

F5 F5CAB4 Dumps - Hassle-Free Accomplishment

What's more, part of that DumpsValid F5CAB4 dumps now are free: <https://drive.google.com/open?id=1CWS8wfmOfQ5rZlu5vO5Ds0pp821hGzd>

Our top priority is to help every customer in cracking the BIG-IP Administration Control Plane Administration (F5CAB4) test. Therefore, we have created these formats so that every applicant can prepare successfully for the BIG-IP Administration Control Plane Administration (F5CAB4) exam on the first attempt. We are aware that the cost for the registration of the F5 F5CAB4 examination is not what everyone can pay. After paying the hefty BIG-IP Administration Control Plane Administration (F5CAB4) test registration fee, applicants usually run on a tight budget. This is why DumpsValid provides you with the BIG-IP Administration Control Plane Administration (F5CAB4) real questions with up to 1 year of free updates.

F5 F5CAB4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Given a scenario, interpret Service status: This section teaches interpreting service states, analyzing netstat output, and determining whether services are listening on specific ports.
Topic 2	<ul style="list-style-type: none"> Explain authentication methods: This section focuses on user management including creating modifying users, configuring remote authentication providers, and implementing group-based access control.
Topic 3	<ul style="list-style-type: none"> Given a scenario, determine device upgrade eligibility: This domain covers determining appropriate timing for software and platform upgrades and strategies to minimize downtime during upgrades.

Topic 4	<ul style="list-style-type: none"> • List which log files could be used to find events and • or hardware issues: This section teaches identification of key log files (• var • log • /etc, secure, audit), understanding event severity levels, and interpreting log messages.
Topic 5	<ul style="list-style-type: none"> • Identify configured system services: This domain covers verifying proper configuration of essential services including DNS, NTP, SNMP, and syslog.
Topic 6	<ul style="list-style-type: none"> • Apply procedural concepts required to manage the state of a high availability pair: This domain covers controlling and monitoring failover states in high availability pairs, including forcing standby • offline modes, reporting failover status, and verifying device trust.
Topic 7	<ul style="list-style-type: none"> • Identify management connectivity configurations: This section focuses on understanding management access configurations, including management IP addresses, port lockdown settings, remote connectivity verification, and troubleshooting access issues.

Valid Exam F5CAB4 Blueprint - Free PDF Quiz F5CAB4 - BIG-IP Administration Control Plane Administration –First-grade Reliable Study Notes

There are many certificates for you to get but which kind of certificate is most authorized, efficient and useful? We recommend you the F5CAB4 certificate because it can prove that you are competent in some area and boost outstanding abilities. If you buy our F5CAB4 Study Materials you will pass the test smoothly and easily. On one hand, you can study the most professional and specialized knowledge in this field. On the other hand, you can gain the F5CAB4 certification.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q56-Q61):

NEW QUESTION # 56

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will be undone when Auto-Sync propagates the config to the HA pair.
- B. The change will be propagated next time a configuration change is made on the Active device.
- C. The change will take effect when Auto-Sync propagates the config to the HA pair.
- D. The change will be undone next time a configuration change is made on the Active device.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: TMOS Device Service Clustering (DSC) allows for configuration changes to be made on any device within a synchronization group. If Auto-Sync is enabled, the Control Plane detects the change on the Standby unit and automatically propagates (pushes) that updated configuration to the other members of the HA pair

NEW QUESTION # 57

As an organization grows, more people have to log into the BIG-IP. Instead of adding more local users, the BIG-IP Administrator is asked to configure remote authentication against a central authentication server.

Which two types of remote server can be used here? (Choose two answers)

- A. SAML

- B. OAUTH
- C. RADIUS
- D. LDAP

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

BIG-IP supports remote authentication by integrating with centralized authentication services through its AAA framework. The supported and commonly used remote authentication servers include:

LDAP (A)

Used to authenticate users against directory services such as Active Directory or other LDAP-compliant directories.

RADIUS (C)

Commonly used for centralized authentication, authorization, and accounting, especially in network and security environments.

Why the other options are incorrect:

OAUTH (B) is an authorization framework, not supported as a direct administrative authentication backend for BIG-IP management access.

SAML (D) is primarily used for single sign-on (SSO) in application authentication scenarios, not for BIG-IP administrative login authentication.

Thus, the correct remote authentication server types are LDAP and RADIUS.

NEW QUESTION # 58

A BIG-IP Administrator makes a configuration change to a Virtual Server on the Standby device of an HA pair. The HA pair is currently configured with Auto-Sync Enabled. What effect will the change have on the HA pair configuration?

- A. The change will be undone when Auto-Sync propagates the config to the HA pair.
- B. The change will be propagated next time a configuration change is made on the Active device.
- C. The change will take effect when Auto-Sync propagates the config to the HA pair.
- D. The change will be undone next time a configuration change is made on the Active device.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: TMOS Device Service Clustering (DSC) allows for configuration changes to be made on any device within a synchronization group. If Auto-Sync is enabled, the Control Plane detects the change on the Standby unit and automatically propagates (pushes) that updated configuration to the other members of the HA pair

NEW QUESTION # 59

Administrative user accounts have been defined on the remote LDAP server and are unable to log in to the BIG-IP device. Which log file should the BIG-IP Administrator check to find the related messages? (Choose one answer)

- A. /var/log/messages
- B. /var/log/secure
- C. /var/log/ltn
- D. /var/log/user.log

Answer: B

Explanation:

When BIG-IP is configured to use remote authentication (such as LDAP), all authentication and authorization attempts-including successes and failures-are logged to /var/log/secure.

For LDAP-based administrative login issues, /var/log/secure contains:

- * LDAP authentication failures
- * PAM authentication errors
- * Authorization and access-denied messages
- * Details explaining why a remote user could not log in

Why the other options are incorrect:

- * /var/log/user.log is not a standard BIG-IP log file for authentication.

- * /var/log/lm logs traffic management events, not user authentication.
 - * /var/log/messages contains general system messages but not detailed authentication failure information.
- Therefore, the correct log file to troubleshoot LDAP administrative login failures is /var/log/secure.

NEW QUESTION # 60

New Syslog servers have been deployed in an organization. The BIG-IP Administrator must reconfigure the BIG-IP system to send log messages to these servers.

In which location in the Configuration Utility can the BIG-IP Administrator make the needed configuration changes to accomplish this? (Choose one answer)

- A. System > Configuration > Local Traffic
- **B. System > Logs > Configuration**
- C. System > Configuration > Device
- D. System > Logs > Audit

Answer: B

Explanation:

On a BIG-IP system, remote syslog server configuration is managed through the logging configuration framework. In the Configuration Utility, this is accessed via:

System > Logs > Configuration

This section allows the administrator to:

- * Define remote syslog destinations
 - * Configure log publishers
 - * Control which log types (system, audit, LTM, ASM, etc.) are forwarded to external syslog servers
- Why the other options are incorrect:

- * A. System > Configuration > Local Traffic Used for traffic management settings, not logging.
 - * C. System > Logs > Audit Displays audit log settings and content but does not configure remote syslog destinations.
 - * D. System > Configuration > Device Used for device-level settings such as hostname and platform configuration, not logging.
- Therefore, the correct location to reconfigure BIG-IP to send logs to new syslog servers is System > Logs > Configuration.

NEW QUESTION # 61

.....

Our F5CAB4 learning question can provide you with a comprehensive service beyond your imagination. F5CAB4 exam guide has a first-class service team to provide you with 24-hour efficient online services. Our team includes industry experts & professional personnel and after-sales service personnel, etc. Industry experts hired by F5CAB4 exam guide helps you to formulate a perfect learning system, and to predict the direction of the exam, and make your learning easy and efficient. Our staff can help you solve the problems that F5CAB4 Test Prep has in the process of installation and download. They can provide remote online help whenever you need. And after-sales service staff will help you to solve all the questions arising after you purchase F5CAB4 learning question, any time you have any questions you can send an e-mail to consult them. All the help provided by F5CAB4 test prep is free. It is our happiest thing to solve the problem for you. Please feel free to contact us if you have any problems.
