Pass Guaranteed EXIN Marvelous CDCP - Exams Certified Data Centre Professional (CDCP) Torrent

What's more, part of that PDFTorrent CDCP dumps now are free: https://drive.google.com/open?id=1rd0ndySnsRdZJBiLYamiijn2feSXLm5X

Do you worry about not having a long-term fixed study time? Do you worry about not having a reasonable plan for yourself? CDCP exam dumps will solve this problem for you. Based on your situation, including the available time, your current level of knowledge, our study materials will develop appropriate plans and learning materials. Whatever you want to choose, you want to learn from which stage. In our study materials, you can find the right one for you. At the same time, the CDCP Exam Prep is constantly updated. After you have finished learning a part, you can choose a new method according to your own situation. Our study materials are so easy to understand that no matter who you are, you can find what you want here.

PDFTorrent has created budget-friendly CDCP study guides because the registration price for the EXIN certification exam is already high. You won't ever need to look up information in various books because our EXIN CDCP Real Questions are created with that in mind. Additionally, in the event that the curriculum of EXIN changes, we provide free upgrades for up to three months.

HOT Exams CDCP Torrent 100% Pass | Valid EXIN Questions Certified Data Centre Professional (CDCP) Exam Pass for sure

Three formats of Certified Data Centre Professional (CDCP) (CDCP) practice material are always getting updated according to the content of real Certified Data Centre Professional (CDCP) (CDCP) examination. The 24/7 customer service system is always available for our customers which can solve their queries and help them if they face any issues while using the CDCP Exam product. Besides regular updates, PDFTorrent also offer up to 1 year of free real Certified Data Centre Professional (CDCP) (CDCP) exam questions updates.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q38-Q43):

NEW QUESTION # 38
What is the most cost-effective way to avoid EMF issues within the Computer room?

- A. Install TUVapp'oved shielding material
- B. Reducing the voltage in the computer room
- C. Reducing the temperature in computer room to 18° C / 64= Fahrenheit
- D. Create a distance between the EMF source and the ICT equipment / copper network cabling

Answer: D

Explanation:
Physical separation is the most cost-effective method to minimize electromagnetic interference. Specialized shielding is more expensive and usually unnecessary if proper separation is maintained.

CDCP Exam Preparation Guide, EMF Section

NEW QUESTION # 39
Does shielded twisted pair network cabling provide protection against EMF from power cables?

- A. No, the shielding is designed for alien cross-talk between network cables, it provides no or little protection against low frequency EMF.
- B. Yes, as the shielding for twisted pair network cabling is specifically design for low frequency EMF protection.
- C. Yes, but only if the power cable is placed in a tre-foil cable arrangement.
- D. No, the shielding for twisted pair network cabling is for physical protection against vandalism and accidental cutting of the cable.

Answer: A

Explanation:
Shielded twisted pair cables (STP) are Ethernet cables that feature additional protection against electromagnetic interference from external sources, such as radio waves, microwaves, or other network cables.
This is achieved by wrapping each pair of wires with a conductive shield, usually made of foil or braided wire, and then enclosing the entire cable with another shield layer. However, this shielding is not effective against low frequency electromagnetic fields (EMF) from power cables, which can induce currents and voltages in the network cables and cause signal distortion or data loss. Low frequency EMF can only be reduced by increasing the distance between the power and network cables, or by using a tre-foil cable arrangement, which is a special configuration of three power cables twisted together to cancel out the magnetic fields they generate.

NEW QUESTION # 40
What is the main advantage of busbar trunking compared to stand electrical cabling?

- A. Busbar trunking has a fixed power rating.
- B. Busbar trunking can be located both overhead and under the raised floor.
- C. Busbar trunking allows for flexibility.
- D. Busbar trunking is less expensive.

Answer: C

Explanation:
Busbar trunking systems are a method of power distribution using rigid copper or aluminium conductors to distribute the power around a building. Busbar trunking systems have many advantages over cables, such as lower space requirements, higher short-circuit strength, lower fire load, and easier installation. One of the main advantages of busbar trunking is that it allows for flexibility in terms of power transmission and distribution. Busbar trunking systems can be easily relocated, modified, or expanded to accommodate changes in the building layout or load demand. Busbar trunking systems can also be fitted with various components, such as tap-off units, elbows, tees, and end feed units, to provide power to different locations and consumers.
Busbar trunking systems can also be installed both overhead and under the raised floor, depending on the design and preference of the building.

NEW QUESTION # 41
What factor should be considered when placing fluorescent lighting in the data centre?

- A. Fluorescent lights should only be installed in equipment supporting areas and not in the Computer/Server room.
- B. Fluorescent lights should not be connected to the back-up generator.
- C. Fluorescent lights should not be connected to the same UPS that supports the ICT equipment.
- D. Fluorescent lights should not be connected to the mains power supply.

Answer: C

Explanation:
The UPS (uninterruptible power supply) is a device that provides backup power to the ICT equipment in case of a power outage or a power quality issue. The UPS should be dedicated to the ICT equipment only, and not to other loads, such as lighting, cooling, or

security systems. This is because connecting fluorescent lights to the same UPS as the ICT equipment can cause several problems, such as:

*Reducing the battery runtime of the UPS, which may not be enough to support the ICT equipment until the backup generator kicks in or the utility power is restored.

*Increasing the harmonic distortion of the UPS output, which can affect the performance and reliability of the ICT equipment and the UPS itself.

*Creating electromagnetic interference (EMI) or radio frequency interference (RFI), which can disrupt the communication and data transmission of the ICT equipment.

*Triggering false alarms or tripping the circuit breakers of the UPS, which can cause downtime or data loss.

Therefore, fluorescent lights should not be connected to the same UPS that supports the ICT equipment.

Instead, they should be connected to a separate power source, such as the utility power, the backup generator, or a different UPS.

NEW QUESTION # 42

Which type of Humidifier is composed of water-filled canister containing electrodes?

- A. Ultrasonic Humidifier
- B. Steam Canister Humidifier
- C. Water Canister Humidifier
- D. Infrared Humidifiers

Answer: B

Explanation:

A steam canister humidifier is a type of humidifier that uses electricity to heat water in a canister containing electrodes. The water conductivity and the water level determine the amount of current and steam production.

The steam canister humidifier is also known as an electrode boiler humidifier or an electrode steam humidifier123.
