Free PDF 2026 Nutanix NCP-BC Marvelous Latest Exam Simulator

Overall we can say that Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5; NCP-BC certification can provide you with several benefits that can assist you to advance your career and achieve your professional goals. Are you ready to gain all these personal and professional benefits? Looking for a sample, is smart and quick for Nutanix NCP-BC Exam Dumps preparation? If your answer is yes then you do not need to go anywhere, just download Pass4suresVCE NCP-BC Questions and start Nutanix NCP-BC exam preparation with complete peace of mind and satisfaction.

Nutanix Certified Professional - Business Continuity (NCP-BC) 7.5 Sample

Questions (Q60-Q65):

NEW QUESTION # 60

An administrator is tasked with ensuring the VMs do not experience downtime during an upcoming network maintenance on the primary cluster. The VMs are protected by a Protection Policy and are configured under a Recovery Plan.

What failover mechanism should the administrator use to ensure the VMs are available on the target cluster before the maintenance window?

- A. Test Failover
- B. Validate the Recovery Plan
- C. **Planned Failover**
- D. Unplanned Failover

Answer: C

NEW QUESTION # 61

An administrator is validating a newly created Recovery Plan and receives the following warning:

IP addresses xxx.xxx.xxx.xxx cannot be preserved/mapped for VM REPORTVM01.

IP addresses cannot be preserved/mapped for entities

IP might be already in use or will be used by some other VM for recovery. IP cannot be mapped.

Only one IP address can be preserved for a vNIC in an IP address management enabled network.

What can the administrator do to resolve this warning without changing the existing IP address assigned to the VM?

- A. **Configure Custom VM IP Mapping in the Recovery Plan to define explicit IP address mapping for the VM.**
- B. Disable IPAM on the recovery site subnet to allow Nutanix DR to preserve static IP addresses during failover.
- C. Add an additional vNIC to the VM and assign the IP address to the new vNIC to bypass the IPAM conflict.
- D. Remove and re-add the VM to the Recovery Plan to trigger a fresh IP address mapping validation.

Answer: A

NEW QUESTION # 62

A deployment uses native encryption for replication traffic between two clusters. An administrator subsequently enables network segmentation to isolate this traffic.

Which specific maintenance step must be performed to ensure the encrypted replication functions correctly on the new segmented network?

- A. Delete the existing certificates for Cerebro and Stargate services and restart the services.
- B. Manually add the new segmented IP addresses to the external firewall whitelist.
- C. **Update the IPSec VPN gateway configuration to include the new subnet range.**
- D. Regenerate the Key Management Server (KMS) tokens for all self-encrypting drives (SEDs).

Answer: C

NEW QUESTION # 63

An administrator performs these steps while configuring Nutanix Disaster Recovery:

Create VMs on Site A in a container named SalesA

Create a new container on Site B named SalesB

Create new Protection Policy name Async

Place all the new Sales VMs in the Protection Policy named Async

Set a schedule to begin taking hourly snapshots immediately

After performing the steps, replications begin without any errors. After two hours, the administrator checks on the progress on the remote site and finds that the SalesB container is showing 0 bytes.

What went wrong?

- A. The schedule is a Nearsync schedule.
- B. Advanced Replication add-on license isn't applied.
- C. The Sales VMs are unsupported for replications.

- D. The same name must be used at both sites.

Answer: D

NEW QUESTION # 64

An administrator is tasked with verifying the cluster's disaster recovery capability. The administrator needs to validate the capability without impacting the production VMs on the Source cluster and ensure that the destination cluster can bring up all the protected VMs.

How can the administrator perform a failover?

- A. Perform a test failover of the Recovery Plan.
- B. Perform validation of the Recovery Plan.
- C. Perform unplanned failover of the Recovery Plan.
- D. Perform a planned failover of the Recovery Plan.

Answer: A

NEW QUESTION # 65

.....

For most graduates who want to work in influential IT companies, they tend to choose latest Nutanix NCP-BC vce dumps to prepare the test instead of attending training institution. As a worldwide dumps provider, we will learn about the Latest NCP-BC Study Materials and update questions timely to ensure that our candidates get the up-to-date NCP-BC pdf torrent and take exam with great confidence.
