SAP C_THR92_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	• Tile-Based Dashboard Framework: This domain targets a Dashboard Designer and covers building and managing tile-based dashboards. It encompasses creating tiles, assigning access, applying filters on dashboard data, and sharing dashboards to provide users with interactive and visually engaging insights.
Topic 2	• Provisioning Settings for Reporting: This area focuses on the abilities of a System Administrator and involves configuring and enabling the necessary settings in Provisioning to support reporting tools within SAP SuccessFactors. It includes setup tasks that ensure reporting solutions function properly within the system environment.
Topic 3	• Story Reports: This section of the exam measures skills of a Report Creator and covers the creation and management of Story Reports within SAP SuccessFactors. It emphasizes designing queries, configuring pages with widgets, and managing report permissions to generate insightful visualizations.
Topic 4	• Table Reports: This part measures the skills of a Data Analyst and involves creating, managing, and running Table Reports. It focuses on designing tabular data presentations that facilitate straightforward access to detailed workforce analytics information.
Topic 5	• Detailed Reporting Tool with Live Data: This section assesses the skills of an Advanced Report Developer and involves working with detailed reports that use live data feeds. It includes building customizable queries and using reporting tools to deliver real-time, actionable data to stakeholders.
Topic 6	• Canvas Reports and Page Designer: This part measures the capabilities of a Report Administrator and involves creating and customizing reports using Canvas Reports and Page Designer. It covers advanced query construction, formatting, pivot creation, and report distribution to enhance data presentation and usability.
Topic 7	• Report Consumers: This domain evaluates the understanding of a Business User and focuses on how report consumers interact with and utilize generated reports. It highlights user roles, permissions, and effective report sharing practices to ensure reports serve decision-making needs.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q47-Q52):

NEW QUESTION # 47
Why would you export report definitions? Note: There are 2 correct answers to this question.

- A. To support report version control
- B. To move reports between company instances
- C. To distribute reports to report consumers
- D. To schedule reports for offline execution

Answer: A,B

Explanation:
* Move Reports Between Instances (A):
* Exporting report definitions allows administrators to transfer reports from a test instance to a production instance.
* Support Version Control (C):
* Exporting reports provides a way to maintain and track different versions of report definitions for auditing and updates.

NEW QUESTION # 48
User A schedules a report in Report Center Scheduler What can user A achieve by enabling the Job Completion notification option for a scheduled job in the Report Center Scheduler?

- A. A notification appears for user A on the home page after the report distribution process is complete.
- B. An e-mail is sent to user A after the report distribution process is complete.
- C. A notification appears for the recipient of the report on the home page after the report distribution process is complete.
- D. An e-mail is sent to the recipient of the report that the report distribution process is complete.

Answer: B

Explanation:
* Job Completion Notification:
* When the Job Completion Notification is enabled for a scheduled job, the scheduling user (User A) receives an email notification once the report distribution process is complete.

NEW QUESTION # 49
What happens when you enable inline translation of a Story as it relates to future edits of the Story report?
Note: There are 2 correct answers to this question.

- A. The report can be edited in any language.
- B. The report can be edited only in the source language.
- C. The source language is set to the current locale of the individual who enabled translation.
- D. The source language is chosen from enabled locales on the instance when enabling translation.

Answer: B,D

Explanation:
* Inline Translation OverviewInline translation in SAP SuccessFactors Stories allows users to translate report text and components into multiple languages. This feature is particularly useful in multi-locale environments to ensure users view reports in their preferred language.
* Source Language Setting
* When inline translation is enabled, the source language is selected from the list of locales enabled on the instance. This ensures that translation aligns with existing localization settings.
* The report can only be edited in the source language to maintain consistency across translations.
* Explanation of Correct Answers
* Option A: Correct, as the source language must be chosen from the available locales when inline translation is activated.
* Option B: Correct, as any edits to the report must be made in the source language to avoid inconsistencies.
* Explanation of Incorrect Options
* Option C: Incorrect, because the source language is not dynamically set to the current locale of the individual enabling translation.
* Option D: Incorrect, because editing in any language is not allowed once inline translation is enabled-only the source language can be edited.

NEW QUESTION # 50
How do you give an analyst permission to build tiles?

- **A. Assign the role-based permission in the Manage Dashboards/Reports RBP Category.**
- B. Add the analyst to the role-based permission group Dashboard Administrators.
- C. Assign the role-based permission in the Analytics RBP Category.
- D. Assign the analyst as a dashboard administrator in Provisioning.

Answer: A

Explanation:
* Granting Tile Creation Permissions
* To enable an analyst to build tiles, you need to assign the appropriate Role-Based Permission (RBP) in the Manage Dashboards/Reports category.
* Why Other Options are Incorrect
* A. Analytics RBP Category: This does not provide permissions specific to tiles.
* B. Dashboard administrator in Provisioning: Provisioning is not required for this task.
* C. Dashboard Administrators Group: Adding to this group is not sufficient for tile creation.
