In this way, you can much time to complete your other goals and improve yourself better. What a rare opportunity it is! Never miss it because of your hesitation.

EC-COUNCIL EC-Council Disaster Recovery Professional (EDRP) Sample

Questions (Q175-Q180):

NEW QUESTION # 175

Which of the following terms refers to a dedicated server that is also used for file storage and sharing?

- A. Cloud Storage
- **B. Network Attached Storage (NAS)**
- C. Storage Area Network (SAN)
- D. Data Virtualization

Answer: B

Explanation:

Network Attached Storage (NAS) is a dedicated server designed for file storage and sharing over a network, perfectly matching the question's description.

* Option A (Data Virtualization): Abstracts data access, not a server.

* Option B (Cloud Storage): Offsite storage service, not a dedicated server.

* Option C (SAN): Block-level storage network, not file-focused.

* "NAS is a dedicated file storage and sharing server, accessible over networks, ideal for centralized data management" (Module: Storage Technologies, Section: NAS Overview).

NEW QUESTION # 176

You work as a senior project manager in SoftTech Inc. You are working on a software project using configuration management. Through configuration management, you are decomposing the verification system into identifiable, understandable, manageable, traceable units that are known as Configuration Items (CIs).

According to you, which of the following processes is known as the decomposition process of a verification system into Configuration Items?

- A. Configuration control
- B. Configuration auditing
- C. Configuration status accounting
- **D. Configuration identification**

Answer: D

NEW QUESTION # 177

Cameron wanted to back up the data present on his organization's server in case a disaster struck and the data was lost. The software he used created a copy of the data using block-level imaging. Which software did Cameron use?

- A. Bare-metal Restore
- B. Visualization
- C. Cloud Backup
- **D. Disk Imaging**

Answer: D

Explanation:

Disk Imaging software creates a block-level copy of an entire disk or partition, capturing all data, including the OS and applications, for restoration. This fits Cameron's need for a comprehensive server backup.

* Option A (Cloud Backup): Typically file-based, not block-level imaging.

* Option C (Visualization): Likely a typo for "Virtualization," which isn't backup software.

* Option D (Bare-metal Restore): A recovery process, not the software creating the image.

* EDRP v3 discusses disk imaging as a key backup method for complete system recovery (Module: Data Backup and Recovery).

NEW QUESTION # 178

Pete works as a Network Security Officer for Gentech Inc. He wants to encrypt his network traffic. The specific requirement for the encryption algorithm is that it must be a symmetric key block cipher. Which of the following techniques will he use to fulfill this

requirement?

- A. IDEA
- **B. DES**
- C. AES
- D. PGP

Answer: B

NEW QUESTION # 179

You work as a CSO (Chief Security Officer) for Tech Perfect Inc. You have a disaster scenario and you want to discuss it with your team members for getting appropriate responses of the disaster. In which of the following disaster recovery tests can this task be performed?

- A. Parallel test
- B. Full-interruption test
- C. Structured walk-through test
- **D. Simulation test**

Answer: D

NEW QUESTION # 180

.....
