

# OGEA-101 Reliable Dumps Questions, OGEA-101 Latest Exam

What's more, part of that PassExamDumps OGEA-101 dumps now are free: [https://drive.google.com/open?id=1WWTw1dCbbQx\\_D-9Rt1ZDa8nD1n7s4myE](https://drive.google.com/open?id=1WWTw1dCbbQx_D-9Rt1ZDa8nD1n7s4myE)

Technologies are changing at a very rapid pace. Therefore, the TOGAF Enterprise Architecture Part 1 Exam in Procurement and Supply The Open Group has become very significant to validate expertise and level up career. Success in the TOGAF Enterprise Architecture Part 1 Exam examination helps you meet the ever-changing dynamics of the tech industry. To advance your career, you must register for the TOGAF Enterprise Architecture Part 1 Exam OGEA-101 in Procurement and Supply The Open Group test and put all your efforts to crack the The Open Group OGEA-101 challenging examination.

## The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.</li> </ul>

Topic 5	<ul style="list-style-type: none"> <li>• ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 Exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 exam and implementing enterprise architecture.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.</li> </ul>

## OGEA-101 Latest Exam, OGEA-101 Valid Test Prep

The Open Group OGEA-101 actual test question is a good choice. The The Open Group OGEA-101 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual The Open Group OGEA-101 exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of The Open Group OGEA-101 Dumps with you on occasions when you have spare time for quick revision. The PDF is easily downloadable from our website and also has a free demo version available.

## The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q20-Q25):

### NEW QUESTION # 20

Consider the following statement.

According to the TOGAF standard, a governed approach of a particular deliverable will ensure adherence to the principles, standards, and requirements of the existing or developing architectures.

Which deliverable does this refer to?

- A. The Statement of Architecture Work
- B. The Architecture Vision
- C. The Architecture Definition Document
- **D. An Architecture Contract**

**Answer: D**

Explanation:

According to the TOGAF Standard, 10th Edition, an architecture contract is "a formal agreement between a service provider and a service consumer that defines the mutual commitments and expectations for the delivery of an architecture" 1. An architecture contract is a governed approach of a particular deliverable that will ensure adherence to the principles, standards, and requirements of the existing or developing architectures, as it specifies the roles, responsibilities, deliverables, quality criteria, and acceptance criteria for the architecture work 1. The other options are not correct, as they are not governed approaches of a particular deliverable, but rather different types of deliverables within the architecture development process. An architecture vision is "a high-level, aspirational view of the target architecture" 1. A statement of architecture work is "a document that defines the scope and

approach that will be used to complete an architecture project"

1. An architecture definition document is "a document that describes the baseline and target architectures for one or more domains"

1. References: 1: TOGAF Standard, 10th Edition, Part I: Introduction, Chapter 3: Definitions.

### NEW QUESTION # 21

Which ADM Phase includes creation of an Enterprise Architecture Capability?

- A. Phase H
- B. Phase A
- C. Phase G
- **D. Preliminary Phase**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Preliminary Phase is the phase in TOGAF where an organization establishes or enhances its Enterprise Architecture Capability. This includes defining governance structures, roles, responsibilities, processes, tools, and architectural principles. The objective is to prepare the organization to successfully execute the ADM.

Phase A focuses on Architecture Vision for a specific initiative, not on creating the overall EA capability.

Phase G deals with implementation governance, and Phase H focuses on architecture change management.

None of these phases are responsible for establishing the EA practice itself.

The Preliminary Phase answers foundational questions such as how architecture will be governed, who owns architecture decisions, how compliance will be enforced, and how architecture work will be integrated with other organizational processes. Therefore, creation of an Enterprise Architecture Capability clearly belongs to the Preliminary Phase.

### NEW QUESTION # 22

Which section of the TOGAF template for Architecture Principles should highlight the business benefits of adhering to the principle?

- **A. Rationale**
- B. Implications
- C. Statement
- D. Name

**Answer: A**

Explanation:

According to the TOGAF Standard, 10th Edition, the rationale section of the architecture principles template should highlight the business benefits of adhering to the principle, as well as the business risks of not adhering to it 1. The rationale section should explain the reasoning behind the principle, and provide evidence or arguments to support it. The rationale section should also link the principle to the business drivers, goals, and objectives of the enterprise, and show how the principle contributes to the value and success of the enterprise. The other options are not correct, as they have different purposes in the architecture principles template. The name section should provide a short and memorable name for the principle, such as "Information is an Asset" or "Business Continuity" 1. The statement section should provide a concise and formal statement of the principle, such as "The enterprise's information is recognized as a core asset, and is managed accordingly" or "The enterprise's ability to provide critical services and products must be maintained in the event of a disaster" 1. The implications section should identify the impact of the principle on the enterprise, such as the changes, costs, benefits, and risks that may result from applying or violating the principle 1. Reference: 1: TOGAF Standard, 10th Edition, Part III: ADM Guidelines and Techniques, Chapter 23: Architecture Principles, Section 23.3 Developing Architecture Principles.

### NEW QUESTION # 23

Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Logical and Physical
- B. Information and Data

- C. Application and Data
- D. Capability and Segment

**Answer: C**

Explanation:

These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology<sup>12</sup>. Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain<sup>12</sup>.

The other options are incorrect because:

\*Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system<sup>3</sup>.

\*Information and Data are not distinct architecture domains, but rather aspects of the same domain.

Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data<sup>4</sup>.

\*Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus<sup>5</sup>.

#### NEW QUESTION # 24

In the ADM, what is the name for documents that are not finished and not approved?

- A. version 0.1
- B. incomplete
- C. interim
- D. draft

**Answer: D**

Explanation:

\* In TOGAF, draft deliverables are those that are not yet finished or approved. They are work-in-progress versions that may have version numbers like 0.1, 0.5, or 0.9.

\* Once reviewed and approved, they become final deliverables.

Reference: TOGAF Standard, Version 9.2, Deliverables, Artifacts, and Building Blocks.

#### NEW QUESTION # 25

.....

These questions will familiarize you with the OGEA-101 exam format and the content that will be covered in the actual test. You will not get a passing score if you rely on outdated practice questions. PassExamDumps has assembled a brief yet concise study material that will aid you in acing the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101) exam on the first attempt. This prep material has been compiled under the expert guidance of 90,000 experienced The Open Group professionals from around the globe.
