, which might be sensitive.

Create Secure Views: Define secure views using the SECURE keyword to ensure they comply with Snowflake's security policies.

Exclude Sensitive Columns: When creating secure views, exclude columns that might expose sensitive information, such as sequence-generated columns.

```
CREATE SECURE VIEW secure_view AS
```

```
SELECT col1, col2
```

```
FROM sensitive_table
```

```
WHERE sensitive_column IS NOT NULL;
```

References:

Snowflake Documentation: Secure Views

Snowflake Documentation: Creating Secure Views

These answers and explanations should provide comprehensive guidance on the specified Snowflake topics.

### NEW QUESTION # 481

Which of the following indicates that it may be appropriate to use a clustering key for a table? (Select TWO).

- A. DML statements that are being issued against the table are blocked
- **B. The clustering depth for the table is large**
- C. The table contains a column that has very low cardinality
- D. The table has a small number of micro-partitions
- **E. Queries on the table are running slower than expected**

**Answer: B,E**

Explanation:

A clustering key in Snowflake is used to co-locate similar data within the same micro-partitions to improve query performance, especially for large tables where data is not naturally ordered or has become fragmented due to extensive DML operations. The appropriate use of a clustering key can lead to improved scan efficiency and better column compression, resulting in faster query execution times.

The indicators that it may be appropriate to use a clustering key for a table include:

D. Queries on the table are running slower than expected: This can happen when the data in the table is not well-clustered, leading to inefficient scans during query execution.

E. The clustering depth for the table is large: A large clustering depth indicates that the table's data is spread across many micro-

partitions, which can degrade query performance as more data needs to be scanned.

#### NEW QUESTION # 482

While working with unstructured data, which file function generates a Snowflake-hosted file URL to a staged file using the stage name and relative file path as inputs?

- A. GET\_PREIGNED\_URL
- B. BUILD\_STAGE\_FILE\_URL
- C. GET\_ABSOLUTE\_PATH
- D. BUILD\_SCOPED\_FILE\_URL

**Answer: B**

Explanation:

The BUILD\_STAGE\_FILE\_URL function generates a Snowflake-hosted file URL to a staged file using the stage name and relative file path as inputs.

#### NEW QUESTION # 483

What are the benefits of the replication feature in Snowflake? (Select TWO).

- A. Database failover and fallback
- B. Fail-safe
- C. Data security
- D. Time Travel
- E. Disaster recovery

**Answer: A,E**

Explanation:

The replication feature in Snowflake provides several benefits, with disaster recovery and database failover and fallback being two of the primary advantages. Replication allows for the continuous copying of data from one Snowflake account to another, ensuring that a secondary copy of the data is available in case of outages or disasters. This capability supports disaster recovery strategies by allowing operations to quickly switch to the replicated data in a different account or region. Additionally, it facilitates database failover and fallback procedures, ensuring business continuity and minimizing downtime.
