What should a Consultant recommend to control their Technicians' view?

- A. Mini-Page Layouts
- B. Visualforce Pages
- C. Page Layouts
- D. Field Sets

Answer: D

Explanation:

Field Sets allow controlling which fields are displayed on the Work Orderand Service Appointment cards in the Salesforce Field Service mobile app. References:https://help.salesforce.com/s/articleView?id=sf.fs_mobile_fields.htm&type=5

NEW QUESTION # 41

Universal Containers wants to track Technicians' van stock using the Salesforce Field Service mobile app to ensure that Technicians report when parts are used.

Which three data elements should a Consultant recommend tracking to support these requirements?

Choose 3 answers

- A. Warehouse Locations
- B. Mobile Locations
- C. Products Consumed
- D. Products Required
- E. Inventory

Answer: B,C,E

Explanation:

Inventory is used to track product quantities in different locations such as warehouses or vans. Products Consumed are used to report when parts are used by technicians during service appointments and adjust inventory levels accordingly. Mobile Locations are used to track inventory in technicians' vans or trucks using geolocation data from their mobile devices. Warehouse Locations are used to track inventory in fixed locations such as warehouses or depots using address data from their records. Products Required are used to request products from inventory for a service appointment, but do not ensure that technicians report when parts are used.

NEW QUESTION # 42

Each container consists of multiple parts that are tracked by Asset records. Universal Containers's customers usually wait until several parts need service before requesting a Technician come on-site to save money on service charges.

How should a Consultant configure Salesforce Field

Service to track the work performed?

- A. Create a Work Type and Work Order for each Asset being serviced.
- B. Create a Work Type to automatically create relevant line items for each Asset.
- C. Create a Work Order and Work Order Line Item for each Asset being serviced.
- D. Create a Work Order for all Assets being serviced and a Work Order Line Item for each Product Consumed.

Answer: C

Explanation:

This option allows tracking the work performed for each asset separately and associating it with a work order and a service appointment. References: https://help.salesforce.com/s/articleView?id=sf.fs_work_order_line_items.htm&type=5

NEW QUESTION # 43

A technician needs to get replacement part for damaged inventory on them for an upcoming job.

To which object should the technician add a product request record?

- A. work types
- B. service appointment
- C. work order
- D. service report

Answer: C

Explanation:

A Product Request record can be added to a Work Order to request a product from inventory for a service appointment. A Work Type is a template that defines the duration, skills, and products required for a work order or work order line item. A Service Appointment is a record that represents a scheduled visit by a service resource to a customer location. A Service Report is a document that summarizes the details and outcomes of a service appointment. References: https://help.salesforce.com/s/articleView?id=sf.fs_work_order_line_items.htm&type=5

NEW QUESTION # 44

Time sheet entries can be associated to which two objects? Choose 2 answer

- A. Work order line item
- B. Service resource
- C. assigned resources
- D. Work order

Answer: A,D

Explanation:

Time sheet entries are records that track the time spent by a service resource on a work order or a work order line item[28]. Time sheet entries can be associated to work order line items or work orders using lookup fields [29]. Assigned resources are records that assign a service resource to a service appointment[30]. Service resources are records that represent the people or equipment that perform field service tasks[31]. Time sheet entries cannot be associated to assigned resources or service resources directly.
