With the development of the electronic equipment, there are a lot of changes in the designs of our OGEA-101 pass-sure torrent. The most impressive version is the APP online version. Normally, it can be used on all kinds of digital devices. But it also has the special advantage that the online version can be used when you are not online, As long as you use it for the first time in a networked environment, you can use the online version of our OGEA-101 learning guide from anywhere without network connection. I believe the online version of our OGEA-101 exam questions will be a good choice for you

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our OGEA-101 real exam. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of OGEA-101 Study Materials. The quality of our OGEA-101 practice dumps deserves your trust.our products have built good reputation in the market. We sincerely hope that you can try our OGEA-101 preparation guide.

>> **Reliable OGEA-101 Test Labs** <<

Free PDF 2026 Accurate OGEA-101: Reliable TOGAF Enterprise Architecture Part 1 Exam Test Labs

Our OGEA-101 study materials are regarded as the most excellent practice materials by authority. Our company is dedicated to researching, manufacturing, selling and service of the OGEA-101 study materials. Also, we have our own research center and experts team. So our products can quickly meet the new demands of customers. That is why our OGEA-101 Study Materials are

popular among candidates. We really take their requirements into account. Perhaps you know nothing about our OGEA-101 study materials. Our free demo will help you know our study materials comprehensively.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.
Topic 2	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.
Topic 3	<ul style="list-style-type: none"> Implementation Governance: This topic of The Open Group OGEA-101 Exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.
Topic 4	<ul style="list-style-type: none"> Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.
Topic 5	<ul style="list-style-type: none"> Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q145-Q150):

NEW QUESTION # 145

Consider the following ADM phases objectives.

	Objective
1	Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision.
2	Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals.
3	Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture.
4	Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns.

Which phase does each objective match?

- A. 1B-2D-3A-4C
- B. 1C-2D-3B-4A
- C. 1A-2B-3C-4D
- **D. 1C-2B-3A-4C**

Answer: D

Explanation:

* The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture.

* The ADM consists of nine phases, each with a specific purpose and output. The phases are:

oPreliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework,

principles, and governance.

oPhase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

oPhase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

oPhase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

oPhase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

oPhase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

oPhase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

oPhase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

oPhase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

* Based on the above definitions, we can match each objective with the corresponding phase as follows:

oObjective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture².

oObjective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture³.

oObjective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits⁴.

oObjective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C:

Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture².

Reference:

* 1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

* 2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures

* 3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture

* 4: The TOGAF Standard, Version 9.2, Chapter 7: Phase A: Architecture Vision

NEW QUESTION # 146

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

2) A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.

4) The scope and approach that will be used to complete an architecture development cycle.

Complete the sentence. Deliverable 2 is the ____, deliverable 4 is a deliverable from ____.

- A. Request for Architecture Work, Preliminary Phase
- **B. Architecture Requirements Specification, Phase A**
- C. Architecture Principles, Phase G
- D. Architecture Definition Document, Phase H

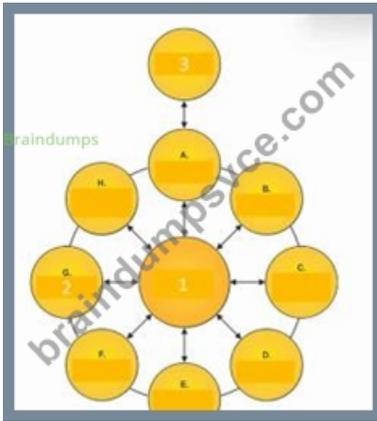

Answer: B

Explanation:

Architecture Requirements Specification: "provides a set of quantitative statements that outline what an implementation project must do in order to comply with the architecture." Open Group Publications Statement of Architecture Work (Phase A output): "The Statement of Architecture Work defines the scope and approach that will be used to complete an architecture project." (Produced in Phase A per the Phase A outputs list.) Open Group Publications References:- The Open Group White Paper, World-Class Enterprise Architecture: Framework Guidance and TOGAF 9 Example-Deliverables descriptions.- The Open Group, TOGAF 9 Conformance Requirements- Phase A outputs.

NEW QUESTION # 147

Refer to the exhibit.

Consider the illustration of an architecture development cycle.
 Select the correct phase names corresponding to the labels 1, 2 and 3?

- A. 1 Architecture Governance - 2 Implementation Governance - 3 Preliminary
- B. 1 Requirements Management - 2 Implementation Governance - 3 Preliminary
- C. 1 Requirements Management - 2 Change Management - 3 Strategy
- D. 1 Continuous Improvement - 2 Migration Planning - 3 Architecture Vision

Answer: C

NEW QUESTION # 148

Consider the following ADM phases objectives.

	Objective
1	Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision
2	Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals
3	Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture
4	Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns

Which phase does each objective match?

- A. 1B-2D-3A-4C
- B. 1C-2D-3B-4A
- C. 1A-2B-3C-4D
- D. 1C-2B-3A-4C

Answer: D

Explanation:

The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture.

The ADM consists of nine phases, each with a specific purpose and output. The phases are:

Phase 1: Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target

architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture².

Objective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture³.

Objective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits⁴.

Objective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C:

Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture².

Reference:

1: The TOGAF Standard, Version 9.2, Chapter 5: Architecture Development Method (ADM)

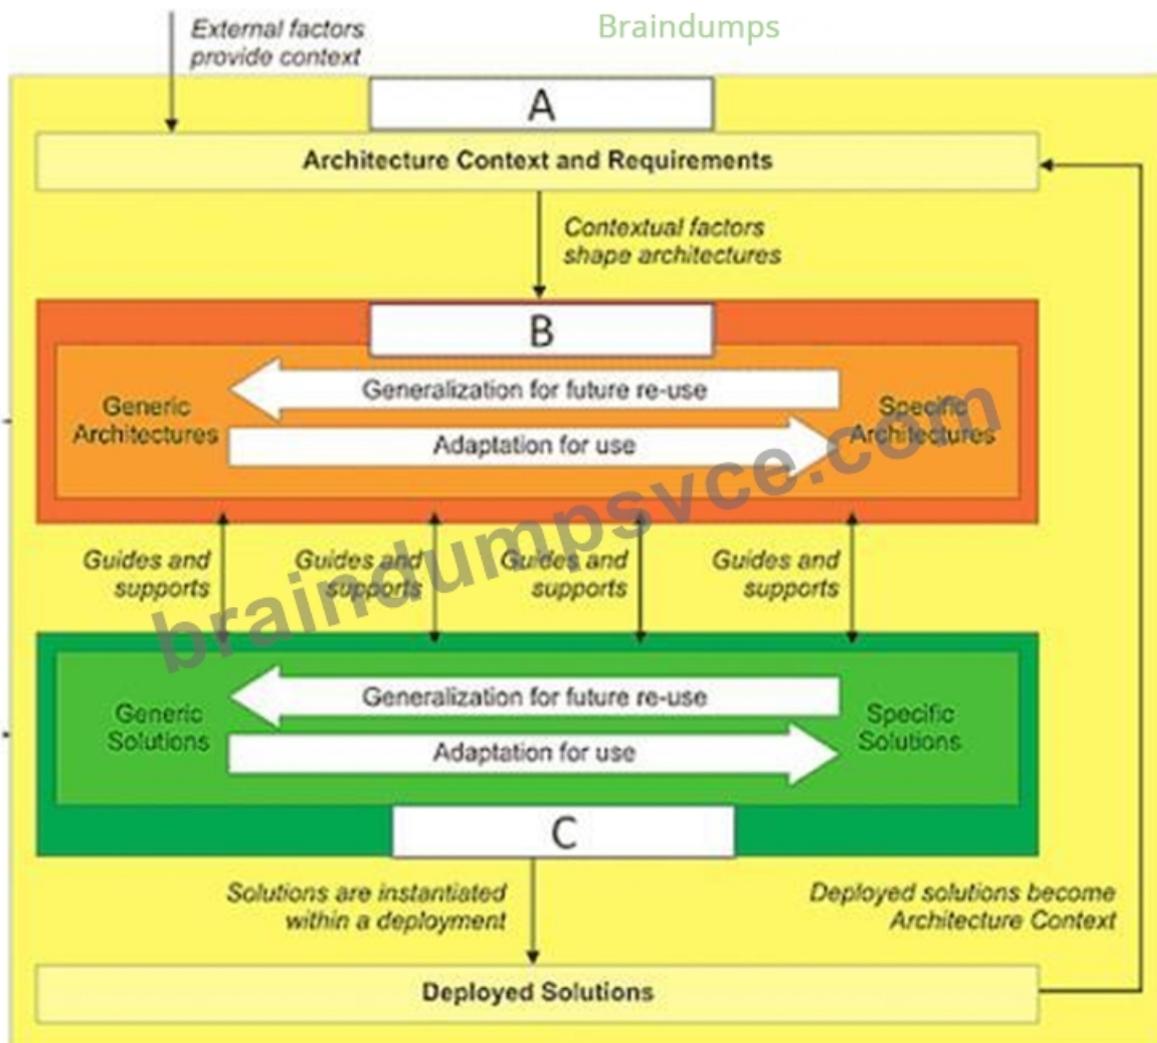

2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures

3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture

4: The TOGAF Standard, Version 9.2, Chapter 7: Phase A: Architecture Vision

NEW QUESTION # 149

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- B. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture
- C. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- **D. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**

Answer: D

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. References:

NEW QUESTION # 150

.....

The purchase process of our OGEEA-101 question torrent is very convenient for all people. In order to meet the needs of all customers, our company is willing to provide all customers with the convenient purchase way. If you buy our OGEEA-101 study tool successfully, you will have the right to download our OGEEA-101 exam torrent in several minutes, and then you just need to click on the link and log on to your website's forum, you can start to learn our OGEEA-101 question torrent. We believe the operation is very convenient for you, and you can operate it quickly. At the same time, we believe that the convenient purchase process will help you save much time.
