We respect your needs toward the useful CASPO-001 practice materials by recommending our CASPO-001 Guide preparations for you. Only in a few minutes, your ordered CASPO-001 exam questions are sent to you, and whenever you have any question on the CASPO-001 practice guide, you can contact with our service at 24/7.

## GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q13-Q18):

### NEW QUESTION # 13

Which two (2) metrics will help a Product Owner establish that value is being delivered? (Choose the best two answers)

- A. Velocity.
- B. Budget spent.
- C. Time to market.
- D. Customer satisfaction.
- E. Productivity.

Answer: C,D

Explanation:

The Product Owner's primary accountability is maximizing the value of the product, per the Scrum Guide.

Metrics should reflect outcomes, not just internal process efficiency:

- \* A (Time to market): Faster delivery of Increments to the market validates value through real-world feedback, a key Scrum principle.
- \* B (Customer satisfaction): This directly measures whether the product meets user needs, aligning with value delivery.
- \* C (Velocity): While useful for Developers to gauge capacity, it's an internal metric, not a direct indicator of value.
- \* D (Productivity): This focuses on effort, not outcome, and isn't tied to value in Scrum.

#### NEW QUESTION # 14

Why is it imperative that the Scrum Master attend the Daily Scrum?

- A. To facilitate the meeting
- **B. They don't have to attend - they just have to ensure that the team has it**
- C. To document impediments
- D. To get the information to update the burndown chart

**Answer: B**

Explanation:

The Daily Scrum is the Developers' event, not the Scrum Master's. The Scrum Guide states: "The Daily Scrum is a 15-minute event for the Developers of the Scrum Team.. The Scrum Master ensures that the Developers have the meeting, but the Developers are responsible for conducting the Daily Scrum." The Scrum Master's role is to ensure it happens and is effective, not to attend mandatorily.

- \* A: Documenting impediments is a support task, not a Daily Scrum requirement.
- \* B: Facilitation is optional, only if requested.
- \* C: Burndown charts aren't mandated; this isn't their purpose.

#### NEW QUESTION # 15

What is the tactic a Scrum Master should use to divide a group of 100 people into multiple Scrum Teams?  
(Choose the best answer)

- A. Ask the Product Owner to assign the people to teams.
- B. Create teams based on their skills across multiple layers (such as database, UI, etc.).
- **C. Ask the Developers to divide themselves into teams.**

**Answer: C**

Explanation:

The Scrum Guide emphasizes self-organization and self-management as core principles for the Scrum Team, particularly the Developers: "They are self-managing, meaning they internally decide who does what, when, and how." When forming multiple Scrum Teams from a large group, the Scrum Master's role is to facilitate and coach, not dictate. Option C aligns with this by empowering the Developers to self-organize into teams, fostering ownership and collaboration. Option A (skill-based division) is too prescriptive and risks creating component teams rather than cross-functional ones, which Scrum favors. Option B shifts responsibility to the Product Owner, whose role is Product Backlog management, not team formation. Thus, C is the best tactic.

#### NEW QUESTION # 16

During a Sprint Retrospective, for what is the Scrum Master responsible? (Choose the best answer)

- A. Acting as a scribe to capture the Developers' answers.
- B. Summarizing and reporting the discussions to management.
- **C. Participating as a Scrum Team member and facilitating as requested or needed.**
- D. Prioritizing the resulting action items.

**Answer: C**

Explanation:

The Scrum Guide describes the Sprint Retrospective as an event where the Scrum Team inspects itself and plans improvements, with

the Scrum Master playing a dual role: "The Scrum Master participates as a peer team member in the Sprint Retrospective... and ensures that the event takes place and is positive and productive." Option C captures this-participating as a team member and facilitating when needed. Option A (scribe) is too narrow and not required. Option B (prioritizing) is a team decision, not the Scrum Master's alone. Option D (reporting to management) violates Scrum's team autonomy. Thus, C is correct.

#### NEW QUESTION # 17

The Product Owner manages the Product Backlog. Who is accountable for estimating the effort to complete the Product Backlog items? (Choose the best answer)

- A. The Product Owner. The Product Owner is required to commit on delivery to the users and the stakeholders.
- B. The PMO. They have all the history on projects delivered, and this enables the IT department to make delivery commitments.
- C. The Developers. As a collective, they have a complete view of the work needed to transform Product Backlog items into Increments of product.

**Answer: C**

Explanation:

Effort estimation is a technical task owned by the Developers, who execute the work. The Scrum Guide notes:

"The Developers are responsible for... planning how to deliver the Increment." During Sprint Planning and refinement, they estimate effort based on their expertise.

\* A: Correct-the Developers collectively assess what's needed to meet the Definition of "Done."

\* B: PMO isn't a Scrum role; estimation stays within the team.

#### NEW QUESTION # 18

.....

Our CASPO-001 exam dumps are compiled by our veteran professionals who have been doing research in this field for years. There is no question to doubt that no body can know better than them. The content and displays of the CASPO-001 Pass Guide Which they have tailor-designed are absolutely more superior than the other providers.
