Brain Dump CLF-C02 Free, Answers CLF-C02 Real Questions

Once you have practiced on our AWS Certified Cloud Practitioner test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There have a timer on the right of the interface. Once you begin to do the exercises of the CLF-C02 test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the CLF-C02 Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not. Then you can make your own learning plans based on the report of the CLF-C02 test guide. Also, you will do more practices that you are not good at until you completely have no problem.

Amazon AWS Certified Cloud Practitioner Sample Questions (Q71-Q76):

NEW QUESTION # 71

A company wants to migrate its workloads to AWS, but it lacks expertise in AWS Cloud computing. Which AWS service or feature will help the company with its migration?

- A. AWS Artifacts
- B. AWS Consulting Partners
- C. AWS Managed Services
- D. AWS Trusted Advisor

Answer: C

Explanation:

AWS Managed Services is a service that provides operational management for AWS infrastructure and applications. It helps users migrate their workloads to AWS and provides ongoing support, security, compliance, and automation. AWS Trusted Advisor is a service that provides best practices and recommendations for cost optimization, performance, security, and fault tolerance. AWS Consulting Partners are professional services firms that help customers design, architect, build, migrate, and manage their workloads and applications on AWS. AWS Artifacts is a service that provides on-demand access to AWS compliance reports and select online agreements.

NEW QUESTION # 72

Which AWS service or tool provides users with the ability to monitor AWS service quotas?

- A. AWS Cost and Usage Reports
- **B. AWS Trusted Advisor**
- C. AWS CloudTrail
- D. AWS Budgets

Answer: B

Explanation:

The correct answer is B because AWS Trusted Advisor is an AWS service or tool that provides users with the ability to monitor AWS service quotas. AWS Trusted Advisor is an online tool that provides users with real-time guidance to help them provision their resources following AWS best practices. One of the categories of checks that AWS Trusted Advisor performs is service limits, which monitors the usage of each AWS service and alerts users when they are close to reaching the default limit. The other options are incorrect because they are not AWS services or tools that provide users with the ability to monitor AWS service quotas.

AWS CloudTrail is a service that enables users to track user activity and API usage across their AWS account.

AWS Cost and Usage Reports is a tool that enables users to access comprehensive information about their AWS costs and usage.

AWS Budgets is a tool that enables users to plan their service usage, costs, and reservations. Reference: [AWS Trusted Advisor FAQs]

NEW QUESTION # 73

A company is developing an application that uses multiple AWS services. The application needs to use temporary, limited-privilege credentials for authentication with other AWS APIs.

Which AWS service or feature should the company use to meet these authentication requirements?

- **A. AWS Security Token Service (AWS STS)**
- B. Amazon API Gateway
- C. IAM users
- D. IAM instance profiles

Answer: A

Explanation:

Explanation

AWS Security Token Service (AWS STS) is a service that enables applications to request temporary, limited-privilege credentials for authentication with other AWS APIs. AWS STS can be used to grant access to AWS resources to users who are federated (using IAM roles), switched (using IAM users), or cross-account (using IAM roles). AWS STS can also be used to assume a role within the same account or a different account.

The credentials issued by AWS STS are short-term and have a limited scope, which can enhance the security and compliance of the application. AWS STS OverviewAWS Certified Cloud Practitioner - aws.amazon.com

NEW QUESTION # 74

A company uses AWS Organizations. The company wants to apply security best practices from the AWS Well-Architected Framework to all of its AWS accounts.

Which AWS service will meet these requirements?

- **A. AWS Control Tower**
- B. Amazon Detective
- C. AWS Secrets Manager

- D. Amazon Macie

Answer: A

Explanation:

Explanation

AWS Control Tower is the easiest way to set up and govern a secure, multi-account AWS environment based on best practices established through AWS's experience working with thousands of enterprises as they move to the cloud. With AWS Control Tower, builders can provision new AWS accounts in a few clicks, while you have peace of mind knowing your accounts conform to your organization's policies. AWS Control Tower automates the setup of a baseline environment, or landing zone, that is a secure, well-architected multi-account AWS environment¹. AWS Control Tower helps you apply security best practices from the AWS Well-Architected Framework to all of your AWS accounts².

NEW QUESTION # 75

A company is running Amazon EC2 instances in a private subnet in a VPC.

Which AWS service or feature can provide the EC2 instances with network connections to the internet?

- A. Network Load Balancer
- **B. NAT gateway**
- C. Amazon Route 53
- D. Gateway endpoint

Answer: B

NEW QUESTION # 76

.....
