## Apple-Device-Support Key Concepts & Apple-Device-Support Latest Exam Review

The clients only need 20-30 hours to learn the Apple-Device-Support exam questions and prepare for the test. Many people may complain that we have to prepare for the Apple-Device-Support test but on the other side they have to spend most of their time on their most important things such as their jobs, learning and families. But if you buy our Apple-Device-Support Study Guide you can both do your most important thing well and pass the test easily because the preparation for the test costs you little time and energy.

### Apple Device Support Exam Sample Questions (Q80-Q85):

#### NEW QUESTION # 80

Safari profiles aren't syncing between a user's Mac and iPhone. What should you verify on the user's devices to resolve this issue?

- A. Private Relay is turned on in the iCloud section of Apple Account settings.
- B. Profile syncing is turned on for the Apple Account.
- **C. Safari is turned on in the iCloud section of Apple Account settings.**
- D. Safari extensions are turned on in the iCloud section of Apple Account settings.

**Answer: C**

Explanation:

Safari profiles (introduced in iOS 17/macOS Sonoma) allow users to separate browsing data (e.g., tabs, bookmarks) and sync them via iCloud. For syncing to work between a Mac and iPhone, Safari must be enabled in the iCloud settings on both devices (Settings > [user name] > iCloud on iPhone; System Settings > [user name] > iCloud on Mac). This toggle ensures bookmarks, history, tabs, and profiles sync.

\* Option A is vague; there's no specific "Profile syncing" setting-Safari syncing covers profiles.

\* Option B (Safari extensions) isn't required for profile syncing; extensions sync separately.

\* Option C is correct, as disabling Safari in iCloud stops all Safari data syncing.

\* Option D (Private Relay) enhances privacy but doesn't affect syncing. Verify this in Apple's "Set up and use iCloud Tabs" ([support.apple.com/HT202530](https://support.apple.com/HT202530)), which extends to profiles.

#### NEW QUESTION # 81

ACME, Inc. wants to ensure that iPhone and iPad backups created with Apple Configurator on a Mac are encrypted and protected with a password. Which action in Apple Configurator should you select to create password encrypted backups?

- A. Actions > Prepare, then select Encrypt Backups
- B. Actions > Advanced > Encrypt
- C. Actions > Apply > Backup Password
- **D. Actions > Advanced > Enable Encrypted Backups**

**Answer: D**

Explanation:

To create password encrypted backups with Apple Configurator, you need to enable encrypted backups for the devices or Blueprints that you want to back up. This option is available under the Actions > Advanced menu, and it requires you to enter and verify a password for the backups. Once enabled, encrypted backups save users' passwords and provide more security for the

data. Encrypted backups can be restored only to devices or Blueprints that have the same encryption settings and password.  
References: Enable encrypted backups in Apple Configurator

### NEW QUESTION # 82

How do you limit access to your location in "Precise Location Access" for certain apps on your iPad?

- A. Delete and reinstall the app.
- B. Open each app and edit the Location Access settings.
- C. Go to Settings > General > Location Services, then edit the settings for each app.
- **D. Go to Settings > Privacy & Security > Location Services, then edit settings for each app.**

**Answer: D**

Explanation:

In Settings > Privacy & Security > Location Services, toggle "Precise Location" off per app to limit to approximate location.

\* Option A: General doesn't host this.

\* Option B: Apps don't edit this internally.

\* Option C: Reinstalling resets, not limits.

\* Option D: Correct-iOS privacy control. References: Apple Support - "Control location access" (support.apple.com/HT207092).

### NEW QUESTION # 83

You use Apple Watch 6 to track your physical activity and health metrics, but you have some trouble seeing the screen and using the watch controls.

Which iPhone feature can you use to help you see and operate Apple Watch more easily?

- A. Audio Descriptions
- **B. Voice Over**
- C. Apple Watch Mirroring
- D. Ask Siri

**Answer: B**

### NEW QUESTION # 84

Match the startup icons on the left to the descriptions on the right by dragging the responses to the correct target areas. Responses may be used once, more than once, or not at all.

Answer Area

The Mac found your startup disk.

The startup options window for a Mac with Apple silicon.

Your Mac couldn't start up from macOS Recovery over the internet.

Your startup disk contains macOS, but it's not one your Mac can use.

Your startup disk is no longer available or doesn't contain a working Mac operating system.

**Answer:**
