- A. Field values have not been changed.
- B. Field values were changed as a result of the merge process.
- C. The field delivered with content was changed but the old value was retained.
- D. Field values were unchanged and no new authorization was added.

Answer: C

NEW QUESTION # 18

What are some security safeguards categories? Note: There are 3 correct answers to this question.

- A. Organizational
- B. Access Control
- C. Financial
- D. Technical
- E. Physical

Answer: B,D,E

Explanation:

Security safeguards in SAP are categorized into distinct areas to ensure a holistic approach to protecting systems and data.

* Physical Safeguards (A): These include measures to protect physical IT infrastructure, such as data centers and hardware, from unauthorized access or environmental damage (e.g., CCTV, biometric access controls).

* Access Control Safeguards (B): Mechanisms to restrict access to data and systems based on user roles and responsibilities. Examples include user authentication, role-based access control, and segregation of duties (SoD).

* Technical Safeguards (D): Tools and configurations to protect digital assets, such as encryption, firewalls, intrusion detection systems, and vulnerability management.
