

ISO-IEC-27001-Lead-Implementer Latest Guide Files - New ISO-IEC-27001-Lead-Implementer Test Materials

P.S. Free 2026 PECB ISO-IEC-27001-Lead-Implementer dumps are available on Google Drive shared by Fast2test:
<https://drive.google.com/open?id=1FVof2JxcK4ViyDYVy5N2m42ZaNz-OHWD>

We provide varied functions to help the learners learn our ISO-IEC-27001-Lead-Implementer study materials and prepare for the exam. The ISO-IEC-27001-Lead-Implementer self-learning and self-evaluation functions help the learners check their learning results and the statistics. The timing function of our ISO-IEC-27001-Lead-Implementer guide questions help them adjust their speeds to answer the questions and the function of stimulating the exam can help the learners adapt themselves to the atmosphere and pace of the exam. Thus the learners can master our ISO-IEC-27001-Lead-Implementer Practice Engine fast, conveniently and efficiently and pass the ISO-IEC-27001-Lead-Implementer easily.

Our PECB Certified ISO/IEC 27001 Lead Implementer Exam (ISO-IEC-27001-Lead-Implementer) exam dumps give help to give you an idea about the actual PECB Certified ISO/IEC 27001 Lead Implementer Exam (ISO-IEC-27001-Lead-Implementer) exam. You can attempt multiple PECB Certified ISO/IEC 27001 Lead Implementer Exam (ISO-IEC-27001-Lead-Implementer) exam questions on the software to improve your performance. You have the option to change the topic and set the time according to the actual PECB ISO-IEC-27001-Lead-Implementer Exam.

New PECB ISO-IEC-27001-Lead-Implementer Test Materials - ISO-IEC-27001-Lead-Implementer Exam Details

Many people often feel that their memory is poor, and what they have learned will soon be forgotten. In fact, this is because they did not find the right way to learn. PECB Certified ISO/IEC 27001 Lead Implementer Exam exam tests allow you to get rid of the troubles of reading textbooks in a rigid way, and help you to memorize important knowledge points as you practice. Industry experts hired by ISO-IEC-27001-Lead-Implementer Exam Question explain the hard-to-understand terms through examples, forms, etc. Even if you just entered the industry, you can easily understand their meaning. With ISO-IEC-27001-Lead-Implementer test guide, you will be as relaxed as you do normally exercise during the exam.

PECB Certified ISO/IEC 27001 Lead Implementer Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111

Scenario 3: Socket Inc is a telecommunications company offering mainly wireless products and services. It uses MongoDB, a document model database that offers high availability, scalability, and flexibility.

Last month, Socket Inc. reported an information security incident. A group of hackers compromised its MongoDB database, because the database administrators did not change its default settings, leaving it without a password and publicly accessible.

Fortunately, Socket Inc. performed regular information backups in their MongoDB database, so no information was lost during the incident. In addition, a syslog server allowed Socket Inc. to centralize all logs in one server. The company found out that no persistent backdoor was placed and that the attack was not initiated from an employee inside the company by reviewing the event

logs that record user faults and exceptions.

To prevent similar incidents in the future, Socket Inc. decided to use an access control system that grants access to authorized personnel only. The company also implemented a control in order to define and implement rules for the effective use of cryptography, including cryptographic key management, to protect the database from unauthorized access. The implementation was based on all relevant agreements, legislation, and regulations, and the information classification scheme. To improve security and reduce the administrative efforts, network segregation using VPNs was proposed.

Lastly, Socket Inc. implemented a new system to maintain, collect, and analyze information related to information security threats, and integrate information security into project management.

Based on the scenario above, answer the following question:

Which security control does NOT prevent information security incidents from recurring?

- A. Privileged access rights
- B. Segregation of networks
- C. Information backup

Answer: C

Explanation:

Information backup is a corrective control that aims to restore the information in case of data loss, corruption, or deletion. It does not prevent information security incidents from recurring, but rather mitigates their impact. The other options are preventive controls that reduce the likelihood of information security incidents by limiting the access to authorized personnel, segregating the networks, and using cryptography. These controls can help Socket Inc. avoid future attacks on its MongoDB database by addressing the vulnerabilities that were exploited by the hackers.

ISO 27001:2022 Annex A 8.13 - Information Backup¹

ISO 27001:2022 Annex A 8.1 - Access Control Policy²

ISO 27001:2022 Annex A 8.2 - User Access Management³

ISO 27001:2022 Annex A 8.3 - User Responsibilities⁴

ISO 27001:2022 Annex A 8.4 - System and Application Access Control

ISO 27001:2022 Annex A 8.5 - Cryptography

ISO 27001:2022 Annex A 8.6 - Network Security Management

NEW QUESTION # 112

Scenario 1:

HealthGenic is a leading multi-specialty healthcare organization providing patients with comprehensive medical services in Toronto, Canada. The organization relies heavily on a web-based medical software platform to monitor patient health, schedule appointments, generate customized medical reports, securely store patient data, and facilitate seamless communication among various stakeholders, including patients, physicians, and medical laboratory staff.

As the organization expanded its services and demand grew, frequent and prolonged service interruptions became more common, causing significant disruptions to patient care and administrative processes. As such, HealthGenic initiated a comprehensive risk analysis to assess the severity of risks it faced.

When comparing the risk analysis results with its risk criteria to determine whether the risk and its significance were acceptable or tolerable, HealthGenic noticed a critical gap in its capacity planning and infrastructure resilience. Recognizing the urgency of this issue, HealthGenic reached out to the software development company responsible for its platform. Utilizing its expertise in healthcare technology, data management, and compliance regulations, the software development company successfully resolved the service interruptions.

However, HealthGenic also uncovered unauthorized changes to user access controls. Consequently, some medical reports were altered, resulting in incomplete and inaccurate medical records. The company swiftly acknowledged and corrected the unintentional changes to user access controls. When analyzing the root cause of these changes, HealthGenic identified a vulnerability related to the segregation of duties within the IT department, which allowed individuals with system administration access also to manage user access controls. Therefore, HealthGenic decided to prioritize controls related to organizational structure, including segregation of duties, job rotations, job descriptions, and approval processes.

In response to the consequences of the service interruptions, the software development company revamped its infrastructure by adopting a scalable architecture hosted on a cloud platform, enabling dynamic resource allocation based on demand. Rigorous load testing and performance optimization were conducted to identify and address potential bottlenecks, ensuring the system could handle increased user loads seamlessly. Additionally, the company promptly assessed the unauthorized access and data alterations.

To ensure that all employees, including interns, are aware of the importance of data security and the proper handling of patient information, HealthGenic included controls tailored to specifically address employee training, management reviews, and internal audits. Additionally, given the sensitivity of patient data, HealthGenic implemented strict confidentiality measures, including robust authentication methods, such as multi-factor authentication.

In response to the challenges faced by HealthGenic, the organization recognized the vital importance of ensuring a secure cloud computing environment. It initiated a comprehensive self-assessment specifically tailored to evaluate and enhance the security of its cloud infrastructure and practices.

According to scenario 1, what is the possible threat associated with the vulnerability discovered by HealthGenic when analyzing the root cause of unauthorized changes?

- A. Theft
- **B. Fraud**
- C. Lawsuit

Answer: B

NEW QUESTION # 113

Scenario 5: Evergreen

Evergreen is undergoing ISMS implementation. In their structure, there exists an Information Security Committee (ISC), which leads and governs security operations.

Can the information security committee at Evergreen take on the role of the emergency committee in the event of a major incident?

- A. No - no one should assume the role of the emergency committee to prevent the mismanagement of major incidents
- B. No - only the steering committee can assume the role of the emergency committee
- **C. Yes - can assume the role of the emergency committee in the event of a major incident**

Answer: C

NEW QUESTION # 114

You apply for a position in another company and get the job. Along with your contract, you are asked to sign a code of conduct. What is a code of conduct?

- A. A code of conduct is a standard part of a labor contract.
- B. A code of conduct specifies how employees are expected to conduct themselves and is the same for all companies.
- **C. A code of conduct differs from company to company and specifies, among other things, the rules of behavior with regard to the usage of information systems.**

Answer: C

NEW QUESTION # 115

Scenario 8: SunDee is an American biopharmaceutical company, headquartered in California, the US. It specializes in developing novel human therapeutics, with a focus on cardiovascular diseases, oncology, bone health, and inflammation. The company has had an information security management system (ISMS) based on SO/IEC 27001 in place for the past two years. However, it has not monitored or measured the performance and effectiveness of its ISMS and conducted management reviews regularly. Just before the recertification audit, the company decided to conduct an internal audit. It also asked most of their staff to compile the written individual reports of the past two years for their departments. This left the Production Department with less than the optimum workforce, which decreased the company's stock.

Tessa was SunDee's internal auditor. With multiple reports written by 50 different employees, the internal audit process took much longer than planned, was very inconsistent, and had no qualitative measures whatsoever. Tessa concluded that SunDee must evaluate the performance of the ISMS adequately. She defined SunDee's negligence of ISMS performance evaluation as a major nonconformity, so she wrote a nonconformity report including the description of the nonconformity, the audit findings, and recommendations. Additionally, Tessa created a new plan which would enable SunDee to resolve these issues and presented it to the top management. According to scenario 8, Tessa created a plan for ISMS monitoring and measurement and presented it to the top management. Is this acceptable?

- A. No, Tessa must implement all the improvements needed for issues found during the audit
- B. No, Tessa should only communicate the issues found to the top management
- **C. Yes, Tessa can advise the top management on improving the company's functions**

Answer: C

Explanation:

According to the ISO/IEC 27001 : 2022 Lead Implementer course, one of the roles and responsibilities of an internal auditor is to provide recommendations for improvement based on the audit findings¹. Therefore, Tessa can create a plan for ISMS monitoring and measurement and present it to the top management as a way of advising them on how to improve the company's functions. However, Tessa is not responsible for implementing the improvements or communicating the issues found to the top management. Those tasks belong to the process owners and the management representative, respectively².

NEW QUESTION # 116

.....

Many of our users have told us that they are really busy. Students have to take a lot of professional classes and office workers have their own jobs. They can only learn our ISO-IEC-27001-Lead-Implementer exam questions in some fragmented time. And our ISO-IEC-27001-Lead-Implementer training guide can meet your requirements. For there are three versions of ISO-IEC-27001-Lead-Implementer learning materials and are not limited by the device. They are the versions of PDF, Software and APP online.

New ISO-IEC-27001-Lead-Implementer Test Materials: <https://www.fast2test.com/ISO-IEC-27001-Lead-Implementer-premium-file.html>

New ISO-IEC-27001-Lead-Implementer Test Materials - PECB Certified ISO/IEC 27001 Lead Implementer Exam real braindumps mirror the latest technology, And our ISO-IEC-27001-Lead-Implementer learning prep can suit you most in this need for you will get the according certification as well as the latest information, And then you can start your study after downloading the ISO-IEC-27001-Lead-Implementer exam questions in the email attachments, After you bought ISO-IEC-27001-Lead-Implementer exam dumps, you will enjoy 365-days free update.

Any form of marketing can reach potential customers, ISO-IEC-27001-Lead-Implementer An extremely dangerous privilege, PECB Certified ISO/IEC 27001 Lead Implementer Exam real braindumps mirror the latest technology, And our ISO-IEC-27001-Lead-Implementer learning prep can suit you most in this need for you will get the according certification as well as the latest information.

Free PDF Quiz 2026 Latest PECB ISO-IEC-27001-Lead-Implementer Latest Guide Files

And then you can start your study after downloading the ISO-IEC-27001-Lead-Implementer exam questions in the email attachments, After you bought ISO-IEC-27001-Lead-Implementer exam dumps, you will enjoy 365-days free update.

You can check for free demos to see if our exam questions contain what you need for the ISO-IEC-27001-Lead-Implementer exam, and you can view other exam applicants' experiences by using our exam materials.
