Um der Anforderung des aktuellen realen Test gerecht zu werden, aktualisiert das Technik-Team von Zertpruefung rechtzeitig die Fragen und Antworten zur EC-COUNCIL 312-76 Zertifizierungsprüfung. Wir akzeptieren immer Rückmeldungen von Benutzern und nehmen viele ihre Vorschläge an, was zu einer perfekten Schulungsmaterialien zur EC-COUNCIL 312-76 Prüfung macht. Dies ermöglicht Zertpruefung, immer Produkte von bester Qualität zu besitzen.

EC-COUNCIL 312-76 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Understanding Disaster Recovery Planning Process And Methodology • Business Impact Analysis And Business Continuity Plan
Thema 2	• Maintaining And Auditing The Business Continuity Plan • Overview Of BCP Training Program
Thema 3	• Understanding Virtualization-Based Disaster Recovery • Overview Of Business Continuity Management (BCM)
Thema 4	• Overview Of Disaster Recovery And Business Continuity • Understanding How To Perform BIA
Thema 5	• Overview Of Centralized And Decentralized Computing • Overview Of Business Continuity Plan Testing
Thema 6	• Introduction To Disaster Recovery And Business Continuity • Understanding Best Practices And Standards Of BCM
Thema 7	• Trends In Disaster Recovery And Business Continuity • Understanding RAID Technology
Thema 8	• Understanding Best Practices And Standards In Virtualization • Understanding Best Practices And Standards In Risk Management
Thema 9	• Understanding Cloud Data And Disaster Recovery • Overview Of Infrastructure Technologies

Thema 10	• Understanding Best Practices In Disaster Recovery And Business Continuity • Overview Of Risk And Its Terminology
Thema 11	• Overview Of Cost Benefit Analysis (CBA) And Business Impact Analysis (BIA) • Overview Of Business Continuity Plan (BCP)
Thema 12	• BCP Testing, Maintenance, And Training • Overview Of Disaster Recovery Planning
Thema 13	• Overview Of Business Continuity Strategy Design • Data Backup Strategies
Thema 14	• Understanding Data Protection Continuum And Best Practices In Backup • Overview Of Data Backup
Thema 15	• Understanding Data Recovery Process And Best Practices • Understanding Risk Assessment Process

312-76 Zertifizierungsprüfung & 312-76 Zertifizierungsantworten

100% Garantie EC-Council Disaster Recovery Professional (EDRP) Prüfungserfolg. Wenn Sie Zertprüfung 312-76 Prüfung wählen EC-COUNCIL Zertprüfung Test Engine ist das perfekte Werkzeug, um auf die Zertifizierungsprüfung vorbereiten. Erfolg kommt einfach, wenn Sie bereiten mit Hilfe von Original bis zu EC-Council Disaster Recovery Professional (EDRP) Produkte mit Zertprüfung Datum. Wie ein seltener Fall, wenn Sie es versäumen, diese Prüfung geben wir Ihnen eine volle Rückerstattung Ihres Einkaufs passieren.

EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) 312-76 Prüfungsfragen mit Lösungen (Q118-Q123):

118. Frage

Which of the following options is an activity of observing the content that appears on a computer monitor or watching what a user is typing?

- A. Snooping
- B. Copyright
- C. Utility model
- D. Patent

Antwort: A

119. Frage

Fred, the owner of an organization, wanted to implement a plan that consists of well-planned actions to be adopted before, during, and after a catastrophic event. Which plan did Fred want to implement?

- A. Risk Assessment
- B. IT Disaster Recovery Plan
- C. Business Recovery Plan
- D. Data Backup Plan

Antwort: C

Begründung:

A Business Recovery Plan outlines actions for all phases-before, during, and after-a catastrophic event to ensure organizational recovery, matching Fred's intent.

- * Option B (Risk Assessment):Identifies risks, not a phased action plan.
- * Option C (IT Disaster Recovery Plan):IT-focused, narrower than business-wide.
- * Option D (Data Backup Plan):Data-specific, not comprehensive.
- * "The Business Recovery Plan details proactive and reactive actions across pre-, during-, and post- catastrophe phases for holistic recovery" (Module: Business Continuity Planning, Section: Recovery Plans).

120. Frage

Pete works as a Network Security Officer for Gentech Inc. He wants to encrypt his network traffic.

The specific requirement for the encryption algorithm is that it must be a symmetric key block cipher. Which of the following techniques will he use to fulfill this requirement?

- A. AES
- B. IDEA
- C. DES
- D. PGP

Antwort: C

121. Frage

Katie has implemented the RAID level that splits data into blocks and evenly writes the data to multiple hard drives but does not provide data redundancy. This type of RAID level requires a minimum of _____ in order to set up.

- A. Four drives
- B. Six drives
- C. Two drives
- D. Three drives

Antwort: C

Begründung:

RAID 0 splits data across drives (striping) for performance but offers no redundancy, requiring a minimum of two drives.

* Option B:RAID 5 minimum, not RAID 0.

* Option C/D:Higher RAID levels, not RAID 0.

* "RAID 0 uses striping across at least two drives for speed, sacrificing redundancy for performance" (Module: Storage Technologies, Section: RAID Levels).

122. Frage

Timothy works as a network administrator in a multinational organization. He decides to implement a dedicated network for sharing storage resources. He uses a _____ as it separates the storage units from the servers and the user network.

- A. SAS
- B. SAN
- C. NAS
- D. SCSI

Antwort: B

Begründung:

A Storage Area Network (SAN) is a dedicated high-speed network that separates storage devices from servers and user networks, providing centralized block-level storage access.

* Option A (NAS):Network Attached Storage uses the user network, not a dedicated one.

* Option B (SCSI):Small Computer System Interface, a protocol, not a network (likely a typo for SAS).

* Option D (SAS):Serial Attached SCSI, a drive interface, not a network.

* "SANs provide a dedicated storage network, isolating storage from server and user traffic for efficiency and security" (Module: Storage Technologies, Section: SAN Overview).
