New Fortinet FCP_FMG_AD-7.4 Test Question | FCP_FMG_AD-7.4 Test King

The Fortinet FCP_FMG_AD-7.4 certification exam is a valuable credential that often comes with certain personal and professional benefits. For many Fortinet professionals, the FCP - FortiManager 7.4 Administrator (FCP_FMG_AD-7.4) certification exam is

not just a valuable way to boost their skills but also FCP - FortiManager 7.4 Administrator certification exam gives them an edge in the job market or the corporate ladder. There are other several advantages that successful Fortinet FCP_FMG_AD-7.4 Exam candidates can gain after passing the Fortinet FCP_FMG_AD-7.4 exam.

Fortinet FCP_FMG_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 2	Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
Topic 3	Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
Topic 4	Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 5	Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47

Exhibit.

```

FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
  
```

Given the configuration shown in the exhibit, what are two results from this configuration? {Choose two.}

- A. You can validate administrator login attempts through external servers.
- B. The same administrator can lock more than one ADOM at the same time.
- C. Concurrent read-write access to an ADOM is disabled.
- D. Two or more administrators can make configuration changes at the same time, in the same ADOM.

Answer: B,C

Explanation:

The configuration shown in the exhibit sets the workspace-mode to normal. The workspace mode in FortiManager defines how configuration changes and administrative tasks are handled, specifically regarding locking and collaboration in ADOMs (Administrative Domains).

Understanding the workspace modes:

* Normal Mode: In this mode, only one administrator at a time can lock and edit an ADOM. The changes made by one administrator must be completed and saved before another administrator can make changes. It prevents concurrent read-write access within the same ADOM.

* Workflow Mode: This mode allows multiple administrators to work on different tasks within the same ADOM, but changes still need to be approved before being committed.

Explanation of Options:

- * A. You can validate administrator login attempts through external servers.
- * This option is unrelated to the workspace mode. External authentication servers can be used for administrator logins, but that is a different configuration setting (not related to workspace-mode).
- * B. The same administrator can lock more than one ADOM at the same time.
- * This is true. In Normal mode, an administrator can lock multiple ADOMs, meaning they can work on more than one ADOM simultaneously, but each ADOM can only be accessed by one administrator at a time for read-write purposes.

- * C. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- * This is false. In Normal mode, only one administrator can have read-write access to an ADOM at a time. If another administrator attempts to make changes, they must wait until the ADOM is unlocked by the first administrator.
- * D. Concurrent read-write access to an ADOM is disabled.
- * This is true. In Normal mode, concurrent read-write access is disabled. This means only one administrator at a time can make changes to an ADOM. Other administrators can view the ADOM in read-only mode but cannot make changes until the ADOM is unlocked.

NEW QUESTION # 48

You are moving managed FortiGate devices from one ADOM to a new ADOM.
Which statement correctly describes the expected result?

- A. Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- B. Policy packages will be imported into the new ADOM automatically.
- **C. The shared policy package will not be moved to the new ADOM automatically.**
- D. The shared device settings will be installed automatically.

Answer: C

NEW QUESTION # 49

Refer to the exhibit.

A junior administrator is troubleshooting a FortiManager connectivity issue that is occurring with a managed FortiGate device.
Given the FortiManager device manager settings shown in the exhibit, what can you conclude from this scenario?

- A. The administrator can reclaim the FortiGate to FortiManager protocol (FGFM) tunnel to get the device online.
- **B. FortiManager lost internet connectivity, therefore, the device appears to be down.**
- C. The administrator recently restored a FortiManager configuration file.
- D. The administrator must refresh the device to restore connectivity.

Answer: B

NEW QUESTION # 50

Exhibit.

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. An administrator can also lock the Local-FortiGate_root policy package.
- B. The FortiManager ADOM is locked by the administrator.
- C. FortiManager is in workflow mode.
- D. The FortiManager ADOM workspace mode is set to Normal

Answer: A,D

NEW QUESTION # 51

Which configuration setting for FortiGate is part of an ADOM-level database on FortiManager?

- A. NSX-T Service Template
- B. Routing
- C. SNMP
- D. Security profiles

Answer: B

NEW QUESTION # 52

.....

Once you have practiced on our FCP - FortiManager 7.4 Administrator test questions, the system will automatically memorize and analyze all your practice. You must finish the model test in limited time. There is a timer on the right of the interface. Once you begin to do the exercises of the FCP_FMG_AD-7.4 test guide, the timer will start to work and count down. If you don't finish doing the exercises, all your exercises of the FCP_FMG_AD-7.4 Exam Questions will be delivered automatically. Then the system will generate a report according to your performance. You will clearly know where you are good at or not. Then you can make your own learning plans based on the report of the FCP_FMG_AD-7.4 test guide. Also, you will do more practices that you are not good at until you completely have no problem.
