The counselor must breach confidentiality if there is a clear threat of violence to an identifiable person. Reference: Helwig, A. A. (2020). CPCE Study Guide and Review; American Counseling Association (ACA) Code of Ethics (2014).

Reliability in testing and assessment reflects

- A. whether a test measures what it claims to measure.
- B. homogeneity of the normative sample.
- **C. consistency of measurement.**

Reliability in testing refers to the consistency or stability of scores obtained by the same individuals when re-examined with the same test on different occasions, with equivalent forms of the test, or across different raters or scorers. In other words, a reliable test yields the same or very similar results under consistent conditions. Reliability does not address whether a test measures what it is supposed to measure (that is validity), but rather, it is about the dependability or repeatability of measurement.
