But we have successfully done that. Our AD0-E911 practice materials are really reliable. In a word, our AD0-E911 Exam Questions have built good reputation in the market. We sincerely hope that you can try our AD0-E911 learning quiz. You will surely benefit from your correct choice.

## Adobe Workfront Project Manager Certified Professional Sample Questions (Q89-Q94):

### NEW QUESTION # 89

Which date type on tasks can a project manager manually modify?

- **A. Planned**

- B. Estimated
- C. Projected

**Answer: A**

Explanation:

In Adobe Workfront, Planned Dates are the dates that project managers can manually modify. These dates represent the schedule that the project is expected to follow and can be adjusted based on project needs. Estimated and Projected Dates are automatically calculated by the system based on task progress and dependencies, and these cannot be manually modified directly by a project manager. The Projected date is influenced by changes in the actual completion rate of tasks, whereas the Planned Date is the baseline schedule.

#### NEW QUESTION # 90

Which wildcard should be used on a project report when filtering for projects that have a planned completion date greater than 1 month from the current date?

- A. TODAY + 1m
- **B. CURRENTDATE + 4w**
- C. TODAY + 1bm

**Answer: B**

Explanation:

In Adobe Workfront, the correct wildcard to filter for a project completion date greater than 1 month from the current date is CURRENTDATE + 4w. This wildcard ensures that the filter captures projects scheduled to be completed more than four weeks (or one month) from the current day. Workfront uses such wildcards for dynamic date filtering in reports.

#### NEW QUESTION # 91

What are two ways to associate milestone steps to tasks? (Choose two.)

- A. In the settings area of a task
- **B. From the Milestone View in the Projects area**
- **C. In-line editing a task list on a project**
- D. Through bulk-editing multiple tasks

**Answer: B,C**

Explanation:

Milestones in Adobe Workfront allow project managers to mark significant phases in a project. There are two primary methods for associating milestone steps to tasks:

In-line editing a task list on a project: This method allows you to quickly assign milestones while editing the task list. It's a convenient option when working directly within a project's task list, ensuring you can associate tasks with milestone steps in a streamlined way without navigating away from the list view.

From the Milestone View in the Projects area: The Milestone View is specifically designed to help manage milestones. It allows you to view and organize milestones and their associated tasks in one place, making it easy to connect tasks to milestones without manually editing individual tasks.

These methods are integral for tracking progress and ensuring that tasks align with the significant steps of a project.

#### NEW QUESTION # 92

Which two options are available with Workfront reports? (Choose two.)

- A. An object name with more than 500 characters
- B. A chart report that references a multi-select custom field
- **C. Planned date-based calendar reports**
- **D. Filters with a custom grouping**

**Answer: C,D**

Explanation:

In Adobe Workfront, Planned date-based calendar reports are commonly used to visualize project timelines, milestones, and deadlines. They help teams plan and manage workloads based on dates and other time-related factors.

Filters with custom grouping allow users to customize their reports by organizing data in a meaningful way, tailored to specific project or team requirements. Custom groupings enhance the clarity of reports by categorizing data based on selected criteria.

The other options are not correct because Workfront does not support reports that reference multi-select custom fields in a chart format, nor does it allow object names longer than 500 characters.

### NEW QUESTION # 93

Which wildcard should be used in a task report when using an Assigned To filter to show the logged-in user all tasks to which she is assigned as the primary task owner?

- A. USER.NAME
- **B. USER.ID**
- C. USER.roleID

**Answer: B**

Explanation:

To create a task report that shows the logged-in user all tasks they are assigned to as the primary task owner, USER.ID is the correct wildcard. USER.ID dynamically filters tasks based on the unique identification of the logged-in user, ensuring that only tasks assigned to them are displayed. USER.NAME would not uniquely identify the logged-in user, and USER.roleID is related to roles rather than task assignments.

### NEW QUESTION # 94

.....

Before clients buy our AD0-E911 questions torrent they can download them and try out them freely. The pages of our product provide the demo and the aim is to let the client know part of our titles before their purchase and what form our AD0-E911 guide torrent is. The pages introduce the quantity of our questions and answers of our AD0-E911 Guide Torrent. After you try out the free demo you could decide whether our AD0-E911 exam torrent is worthy to buy or not. So you needn't worry that you will waste your money or our AD0-E911 exam torrent is useless and boosts no values.
