F5CAB1 study dumps have a pass rate of 98% to 100% because of the high test hit rate. So our exam materials are not only effective but also useful. If our candidates have other things, time is also very valuable. It is very difficult to take time out to review the F5CAB1 Exam. But if you use F5CAB1 exam materials, you will learn very little time and have a high pass rate. Our F5CAB1 study materials are worthy of your trust.

F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> BIG IP Administration Support and Troubleshooting: This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.
Topic 2	<ul style="list-style-type: none"> BIG IP Administration Install Initial Configuration and Upgrade: This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.
Topic 3	<ul style="list-style-type: none"> BIG IP Administration Data Plane Concepts: This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.
Topic 4	<ul style="list-style-type: none"> BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.

Topic 5	<ul style="list-style-type: none"> • BIG IP Administration Data Plane Configuration: This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.

F5CAB1 Test Questions: BIG-IP Administration Install, Initial Configuration, and Upgrade & F5CAB1 Actual Test & F5CAB1 Exam Simulation

The services provided by our F5CAB1 test questions are quite specific and comprehensive. First of all, our test material comes from many experts. The gold content of the materials is very high, and the updating speed is fast. By our F5CAB1 exam prep, you can find the most suitable information according to your own learning needs at any time, and make adjustments and perfect them at any time. Our F5CAB1 Learning Materials not only provide you with information, but also for you to develop the most suitable for your learning schedule, this is tailor-made for you, according to the timetable to study and review. I believe you can improve efficiency.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q18-Q23):

NEW QUESTION # 18

The BIG-IP Administrator received a ticket that an authorized user is attempting to connect to the Configuration Utility from a jump host and is being denied.

The HTTPD allow list is configured as:

```
sys httpd {
allow { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }
}
```

The jump host IP is 172.28.32.22.

What command should the BIG-IP Administrator use to allow HTTPD access for this jump host?

- A. `modify /sys httpd allow replace-all-with { 172.28.32.22 }`
- B. `modify /sys httpd allow delete { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }`
- **C. `modify /sys httpd allow add { 172.28.32.22 }`**

Answer: C

Explanation:

The HTTPD allow list controls which IP addresses or subnets may access the Configuration Utility (TMUI) on the BIG-IP system. The Administrator already has two subnets allowed and needs to add a single host IP to the existing list.

The object `/sys httpd allow` supports actions such as `add`, `delete`, and `replace-all-with`.

Because the goal is to add one more entry without removing the existing permitted subnets, the correct command is:

```
modify /sys httpd allow add { 172.28.32.22 }
```

This appends the new host to the existing list while preserving the previously configured networks.

NEW QUESTION # 19

Refer to the exhibit.

What traffic will be permitted to reach the BIG-IP?

- A. FTP
- B. Telnet
- C. SSH

Answer: C

Explanation:

The exhibit shows the configuration of a Self IP with:

* Port Lockdown: Allow Custom

* A Custom List that includes the following TCP ports:

* 443

* 22

Meaning of these ports:

* TCP 443# HTTPS (TMUI - web-based management)

* TCP 22# SSH (command-line remote access)

No other TCP, UDP, or protocol entries are listed; therefore, only these two services are allowed to reach the BIG-IP via this Self IP.

Evaluating the answer choices:

Option

Service

Port

Allowed?

FTP

TCP 21

Not listed

#Not allowed

SSH

TCP 22

Listed

#Allowed

Telnet

TCP 23

Not listed

#Not allowed

Thus, SSH is the only traffic permitted through this Self IP configuration.

NEW QUESTION # 20

What is the primary function of the Traffic Management Operating System (TMOS) in F5 BIG-IP?

- A. It provides the hardware resources for the system
- B. It encrypts data between servers
- C. It allows for traffic routing between the Internet and data center
- **D. It is responsible for system management and operations**

Answer: D

Explanation:

TMOS is the core operating system that powers F5 BIG-IP, managing traffic, security, and system functions.

NEW QUESTION # 21

A BIG-IP Administrator needs to purchase new licenses for a BIG-IP appliance.

The administrator needs to know:

- * Whether a module is licensed
- * The memory requirement for that module

Where should the administrator view this information in the System menu?

- A. Configuration - OVSDB
- **B. Resource Provisioning**
- C. Software Management
- D. Configuration - Device

Answer: B

NEW QUESTION # 22

The BIG-IP Administrator received a ticket that an authorized user is attempting to connect to the Configuration Utility from a jump host and is being denied.

The HTTPD allow list is configured as:

```
sys httpd {
allow { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }
}
```

The jump host IP is 172.28.32.22.

What command should the BIG-IP Administrator use to allow HTTPD access for this jump host?

- A. `modify /sys httpd allow replace-all-with { 172.28.32.22 }`
- B. `modify /sys httpd allow delete { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }`
- **C. `modify /sys httpd allow add { 172.28.32.22 }`**

Answer: C

Explanation:

The HTTPD allow list controls which IP addresses or subnets may access the Configuration Utility (TMUI) on the BIG-IP system.

The Administrator already has two subnets allowed and needs to add a single host IP to the existing list.

* The object `/sys httpd` allows actions such as `add`, `delete`, and `replace-all-with`.

* Because the goal is to add one more entry without removing the existing permitted subnets, the correct command is:

```
modify /sys httpd allow add { 172.28.32.22 }
```

This appends the new host to the existing list while preserving the previously configured networks.

Why the other options are incorrect:

* Option A (`replace-all-with`) would overwrite the entire allow list, removing existing permitted subnets- unacceptable.

* Option B (`delete`) would remove the existing networks and not add the required host.

Therefore, the correct administrative action is to add the jump host's IP.

NEW QUESTION # 23

.....

For everyone, time is money and life. Are you still hesitant about selecting what kind of F5 CAB1 exam materials? We have a high reputation on the career to help our customers pass their exams and get their desired certifications. There is no exaggeration to say that you can pass the F5 CAB1 Exam with ease after studying with our F5 CAB1 practice guide for 20 to 30 hours. Numerous of the

candidates have been benefited from our exam torrent and they obtained the achievements just as they wanted.
