

CMMC-CCP Reliable Exam Test | CMMC-CCP Reliable Test Labs

BONUS!!! Download part of ExamDiscuss CMMC-CCP dumps for free: <https://drive.google.com/open?id=1LMLUSsezjFD6e5kQuIvmmmbOC98axHmFf>

ExamDiscuss releases a new high pass-rate CMMC-CCP valid exam preparation recently. If you are still puzzled by your test you can set your heart at rest to purchase our valid exam materials which will assist you to clear exam easily. We can guarantee purchasing Cyber AB CMMC-CCP Valid Exam Preparation will be the best passing methods and it always help you pass exam at first attempt. Now it is really an opportunity. Stop waiting and hesitate again!

Cyber AB CMMC-CCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• CMMC Model Construct and Implementation Evaluation: This section of the exam measures the evaluative skills of cybersecurity assessors, focusing on the application and assessment of the CMMC model. It includes understanding its levels, domains, practices, and implementation criteria, and how to assess whether organizations meet the required cybersecurity practices using evidence-based evaluation.
Topic 2	<ul style="list-style-type: none">• CMMC Ecosystem: This section of the exam measures the skills of consultants and compliance professionals and focuses on the different roles and responsibilities across the CMMC ecosystem. Candidates must understand the functions of entities such as the Department of Defense, CMMC-AB, Organizations Seeking Certification, Registered Practitioners, and Certified CMMC Professionals, as well as how the ecosystem supports cybersecurity standards and certification.
Topic 3	<ul style="list-style-type: none">• Scoping: This section of the exam measures the analytical skills of cybersecurity practitioners, highlighting their ability to properly define assessment scope. Candidates must demonstrate knowledge of identifying and classifying Controlled Unclassified Information (CUI) assets, recognizing the difference between in-scope, out-of-scope, and specialized assets, and applying logical and physical separation techniques to determine accurate scoping for assessments

Topic 4	<ul style="list-style-type: none"> • CMMC Governance and Source Documents: This section of the exam measures the capabilities of legal or compliance advisors, covering key regulatory frameworks that govern cybersecurity compliance. Topics include Federal Contract Information, Controlled Unclassified Information, the role of NIST SP 800-171, DFARS, FAR, and the structure and requirements of CMMC v2.0, including self-assessments and certification levels.

Free PDF 2026 Cyber AB CMMC-CCP: The Best Certified CMMC Professional (CCP) Exam Reliable Exam Test

All these three CMMC-CCP exam questions formats are easy to use and compatible with all devices, operating systems, and web browsers. Just choose the best CMMC-CCP exam questions format and start Cyber AB CMMC-CCP exam preparation without wasting further time. As far as the price of Certified CMMC Professional (CCP) Exam exam practice test questions is concerned, these exam practice test questions are being offered at a discounted price. Get benefits from CMMC-CCP Exam Questions at discounted prices and download them quickly. Best of luck in CMMC-CCP exam and career!!!

Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q136-Q141):

NEW QUESTION # 136

Which domain references the requirements needed to handle physical or digital assets containing CUI?

- A. System and Communications Protection (SC)
- B. Physical Protection (PE)
- **C. Media Protection (MP)**
- D. System and Information Integrity (SI)

Answer: C

Explanation:

Understanding the Media Protection (MP) DomainThe Media Protection (MP) domain in CMMC 2.0 focuses on the security requirements needed to handle physical or digital media containing Controlled Unclassified Information (CUI).

This domain includes controls for:

- * Protecting digital and physical media that store CUI.
- * Sanitizing and destroying media before disposal or reuse.
- * Restricting access to CUI media to authorized personnel only.
- * The MP domain directly addresses the requirements for handling CUI media, including encryption, access control, storage, and disposal.
- * CMMC 2.0 Level 2 aligns with NIST SP 800-171, which includes MP controls for managing media containing CUI.
- * B. Physical Protection (PE) #Incorrect
- * PE focuses on physical security (e.g., facility access, visitor logs, physical barriers), not the handling of CUI on media.
- * C. System and Information Integrity (SI) #Incorrect
- * SI deals with system monitoring, vulnerability management, and incident response, not media protection.
- * D. System and Communications Protection (SC) #Incorrect
- * SC covers network security, encryption, and secure communications, but does not specifically focus on media handling.
- * CMMC Level 2 Practice MP.3.125- Protects CUI by ensuring proper handling of media containing CUI.
- * NIST SP 800-171 (MP Family)- Establishes security requirements for handling digital and physical media containing CUI.
- * CMMC Scoping Guide (Nov 2021)- Confirms MP controls apply to all media that store, process, or transmit CUI.

Why the Correct Answer is "A. Media Protection (MP)"? Why Not the Other Options? Relevant CMMC 2.0 References: Final Justification: Since Media Protection (MP) directly addresses the handling of assets containing CUI, the correct answer is A. Media Protection (MP).

NEW QUESTION # 137

Which standard of assessment do all C3PAO organizations execute an assessment methodology based on?

- A. Government Accountability Office Yellow Book
- **B. CMMC Assessment Process**
- C. NIST SP 800-53A
- D. ISO 27001

Answer: B

Explanation:

Understanding the C3PAO Assessment Methodology A Certified Third-Party Assessment Organization (C3PAO) is an entity authorized by the CMMC Accreditation Body (CMMC-AB) to conduct official CMMC Level 2 assessments for organizations seeking certification.

* C3PAOs must follow the CMMC Assessment Process (CAP), which outlines the assessment methodology for evaluating compliance. Evidence collection procedures (interviews, artifacts, testing).

Assessment scoring and reporting requirements. # Guidance for assessors on executing standardized assessments.

* ISO 27001 (Option A) is an international standard for information security management but is not the basis for CMMC assessments.

* NIST SP 800-53A (Option B) provides security control assessments for federal systems, but CMMC assessments are based on NIST SP 800-171.

* GAO Yellow Book (Option D) is a government auditing standard used for financial and performance audits, not cybersecurity assessments.

* CMMC Assessment Process (CAP) (Option C) is the correct answer because it defines how C3PAOs conduct CMMC assessments.

* CMMC Assessment Process Guide (CAP)- Governs C3PAO assessment execution.

* CMMC 2.0 Model Documentation- Requires C3PAOs to follow CAP procedures for assessments.

Key Requirement: CMMC Assessment Process (CAP) Why "CMMC Assessment Process" is Correct?

Official References from CMMC 2.0 Documentation Final Verification and Conclusion The correct answer is C. CMMC Assessment Process, as it is the official methodology all C3PAOs must follow when conducting CMMC assessments.

NEW QUESTION # 138

Which organization is the governmental authority responsible for identifying and marking CUI?

- **A. NARA**
- B. Department of Homeland Security
- C. CMMC-AB
- D. NIST

Answer: A

NEW QUESTION # 139

In the CMMC Model, how many practices are included in Level 2?

- A. 17 practices
- **B. 110 practices**
- C. 72 practices
- D. 180 practices

Answer: B

Explanation:

* CMMC Level 2 is designed to align fully with NIST SP 800-171, which consists of 110 security controls (practices).

* This means all 110 practices from NIST SP 800-171 are required for a CMMC Level 2 certification.

How Many Practices Are Included in CMMC Level 2? Breakdown of Practices in CMMC 2.0

CMMC Level Number of Practices

Level 1

17 practices (Basic Cyber Hygiene)

Level 2

110 practices (Aligned with NIST SP 800-171)

Level 3

Not yet finalized but expected to exceed 110

Since CMMC Level 2 mandates all 110 NIST SP 800-171 practices, the correct answer is C. 110 practices.

* A. 17 practices # Incorrect. 17 practices apply only to CMMC Level 1, not Level 2.

- * B. 72 practices#Incorrect. There is no CMMC level with 72 practices.
 - * D. 180 practices#Incorrect. CMMC Level 2 only requires 110 practices, not 180.
- Why the Other Answers Are Incorrect
- * CMMC 2.0 Model- Confirms that Level 2 includes 110 practices aligned with NIST SP 800-171.
 - * NIST SP 800-171 Rev. 2- Outlines the 110 security controls required for handling Controlled Unclassified Information (CUI).
- CMMC Official References Thus, option C (110 practices) is the correct answer, as per official CMMC guidance.

NEW QUESTION # 140

When scoping the organizational system, the scope of applicability for the cybersecurity CUI practices applies to the components of:

- A. nonfederal systems that process, store, or transmit CUI.
- B. federal systems that process, store, or transmit CUI.
- C. federal systems that process, store, or transmit CUI, or that provide protection for the system components.
- **D. nonfederal systems that process, store, or transmit CUI, or that provide protection for the system components.**

Answer: D

Explanation:

- * The CMMC 2.0 framework applies to nonfederal systems that process, store, or transmit CUI.
 - * Scoping determines which system components must comply with CMMC practices.
 - * If a system processes, stores, or transmits CUI, or provides security for those systems, it must be included in the assessment scope.
 - * CMMC Applies to Contractors, Not Federal Systems
 - * CMMC is designed for Department of Defense (DoD) contractors, not federal systems.
 - * Federal systems are already governed by NIST SP 800-53 and other regulations.
 - * Scope Includes Systems That Process CUI AND Those That Protect Them
 - * Systems processing, storing, or transmitting CUI are in scope.
 - * Systems that provide protection for CUI systems (e.g., firewalls, monitoring tools, security appliances) are also in scope.
 - * A. Federal systems that process, store, or transmit CUI.#Incorrect
 - * CMMC does not apply to federal systems.
 - * B. Nonfederal systems that process, store, or transmit CUI.#Partially correct but incomplete
 - * It excludes security systems that protect CUI assets, which are also in scope.
 - * C. Federal systems that process, store, or transmit CUI, or that provide protection for the system components.#Incorrect
 - * CMMC only applies to nonfederal systems.
 - * CMMC Scoping Guide (Nov 2021)- Confirms that CMMC applies to nonfederal systems processing CUI.
 - * NIST SP 800-171 Rev. 2- Specifies security requirements for nonfederal systems handling CUI.
 - * DFARS 252.204-7012- Requires DoD contractors to implement NIST SP 800-171 on nonfederal systems handling CUI.
- Understanding Scoping in CMMC 2.0 Why the Correct Answer is "D. Nonfederal systems that process, store, or transmit CUI, or that provide protection for the system components"? Why Not the Other Options? Relevant CMMC 2.0 References: Final Justification: Since CMMC applies to nonfederal systems that process CUI or protect those systems, the correct answer is D. Nonfederal systems that process, store, or transmit CUI, or that provide protection for the system components.

NEW QUESTION # 141

.....

From the experience of our former customers, you can finish practicing all the contents in our CMMC-CCP training materials within 20 to 30 hours, which is enough for you to pass the CMMC-CCP exam as well as get the related certification. That is to say, you can pass the CMMC-CCP Exam as well as getting the related certification only with the minimum of time and efforts under the guidance of our CMMC-CCP training materials. And the pass rate of our CMMC-CCP learning guide is as high as more than 98%.
