## Top Features of ValidDumps Snowflake ADA-C02 PDF Questions File and Practice Test Software

Free demo will be provided for ADA-C02 study materials, and you can know deeper what you will buy. We offer you free update for 365 days after you purchasing. And the latest version will be sent to your email address automatically. Therefore you can get the latest information of the ADA-C02 Exam Dumps. Besides, we have the technicians to examine the website at times, and it will provide you with a clean and safe shopping environment. You just need to buy ADA-C02 study materials with ease.

## Snowflake SnowPro Advanced Administrator ADA-C02 Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Which function is the role SECURITYADMIN responsible for that is not granted to role USERADMIN?

- A. Create new roles
- B. Create new users
- C. Manage system grants
- D. Reset a Snowflake user's password

**Answer: C**

Explanation:

The SECURITYADMIN role is responsible for managing system grants, such as granting or revoking privileges on roles, which is not permitted for the USERADMIN role.

### NEW QUESTION # 62

What are characteristics of data replication in Snowflake? (Choose three.)

- A. Users must be granted REPLICATIONADMIN privileges in order to enable replication.
- B. To start replication run the ALTER DATABASE ... REFRESH command on the account where the secondary database resides.
- C. The ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command must be issued from the primary account.
- D. Databases created from shares can be replicated.
- E. Users can have unlimited primary databases and they can be replicated to an unlimited number of accounts if all accounts are within the same organization.
- F. Replication can only occur within the same cloud provider.

**Answer: B,C,D**

Explanation:

Replication must be enabled on the primary account using ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS. To refresh replicated data, ALTER DATABASE ... REFRESH is executed on the secondary database. Databases created from shares can also be replicated.

### NEW QUESTION # 63

An Administrator has a warehouse which is intended to have a credit quota set for 3000 for each calendar year. The Administrator needs to create a resource monitor that will perform the following tasks:

At 80% usage notify the account Administrators.

At 100% usage suspend the warehouse and notify the account Administrators.

At 120% stop all running executions, suspend the warehouse, and notify the account Administrators.

Which SQL command will meet these requirements?

- A. create or replace resource monitor RM1 with credit\_quota=3000  
frequency = yearly  
start\_timestamp = '2022-01-01 00:00 CET'  
triggers on 80 percent do notify  
on 100 percent do suspend  
on 120 percent do suspend\_immediate;  
alter warehouse WH1 set resource\_monitor = RM1;
- B. create or replace resource monitor RM1 with credit\_quota=3000  
frequency = yearly  
triggers on 80 percent do notify  
on 100 percent do suspend  
on 120 percent do suspend\_immediate;  
alter warehouse WH1 set resource\_monitor = RM1;

- C. create or replace resource monitor RM1 with credit\_quota=3000  
start\_timestamp = '2022-01-01 00:00 CET'  
triggers on 80 percent do notify  
on 100 percent do suspend  
on 120 percent do suspend\_immediate;  
alter warehouse WH1 set resource\_monitor = RM1;
- D. create or replace resource monitor RM1 with credit\_quota=3000  
start\_timestamp = '2022-01-01 00:00 CET'  
triggers on 80 percent do notify  
on 100 percent do notify and suspend  
on 120 percent do notify and suspend\_immediate;  
alter warehouse WH1 set resource\_monitor = RM1;

**Answer: A**

Explanation:

The requirement is to enforce a yearly quota of 3000 credits with notifications and suspensions at 80%, 100%, and 120%. The correct command must include frequency = yearly, and specify triggers: notify at 80%, suspend (and notify) at 100%, and suspend immediate (and notify) at 120%.

#### NEW QUESTION # 64

What are characteristics of Dynamic Data Masking? (Choose two.)

- A. A single masking policy can be applied to columns with different data types.
- **B. A single masking policy can be applied to columns in different tables.**
- C. The role that creates the masking policy will always see unmasked data in query results.
- D. A masking policy can be applied to the VALUE column of an external table.
- **E. A masking policy that is currently set on a table can be dropped.**

**Answer: B,E**

Explanation:

A masking policy applied to a table or column can be dropped or replaced as needed. The same masking policy can be reused and applied to columns in different tables.

#### NEW QUESTION # 65

In which scenario will use of an external table simplify a data pipeline?

- A. When accessing a Snowflake table from a relational database
- B. When continuously writing data from a Snowflake table to external storage
- **C. When accessing a Snowflake table that references data files located in cloud storage**
- D. When accessing a Snowflake table from an external database within the same region

**Answer: C**

Explanation:

External tables in Snowflake are specifically designed to reference and query data files located in external cloud storage. This simplifies data pipelines by allowing direct SQL access to external data without the need for loading it into Snowflake.

#### NEW QUESTION # 66

.....

The price for ADA-C02 training materials are reasonable, and no matter you are an employee in the company or a student at school, you can afford it. Besides ADA-C02 exam materials are high quality and accuracy, therefore, you can pass the exam just one time. In order to strengthen your confidence for ADA-C02 Exam Braindumps, we are pass guarantee and money back guarantee. We will give you full refund if you fail to pass the exam. We offer you free update for one year for ADA-C02 training materials, and the update version will be sent to your email address automatically.
