CompTIA Project+ Certification Exam Sample Questions (Q276-Q281):

NEW QUESTION # 276

A company that is implementing an updated version of its main product hired a new project manager to lead the project. Prior to the start of the project, the sponsor asked the project manager to prepare a report on the defects found in the previous project to avoid a decrease in production. The report shows that the two main defects are related to cosmetic and physical damage to the product. Which of the following charts would BEST prioritize which defects to address?

- A. Histogram
- B. Run
- C. Control
- **D. Pareto**

Answer: D

Explanation:

Explanation

The project manager should use a Pareto chart to prioritize which defects to address for the product. A Pareto chart is a type of bar chart that shows the frequency or impact of different causes of problems or defects. It also shows a cumulative line that represents the percentage of the total frequency or impact. A Pareto chart can help to prioritize the causes that have the most significant effect on the quality of the product and apply the

80/20 rule, which states that 80% of the problems are caused by 20% of the causes.

NEW QUESTION # 277

A project manager is meeting with business stakeholders to define the time frame for a go-live to occur without impacting business operations. Which of the following is the project manager working on?

- A. Risk analysis
- B. Validation check
- **C. Downtime window schedule**
- D. Customer notifications

Answer: C

Explanation:

A downtime window schedule specifies a timeframe during which systems can be taken offline or changed without affecting business operations. CompTIA Project+ includes this as part of deployment planning to ensure minimal disruption to stakeholders.

NEW QUESTION # 278

An opportunity emerged in the middle of a project life cycle. Which of the following is the BEST action for the project manager to take?

- A. Accept the risk.
- B. Transfer the risk.
- C. Avoid the risk.
- **D. Exploit the risk.**

Answer: D

Explanation:

The project manager should exploit the risk after an opportunity emerged in the middle of a project life cycle. Exploit is a risk response strategy that aims to increase the probability and/or impact of a positive risk or

opportunity. Exploit can involve actions such as allocating more resources, changing the scope or schedule, or adding more features or benefits to the project deliverables. Exploit can help to ensure that the opportunity is realized and that the project gains more value or advantage from it³

NEW QUESTION # 279

A visual that displays team progress was created for stand-up meetings. Which of the following BEST describes what is being represented on the visual?

- A. Whiteboard
- B. Decision board
- **C. Task board**
- D. Dashboard

Answer: C

Explanation:

A task board is a visual tool that displays team progress for stand-up meetings. A task board usually consists of columns that represent different stages or statuses of tasks, such as to do, in progress, done, or blocked.

Each task is represented by a card or sticky note that can be moved across the columns as the task progresses.

A task board can help to facilitate communication, collaboration, and transparency among team members and stakeholders. It can also help to track and manage work flow, prioritize tasks, identify bottlenecks, and resolve issues³

NEW QUESTION # 280

A project sponsor is struggling to provide the latest project status information on a weekly executive call. Which of the following should be reviewed?

- A. Meeting cadence
- B. Gap analysis
- **C. Dashboard**
- D. Adoption training

Answer: C

Explanation:

A dashboard is a visual tool that displays key project metrics and indicators in a single view¹². A dashboard can help a project sponsor to provide the latest project status information on a weekly executive call by showing the project progress, budget, schedule, risks, issues, and milestones in a clear and concise way³⁴. A dashboard can also facilitate communication, collaboration, and decision making among project stakeholders⁵⁶. A dashboard should be reviewed and updated regularly to reflect the current state of the project⁷.
