In addition to the FCP_FSM_AN-7.2 exam materials, our company also focuses on the preparation and production of other learning materials. If you choose our FCP_FSM_AN-7.2 study guide this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our FCP_FSM_AN-7.2 practice quiz a choice is to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for FCP_FSM_AN-7.2 exam.

The web-based FCP - FortiSIEM 7.2 Analyst (FCP_FSM_AN-7.2) practice exam can be accessed through online browsing anywhere just with a stable internet connection. So the applicants can take the FCP_FSM_AN-7.2 practice exam with ease for the preparation for the FCP_FSM_AN-7.2 Exam. All browsers and operating systems support the web-based FCP_FSM_AN-7.2 practice exam. Users can access it without installing or downloading any excessive plugins or software.

FCP_FSM_AN-7.2 Test Labs - FCP_FSM_AN-7.2 Real Questions

If you are working all the time, and you hardly find any time to prepare for the FCP_FSM_AN-7.2 exam, then ExamDiscuss present the smart way to FCP_FSM_AN-7.2 exam prep for the exam. You can always prepare for the FCP_FSM_AN-7.2 test whenever you find free time with the help of our FCP_FSM_AN-7.2 Pdf Dumps. We have curated all the FCP_FSM_AN-7.2 questions and answers that you can view the exam Fortinet FCP_FSM_AN-7.2 PDF brain dumps and prepare for the exam. We guarantee that you will be able to pass the FCP_FSM_AN-7.2 in the first attempt.

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.
Topic 2	<ul style="list-style-type: none"> Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.
Topic 3	<ul style="list-style-type: none"> Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.
Topic 4	<ul style="list-style-type: none"> Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q12-Q17):

NEW QUESTION # 12

Refer to the exhibit.

Rule Subpattern

The screenshot shows the 'Edit SubPattern' interface in FortiSIEM. The rule name is 'DomainAcctLockout'. The configuration is as follows:

- Filters:** A table with columns: Paren, Attribute, Operator, Value, Paren, Next, Row. It contains one filter: Event Type, IN, EventTypes: Domain Account Lock.
- Aggregate:** A table with columns: Paren, Attribute, Operator, Value, Paren, Next, Row. It contains one aggregate: COUNT(Matched Events), >=, 1.
- Group By:** A table with columns: Attribute, Row, Move. It contains three attributes: Reporting Device, Reporting IP, and User.

At the bottom, there are buttons: Run as Query, Save as Report, Save, and Cancel.

Which section contains the subpattern configuration that determines how many matching events are needed to trigger the rule?

- A. Filters
- B. Actions
- C. Aggregate
- D. Group By

Answer: C

Explanation:

The Aggregate section contains the condition COUNT(Matched Events) >= 1, which defines how many events must match the filter criteria for the rule to trigger. This is the subpattern configuration that determines the event threshold.

NEW QUESTION # 13

Which items are used to define a subpattern?

- A. Filters, Threshold, Time Window definitions
- **B. Filters, Aggregate, Group By definitions**
- C. Filters, Aggregate, Time Window definitions
- D. Filters, Group By, Threshold definitions

Answer: B

Explanation:

A subpattern in FortiSIEM is defined using Filters to match specific events, Aggregate conditions to apply statistical thresholds (e.g., COUNT), and Group By attributes to segment data for evaluation. These three components collectively determine how the subpattern functions.

NEW QUESTION # 14

Refer to the exhibit.

Which value would you expect the FortiSIEM parser to use to populate the Application Name field?

- A. applist
- **B. SSL**
- C. Network.Service
- D. wan1

Answer: B

Explanation:

The Application Name field in FortiSIEM is typically populated using the value of the app field in the raw log. In this event, app="SSL", so "SSL" is the expected application name parsed by FortiSIEM.

NEW QUESTION # 15

Which two settings must you configure to allow FortiSIEM to apply tags to devices in FortiClient EMS? (Choose two.)

- **A. FortiSIEM API credentials defined on FortiEMS**
- **B. FortiEMS API credentials defined on FortiSIEM**
- C. ZTNA tags defined on FortiSIEM
- D. Remediation script configured

Answer: A,B

Explanation:

To allow FortiSIEM to apply tags to devices in FortiClient EMS, FortiEMS API credentials must be defined on FortiSIEM to enable communication with EMS, and FortiSIEM API credentials must be defined on FortiEMS to allow EMS to accept tagging instructions from FortiSIEM. This bidirectional API trust is essential for tag application.

NEW QUESTION # 16

Refer to the exhibit.

Subpattern 1

Edit SubPattern

Name: RDP_Connection

Filters:	Paren	Attribute	Operator	Value	Paren	Next	Row
-	+	Destination TCP/UDP Port	=	3389	-	+	AND OR + -
-	+	Event Type	=	FortiGate-traffic-forward	-	+	AND OR + -

Aggregate:	Paren	Attribute	Operator	Value	Paren	Next	Row
-	+	COUNT(Matched Events)	>=	1	-	+	AND OR + -

Group By: Attribute

Attribute	Row	Move
User	+	-
Source IP	+	-

Run as Query Save as Report Save Cancel

Subpattern 2

Edit SubPattern

Name: Failed_Logon

Filters:	Paren	Attribute	Operator	Value	Paren	Next	Row
-	+	Event Type	IN	Group: Logon Failure	-	+	AND OR + -

Aggregate:	Paren	Attribute	Operator	Value	Paren	Next	Row
-	+	COUNT(Matched Events)	>=	3	-	+	AND OR + -

Group By: Attribute

Attribute	Row	Move
User	+	-
Source IP	+	-
Destination IP	+	-

Run as Query Save as Report Save Cancel

Rule Conditions

Step 1: General > **Step 2: Define Condition** > Step 3: Define Action

Condition: If this Pattern occurs within any 300 second time window

Paren	Subpattern	Paren	Next	Row
+	RDP_Connection	+	FOLLOWED_BY	+
+	Failed_Logon	+		+

Given these Subpattern relationships:

Subpattern	Attribute	Operator	Subpattern	Attribute	Next	Row
RDP_Connection	User	=	Failed_Logon	User	AND	+
RDP_Connection	Source IP	=	Failed_Logon	Source IP		+

Save Cancel

Which two conditions will match this rule and subpatterns? (Choose two.)

- A. A user runs a brute force password cracker against an RDP server.
- B. A user connects to the wrong IP address for an RDP session five times.
- C. A user using RDP over SSL VPN fails to log in to an application five times.
- D. A user fails twice to log in when connecting through RDP.

Answer: A,C

Explanation:

The user initiates an RDP session (Subpattern 1) and then fails to log in multiple times (Subpattern 2 with COUNT(Matched Events) >= 3) - both from the same Source IP and User within 300 seconds.

The brute force attempts typically involve a successful RDP connection followed by multiple failed logins, satisfying the sequence and grouping conditions in the rule.

NEW QUESTION # 17

In a year after your payment, we will inform you that when the FCP_FSM_AN-7.2 exam guide should be updated and send you the latest version. Our company has established a long-term partnership with those who have purchased our FCP_FSM_AN-7.2 exam questions. We have made all efforts to update our products in order to help you deal with any change, making you confidently take part in the FCP_FSM_AN-7.2 exam. Every day they are on duty to check for updates of FCP_FSM_AN-7.2 Study Materials for providing timely application. We also welcome the suggestions from our customers, as long as our clients propose rationally. We will adopt and consider it into the renovation of the FCP_FSM_AN-7.2 exam guide. Anyway, after your payment, you can enjoy the one-year free update service with our guarantee.
