Perfect 100% Free 2V0-32.24 – 100% Free Test Lab Questions | Cert 2V0-32.24 Guide

As is known to us, there are best sale and after-sale service of the 2V0-32.24 certification training materials all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the

best and most suitable 2V0-32.24 Latest Questions for all customers. More importantly, it is evident to all that the 2V0-32.24 training materials from our company have a high quality, and we can make sure that the quality of our 2V0-32.24 exam questions will be higher than other study materials in the market.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q28-Q33):

NEW QUESTION # 28

An administrator has configured vRealize Lifecycle Manager to manage content between two vRealize Operations instances. The administrator is encountering an issue when releasing content to the second vRealize Operations instance.

What are the two possible causes of the issue? (Choose two.)

- A. Only the policy "Allow content to be captured from this endpoint" has been configured for both vRealize Operations endpoints.
- B. A vRealize Operations endpoint can only be configured with FQDN.
- C. Content release from different versions of vRealize Operations Manager may fail.
- D. Configuring a vRealize Operations endpoint with an SSH user other than root is not supported.
- E. The policy "Enable code review" must be added to the second vRealize Operations endpoint.

Answer: C,D

Explanation:

Configuring a vRealize Operations endpoint with an SSH user other than root is not supported: vRealize Lifecycle Manager (vRSLCM) requires the use of the root user for SSH access to vRealize Operations endpoints. Using any other user for SSH access is not supported and may lead to issues when attempting to release content.

Content release from different versions of vRealize Operations Manager may fail: If the two vRealize Operations instances are running different versions, content release might fail due to version incompatibility.

It's recommended to ensure both instances are running compatible versions of vRealize Operations to ensure seamless content management and release.

NEW QUESTION # 29

Which option represents a use case of vRealize Log Insight?

- A. Evaluate the historical utilization of resources to generate a projection of the future workload.
- B. Analyze communications between applications to facilitate micro-segmentation.
- C. Intelligently group log sources standard output to rapidly understand issues.
- D. Auto-scale applications as a response of log pattern identification.

Answer: C

Explanation:

vRealize Log Insight is primarily used for log management and analytics, helping administrators efficiently aggregate, search, and analyze log data from various sources. Chosen option describes the core functionality of vRealize Log Insight, where it intelligently groups and aggregates log sources to help users quickly understand issues, identify patterns, and troubleshoot problems effectively.

NEW QUESTION # 30

An administrator is tasked with installing vRealize Log Insight using vRealize Suite Lifecycle Manager (vRSLCM). They have been instructed to use DHCP for the deployment.

Which statement about this scenario is correct?

- A. Static IP addresses are required for any product deployment in vRSLCM
- B. A default gateway does not need to be supplied for the deployment
- C. DHCP addresses are only supported for the cluster virtual IP address (VIP)
- D. DHCP addresses are only supported for vRealize Log Insight worker nodes

Answer: D

Explanation:

In vRealize Suite Lifecycle Manager (vRSLCM), DHCP addresses can be used for vRealize Log Insight worker nodes. However, static IP addresses are typically recommended for the management and master nodes to ensure stability and consistency in the

deployment. DHCP addresses are not recommended for the primary or management nodes because they might change after a reboot, causing issues with connectivity and accessibility.

NEW QUESTION # 31

An administrator updated the alert and symptom definitions. The administrator now wants to complete an upgrade to the latest version of vRealize Operations.

Which two actions can be done to preserve the customized content? (Choose two.)

- A. Import your custom content
- B. Select the checkbox 'Preserve Custom Content' when performing the upgrade
- C. Select the checkbox 'Reset Default Content' when performing the upgrade
- D. Backup the customized content as a YAMLfile
- E. Backup the customized content by cloning it

Answer: B,E

Explanation:

Select the checkbox 'Preserve Custom Content' when performing the upgrade: During the upgrade process, you can select the 'Preserve Custom Content' option to ensure that any custom content, including alerts and symptoms, is retained during the upgrade to the latest version of vRealize Operations.

Backup the customized content by cloning it: Before upgrading, it's a good practice to backup customized content by cloning it. This ensures that you have a copy of the custom configurations in case they are lost or need to be restored after the upgrade.

NEW QUESTION # 32

Which three filters can be used when adding agents to an agent group in vRealize Log Insight? (Choose three.)

- A. Agent status
- B. Hostname
- C. Logging protocol
- D. Agent version
- E. IP address
- F. Agent type

Answer: B,D,F

Explanation:

Agent type: This filter allows the administrator to group agents by their type, such as virtual, physical, or containerized agents.

Agent version: Filters agents by their version, which can be helpful in ensuring compatibility and updating agents.

Hostname: This filter groups agents based on the hostname of the machines they are installed on, providing more targeted management.

NEW QUESTION # 33
