

Start Your Cisco 800-150 Exam Preparation with 800-150 Actual Exam Questions

BONUS!!! Download part of Itcertmaster 800-150 dumps for free: <https://drive.google.com/open?id=1rq64EVgYjmjT77MxyzFJmf70E8rEbUMj>

In today's rapid economic development, society has also put forward higher and higher requirements for us. In addition to the necessary theoretical knowledge, we need more skills. Our 800-150 exam simulation is a great tool to improve our competitiveness. After we use our 800-150 Study Materials, we can get the 800-150 certification faster. And at the same time, we can do a better job since we have learned more knowledge on the subject.

Cisco 800-150 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.
Topic 2	<ul style="list-style-type: none"> • Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.
Topic 3	<ul style="list-style-type: none"> • Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.

Topic 4	<ul style="list-style-type: none"> • Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP • IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.
Topic 5	<ul style="list-style-type: none"> • Cisco UCS and Data Center Architecture: This section of the exam measures the skills of a Data Center Engineer and introduces Cisco's UCS and data center solutions. It explains the devices found in a data center, including switches, UCS servers, and director switches, and describes different server deployment models. Students will also learn about virtualization components like virtual machines, hypervisors, cloud computing concepts, and deployment models. The section covers how Cisco UCS devices fit into campus networks, edge locations, and data centers, and explains the key components and connections used in UCS architecture.

800-150 Actual Questions, 800-150 Exam Labs

Our 800-150 certification has great effect in this field and may affect your career even future. 800-150 real questions files are professional and high passing rate so that users can pass exam at the first attempt. High quality and pass rate make us famous and growing faster and faster. Many candidates compliment that 800-150 Study Guide materials are best assistant and useful for qualification exams, and only by practicing our 800-150 exam braindumps several times before exam, they can pass 800-150 exam in short time easily.

Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q34-Q39):

NEW QUESTION # 34

What are two indicators that a network interface card must be replaced? (Choose two.)

- A. Connectivity problems
- B. Boot failures
- C. Consistent link down status
- D. Frequent system crashes
- E. Inability to save configurations

Answer: A,C

Explanation:

A Network Interface Card (NIC) is essential for device connectivity. Two common symptoms indicating that a NIC may be faulty and require replacement are:

* Connectivity problems (Option A): Devices may fail to communicate with the network, showing no IP address assignment or inability to ping/connect to other devices.

* Consistent link down status (Option D): The link LED may stay off or frequently go down, even when connected to a functioning switch port with a known-good cable.

Other options like configuration issues (Option B) or system crashes (Option E) might be due to software or unrelated hardware components, and boot failures (Option C) typically point to motherboard or storage faults.

NEW QUESTION # 35

Drag and drop the failures from the left onto the responsible devices in the MDS field-replaceable unit on the right.

inability to manage or control switch functions	fan module
failure to maintain optimal temperatures	supervisor module
loss of connectivity on specific ports	fabric module
inability to establish fiber optic connections	line card
degraded internal data transfer between line cards	transceivers

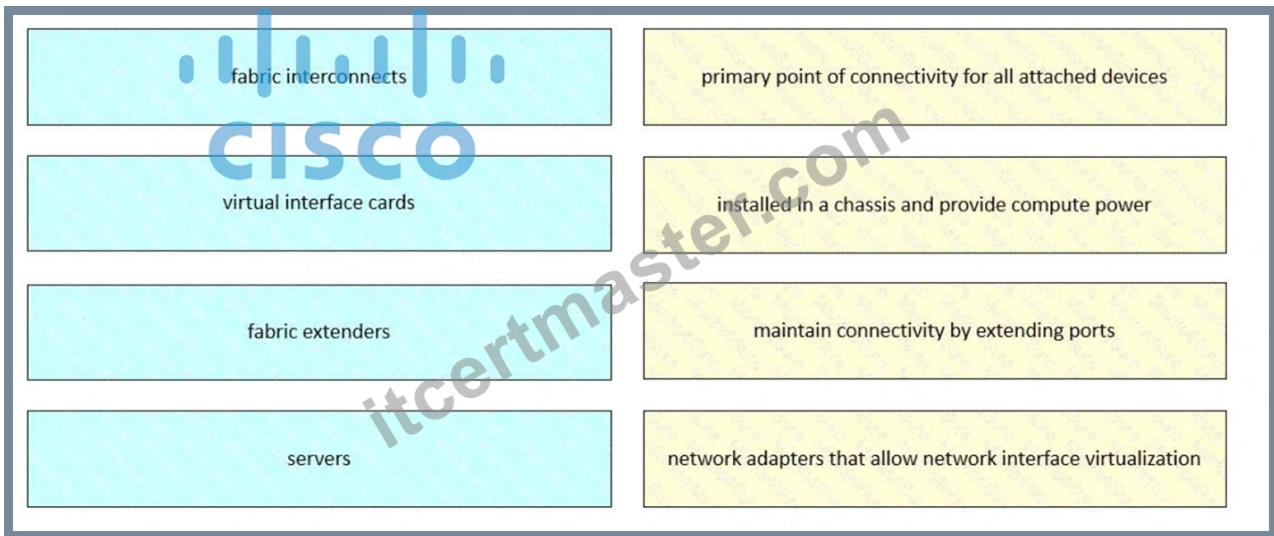

Answer:

Explanation:

inability to manage or control switch functions	failure to maintain optimal temperatures
failure to maintain optimal temperatures	inability to manage or control switch functions
loss of connectivity on specific ports	degraded internal data transfer between line cards
inability to establish fiber optic connections	loss of connectivity on specific ports
degraded internal data transfer between line cards	inability to establish fiber optic connections

NEW QUESTION # 36

Drag and drop the Cisco UCS components from the left onto the corresponding functionalities on the right.

Answer:

Explanation:

Explanation:

According to FLDTEC documentation and Cisco UCS architecture guides, each of these elements plays a distinct and essential role: Fabric Interconnects (FI)- Act as the central switching and management point for the UCS domain, connecting servers to LAN and SAN.

Virtual Interface Cards (VICs)- Installed in servers, these adapters support virtualization of multiple NICs and HBAs, enabling dynamic profile assignment.

Fabric Extenders (FEXs)- Extend the I/O fabric from the FI to the chassis, reducing complexity and consolidating management.

Servers- Provide the actual compute resources and run workloads. These can be blade or rack servers housed in the UCS chassis. This structure is critical to the Cisco Unified Fabric approach, which simplifies data center management through integration and automation.

NEW QUESTION # 37

Refer to the exhibit.

Refer to the exhibit. Which replaceable components are highlighted on the three different series of Cisco UCS servers?

- A. storage modules
- B. fan modules
- C. GPU sockets
- D. power supplies

Answer: B

Explanation:

The highlighted components in all three Cisco UCS server models (5108 B-Series Blade Server Chassis, X9508 X Series Modular Server Chassis, and C225 M6 Rack Server) are fan modules, which are field-replaceable units responsible for cooling the system. The highlighted components in the images correspond to cooling fans - these are essential for maintaining optimal thermal conditions within each Cisco UCS server type. Here's a breakdown of what's visible in each:

Cisco UCS 5108 B-Series Blade Server Chassis: The highlighted vertical rectangular components are fan modules, which provide high-efficiency airflow for the densely packed blades.

Cisco UCS X9508 X-Series Modular Server Chassis: The front-facing fan trays are clearly marked, used to cool the modular nodes and shared infrastructure.

Cisco UCS C225 M6 Rack Server: The highlighted components on the side of the motherboard are also fan modules, directly responsible for cooling the CPU, memory, and other internal components.

These fans are field-replaceable units (FRUs) and are routinely accessed by technicians during preventive maintenance or fault replacement.

NEW QUESTION # 38

Which deployment model minimizes dependence on internet connectivity for core collaboration functions?

- A. Hosted Collaboration Solution
- B. Software-as-a-Service model
- **C. On-premises deployment**
- D. Cloud-based deployment

Answer: C

Explanation:

On-premises deployment model minimizes dependence on internet connectivity for core collaboration functions. In this model, all critical services, including call control, messaging, and conferencing, are hosted within the organization's local infrastructure. This ensures that internal communication services remain operational even if internet connectivity is lost.

In contrast, cloud-based deployments (Options A and C) and Hosted Collaboration Solutions (Option D) rely on internet connectivity to access services hosted externally, making them more susceptible to internet outages.

NEW QUESTION # 39

.....

The quality of our Cisco 800-150 training material is excellent. After all, we have undergone about ten years' development. Never has our practice test let customers down. Although we also face many challenges and troubles, our company get over them successfully. If you are determined to learn some useful skills, our Cisco 800-150 Real Dumps will be your good assistant. Then you will seize the good chance rather than others.
