

INF-306 Prüfungsfragen Prüfungsvorbereitungen 2026: HTML5 Application Development - Zertifizierungsprüfung IT Specialist INF-306 in Deutsch Englisch pdf downloaden

Im 21. Jahrhundert, wo es viele Exzellente gibt, fehlen doch IT-Fachleute. Die Gesellschaft brauchen viele IT-Fachleute. IT-Zertifizierungsprüfung ist eine Methode, die Fähigkeit der IT-Leute zu prüfen. Aber es ist nicht so einfach, die IT Specialist INF-306 IT-Zertifizierungsprüfung zu bestehen. Normalerweise werden die IT-Kandidaten an einem Kurs teilnehmen. Der Schulungskurs von ExamFragen ist von guter Qualität. Einen guten Kurs zu besuchen ist die Garantie für den Erfolg. Die Ähnlichkeit der Prüfungsunterlagen von ExamFragen beträgt 95%. Wenn Sie die Übungen von ExamFragen benutzen, können Sie 100% die IT Specialist INF-306 IT-Zertifizierungsprüfung nur einmal bestehen.

IT Specialist INF-306 Exam Syllabus Topics:

Section	Objectives
Layouts	- Responsive and Flexible Layouts 1. Construct responsive layouts 2. Use CSS Grid layouts 3. Manage content layout and positioning with CSS 4. Manage content overflow and flow behavior 5. Use CSS Flexbox
	- Canvas and SVG 1. Apply CSS filters to images 2. Apply transformations and styling to graphics 3. Use the canvas element to create graphics and animations 4. Create and display graphics using SVG
Graphics and Animation	

Forms	- HTML5 Forms and Validation • 1. Construct forms using HTML5 form elements • 2. Validate required fields and data types • 3. Configure input validation and regular expressions • 4. Use datalist, fieldset, meter, legend, and output elements
JavaScript Coding	- JavaScript ES6 Development • 1. Manage application state • 2. Perform data access using JavaScript • 3. Handle events using listeners and handlers • 4. Create and use custom classes • 5. Use JavaScript APIs
Application Lifecycle Management	- Application Development Lifecycle • 1. Describe planning, design, development, testing, deployment, and maintenance stages • 2. Use debugging tools and breakpoints • 3. Debug and test web applications • 4. Identify runtime and validation errors

>> INF-306 Prüfungsfragen <<

INF-306 Mit Hilfe von uns können Sie bedeutendes Zertifikat der INF-306 einfach erhalten!

Manchmal muss man mit große Menge von Prüfungsaufgaben üben, um eine wichtige Prüfung zu bestehen. Die IT Specialist INF-306 von uns hat diese Forderung gut erfüllt. Und mit den fachlichen Erklärungen können Sie besser die Antworten verstehen. Die Demo der IT Specialist INF-306 von unterschiedlichen Versionen werden von uns gratis angeboten. Probieren Sie mal und wählen Sie die geeignete Version für Sie! Mit unserer gemeinsamen Arbeit werden Sie bestimmt die IT Specialist INF-306 Prüfung erfolgreich bestehen!

IT Specialist HTML5 Application Development INF-306 Prüfungsfragen mit Lösungen (Q56-Q61):

56. Frage

Which two application features should you implement by using session storage? Choose 2.

- A. Passing data to a function within a program
- B. Saving customized UI/UX settings
- C. Saving temporary authentication tokens
- D. Passing form data to a confirmation page
- E. Saving game play status for future use

Antwort: C,D

Begründung:

The correct features are saving temporary authentication tokens and passing form data to a confirmation page. sessionStorage provides a storage area scoped to the current origin and browser tab, and its data is retained only for the duration of the page session. That makes it appropriate for short-lived application state that must survive page reloads or navigation within the same workflow, but should not remain permanently available after the session ends. Passing form data from an entry page to a confirmation page is a classic session-scoped use case because the data is needed briefly during a multi-page transaction. Temporary authentication tokens can also fit the session-storage model when the token should be tied to the active browser session rather than persisted across future visits. Customized UI/UX settings usually need to persist across sessions, so localStorage or server-side user preferences are more appropriate. Game progress saved for future use is also persistent state, not session-only state. Passing data to a function is ordinary JavaScript memory usage and does not require Web Storage. References/topics: application state management, Web Storage API, sessionStorage, temporary workflow data, session-scoped tokens.

57. Frage

You need to use CSS to create the layout shown:

#1

Mickey	Minnie	Luna	George
Bilbo	Bella	Madeline	Groucho

Review the layout shown on the left.

Complete the markup by selecting the correct option from each drop-down list.

Note: You will receive partial credit for each correct selection.

```

<head>
  <title>Team Building</title>
  <style>
    .grid-container {
      display: grid;
      display: block;
      display: flex;

      grid-template-columns: auto auto auto auto;
      grid-template-columns: auto auto;
      grid-template-rows: auto auto auto auto;

      grid-gap: 10px;
      grid-gap: 0px;
      padding: 20px;

      background-color: #336699;
      padding: 10px;
    }
    .grid-container > div {
      background-color: rgba(255, 255, 255, 0.9);
      text-align: center;
      padding: 20px;
      font-size: 16pt;
    }
  </style>
</head>

```

Antwort:

Begründung:

```

<head>
  <title>Team Building</title>
  <style>
    .grid-container {
      
      display: grid;
      display: block;
      display: flex;

      
      grid-template-columns: auto auto auto auto;
      grid-template-columns: auto auto;
      grid-template-rows: auto auto auto auto;

      
      grid-gap: 10px;
      grid-gap: 0px;
      padding: 20px;

      background-color: #336699;
      padding: 10px;
    }
    .grid-container > div {
      background-color: rgba(255, 255, 255, 0.9);
      text-align: center;
      padding: 20px;
      font-size: 16pt;
    }
  </style>
</head>

```

Explanation:

First blank: display: grid;

Second blank: grid-template-columns: auto auto auto auto;

Third blank: grid-gap: 10px;

The layout shown is a CSS Grid layout with eight items arranged into four equal-width columns and two rows. The first required declaration is display: grid;, which turns the .grid-container element into a grid container. The second declaration is grid-template-columns: auto auto auto auto;, which defines four columns, matching the four visible boxes in each row: Mickey, Minnie, Luna, and George on the first row, then Bilbo, Bella, Madeline, and Groucho on the second row. The third declaration is grid-gap: 10px;, which creates spacing between the grid cells, matching the visible blue gaps around each item. The background-color: #336699; creates the blue container background, while padding: 10px; adds space around the outer edge of the grid. The child rule .grid-container > div styles each grid item with a light background, centered text, padding, and larger font size.

Fundraising Campaign

59. Frage

Which two functions support 2D transformations in CSS3? Choose 2.

- A. move()
- B. skew()
- C. scroll()
- D. matrix()

Antwort: B,D

Begründung:

The correct transformation functions are `matrix()` and `skew()`. CSS transformations are applied with the `transform` property and accept transform functions that alter an element's rendered appearance in two- dimensional or three-dimensional space. MDN defines `< transform-function >` as a data type representing a transformation that can rotate, resize, distort, or move an element in 2D or 3D space. The `matrix()` function is valid because it defines a homogeneous two-dimensional transformation matrix, allowing translation, scaling, rotation, and skewing effects to be represented numerically in one function. The `skew()` function is also valid because it explicitly skews an element on the 2D plane. `scroll()` is not a CSS transform function; scrolling is handled through overflow behavior or scrolling APIs. `move()` is also not a valid CSS transform function; the standard transform function for movement is `translate()`. References/topics: CSS3 transforms, `transform` property, 2D transformation functions, `matrix()`, `skew()`.

60. Frage

A local photographer asks you to add filters as shown to the images in their photo gallery so that the images are not recognizable until authorized users log in.

Example of original and filtered images:

- * Original image: full-color flower image
- * Filtered image: blurred grayscale image

Analyze the images on the left.

Construct a CSS selector that will apply the appropriate filters to the images to meet the requirements.

Complete the markup by moving the appropriate HTML tags from the list on the left to the correct locations on the right. You may use each HTML tag once, more than once, or not at all.

Note: There is more than one correct markup. You will receive credit for any correct markup completion.

HTML Tags

grayscale(100%)

brightness(40%)

img

blur(8px)

opacity(50%)

filter:

filter

transform:

Answer Area
 (
 ;

)

Antwort:

Begründung:

HTML Tags

grayscale(100%)

brightness(40%)

img

blur(8px)

opacity(50%)

filter:

filter

transform:

Answer Area

img

 (

filter: grayscale(100%) blur(8px)

 ;

)

Explanation:

First blank: img

Second blank: filter:

Third blank: grayscale(100%)

Fourth blank: blur(8px)

The correct CSS selector is img because the requirement applies the visual effect to gallery images. The correct property is filter:, not transform, because CSS filters modify the rendered appearance of an element using image-processing effects such as blur, grayscale, opacity, brightness, contrast, and shadows. The filtered sample appears blurred and colorless, so the appropriate filter functions are grayscale(100%) and blur(8px). grayscale(100%) removes all color from the image, converting it to a black-and-white

rendering. blur(8px) obscures visual details, making the image difficult to recognize until the protected or authorized state changes the styling. The filter keyword without a colon is not a valid CSS declaration in this context. brightness(40%) and opacity(50%) could further obscure an image, but they are not required to reproduce the shown filtered result. The final declaration is therefore filter: grayscale(100%) blur(8px);.

61. Frage

.....

Es ist unnötig für Sie, viel Zeit an einer INF-306 Zertifizierungsprüfung zu verwenden. Wenn Sie es schwierig für die Vorbereitung der IT Specialist INF-306 Prüfung finden und viel Zeit verschwenden müssen, sollen Sie am Besten ExamFragen INF-306 Dumps als Ihr Lerngerät benutzen, weil es kann viel Zeit für Sie sparen. Und es ist wichtiger, dass sie Ihnen versprechen, die IT Specialist INF-306 Prüfung zu bestehen. Und es gibt keine anderen Unterlagen in dem Markt. Sie können viele andere interessante Dinge machen, statt die IT Specialist INF-306 Prüfungen vorzubereiten. So, klicken Sie ExamFragen Webseite und Informieren Sie sich. Sie werden bereuen, diese Chance zu verlieren.
