Just choose the right BraindumpsIT Salesforce Certified Data Architect (Data-Architect) exam questions format and download it after paying an affordable BraindumpsIT Salesforce Certified Data Architect (Data-Architect) practice questions charge and start this journey. Best of luck in Salesforce Data-Architect exam and career!!!

## Salesforce Certified Data Architect Sample Questions (Q186-Q191):

### NEW QUESTION # 186

Northern Trail Outfitters (NTO) has a variety of customers that include householder, businesses, and individuals.

The following conditions exist within its system:

NTO has a total of five million customers.

Duplicate records exist, which is replicated across many systems, including Salesforce.

Given these conditions, there is a lack of consistent presentation and clear identification of a customer record.

Which three option should a data architect perform to resolve the issues with the customer data?

- A. Duplicate customer records across the system and provide a two-way sync of data between the systems.
- B. Create a customer master database external to Salesforce as a system of truth and sync the customer data with all systems.
- C. Create a unique global customer ID for each customer and store that in all system for referential identity.
- D. Use Salesforce CDC to sync customer data cross all systems to keep customer record in sync.
- E. Invest in data duplicate tool to de-dupe and merge duplicate records across all systems.

Answer: B,C,E

### NEW QUESTION # 187

Universal Containers (UC) is transitioning from Classic to Lightning Experience.

What does UC need to do to ensure users have access to its notices and attachments in Lightning Experience?

- A. Manually upload Attachments in Lightning Experience.
- B. Manually upload Notes in Lightning Experience.
- C. Add Notes and Attachments Related List to page Layout in Lightning Experience.
- **D. Migrate Notes and Attachment to Enhanced Notes and Files a migration tool**

**Answer: D**

Explanation:

The correct answer is C, migrate Notes and Attachment to Enhanced Notes and Files using a migration tool. Enhanced Notes and Files are the new features in Lightning Experience that replace the classic Notes and Attachments. They offer more functionality and security than the classic version. To access them in Lightning Experience, you need to migrate your existing Notes and Attachments using a migration tool provided by Salesforce. Adding Notes and Attachments Related List, manually uploading Notes or Attachments, or doing nothing are not valid solutions, as they will not enable you to use the enhanced features in Lightning Experience.

### NEW QUESTION # 188

Universal Containers (UC) has a Salesforce org with multiple automated processes defined for group membership processing. UC also has multiple admins on staff that perform manual adjustments to the role hierarchy. The automated tasks and manual tasks overlap daily, and UC is experiencing "lock errors" consistently.

What should a data architect recommend to mitigate these errors?

- A. Enable sharing recalculations.
- **B. Enable granular locking.**
- C. Remove SOQL statements from Apex Loops.
- D. Ask Salesforce support for additional CPU power.

**Answer: B**

Explanation:

Enabling granular locking (option A) is the best recommendation to mitigate these errors, as it allows finer control over how records are locked during automated or manual processes, and reduces the chances of lock contention or deadlock. Removing SOQL statements from Apex Loops (option B) is a good practice for improving performance and avoiding governor limits, but it does not directly address the lock errors issue. Enabling sharing recalculations (option C) is also not relevant for this issue, as it is used to update sharing rules and recalculate access for records. Asking Salesforce support for additional CPU power (option D) is also not a viable solution, as it does not solve the root cause of the lock errors.

### NEW QUESTION # 189

Universal Containers (UC) has deployed Salesforce to manage Marketing, Sales, and Support efforts in a multi-system ERP environment. After reaching the limits of native reports & dashboards, UC leadership is looking to understand what options can be used to provide more analytical insights. What two approaches should an architect recommend? Choose 2 answers

- **A. Wave Analytics**
- B. Setup Audit Trails
- **C. AppExchange Apps**
- D. Weekly Snapshots

**Answer: A,C**

### NEW QUESTION # 190

NTO has been using Salesforce for sales and service for 10 years. For the past 2 years, the marketing group has noticed a raise from 0 to 35 % in returned mail when sending mail using the contact information stored in Salesforce.

Which solution should the data architect use to reduce the amount of returned mails?

- A. Email all customer and asked them to verify their information and to call NTO if their address is incorrect.
- **B. Use a 3rd-party data source to update contact information in salesforce.**
- C. Have the sales team to call all existing customers and ask to verify the contact details.
- D. Delete contacts when the mail is returned to save postal cost to NTO.

**Answer: B**

Explanation:

Using a third-party data source to update contact information in Salesforce is the best solution to reduce the amount of returned mails. This way, the data architect can ensure that the contact information is accurate and up-to-date without relying on manual verification or deletion of contacts

## NEW QUESTION # 191

.....

Our Data-Architect exam questions will be the easiest access to success without accident for you. Besides, we are punctually meeting commitments to offer help on Data-Architect study materials. So there is no doubt any information you provide will be treated as strictly serious and spare you from any loss of personal loss. There are so many success examples by choosing our Data-Architect Guide quiz, so we believe you can be one of them.
