

最好的最新1z0-1093-25題庫，令人稱贊的考試指南幫助妳輕鬆通過1z0-1093-25考試

Oracle Database Cloud Administrator 2021 Certified Professional Certification
Exam Number → 1Z0-1093-21

Describe NoSQL data models

38. Which set of data types is supported by the NoSQL Database Cloud Service tables?

enums, map, record

Explain Exadata Cloud Service and the components needed (options networking/shapes/expansion)

12. Which system configuration is offered by the Oracle Database Exadata Cloud Service?

Each system configuration starts with a fixed amount of OCPU, memory, storage, and network resources.

Oracle Cloud Database Services

32. You want to scale within Exadata System. Which of the following two statements are true?

- Modifying the number of enabled OCPU cores requires database downtime.
- The setting of database parameter CPU_COUNT is affected by modifying the number of OCPU cores.

Oracle Cloud Database Services

30. You can manage and monitor performance of an autonomous database running on autonomous Exadata Cloud@Customer using the Performance Hub.

Which two actions can be undertaken by Performance Hub?

(Choose all correct answers)

- View ASH Analytics
- Kill a running SQL session

Create, manage and use Heatwave

52. You want to permanently delete the DB System and its attached Heatwave cluster. Which action should you perform?

Delete the DB system and it will also delete the attached HeatWave Cluster.

Explain monitoring options with Exadata Cloud Service

24. Which tool can be used to monitor a storage server in Exadata Cloud Service?

exacdi

Configure Maximum Availability Architecture (O1AA) and Data Guard for Exadata Cloud Service

13. In Exadata Cloud Service, you use Oracle Data Guard for disaster recovery. What is the minimum egress requirement needed to enable Data Guard between Exadata Cloud Services?

P.S. Testpdf在Google Drive上分享了免費的、最新的1z0-1093-25考試題庫：https://drive.google.com/open?id=1FqiDUV-CU8Pr_z2MyF2dZl1gX0T3EH0

Testpdf剛剛發布了最新的1z0-1093-25認證考試所有更新的問題及答案，來確保您考試成功通過。我們提供最新的PDF和軟件版本的問題和答案，可以保證考生的1z0-1093-25考試100%通過。在我們的網站上，您將獲得我們提供的Oracle 1z0-1093-25免費的PDF版本的DEMO試用，您會發現這絕對是最值得信賴的學習資料。對於擁有高命中率的Oracle 1z0-1093-25考古題，還在等什么，趕快下載最新的題庫資料來準備考試吧！

Oracle 1z0-1093-25 考試大綱：

主題	簡介
主題 1	Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.

主題 2	Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.
主題 3	MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
主題 4	NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.
主題 5	Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.

1z0-1093-25 通過考試，1z0-1093-25 考試證照

如果你仍然在努力獲得 Oracle 的 1z0-1093-25 考試認證，我們 Testpdf 為你實現你的夢想，Testpdf Oracle 的 1z0-1093-25 考試培訓資料是品質最好的培訓資料，為你提供了一個好的學習平臺，問題是你如何準備這個考試，以確保你百分百成功，答案是非常簡單的，如果你有適當的時間學習，那就選擇我們 Testpdf Oracle 的 1z0-1093-25 考試培訓資料，有了它，你將快樂輕鬆的準備考試。

最新的 Oracle Cloud 1z0-1093-25 免費考試真題 (Q23-Q28):

問題 #23

A critical query running on your HeatWave cluster is experiencing significant performance degradation. Which tool or service should you use to identify and analyze the specific query causing the bottleneck?

- A. OCI Vault for auditing query execution.
- B. OCI Network Visualizer for analyzing network latency.
- C. OCI Bastion for secure access to the query execution environment.
- D. OCI Events for tracking query start and end times.
- E. MySQL Slow Query Log and OCI Logging Analytics.

答案: E

解題說明:

MySQL Slow Query Log:

The MySQL Slow Query Log records queries that exceed a specified execution time threshold. It is essential for identifying long-running queries that may be causing performance bottlenecks.

OCI Logging Analytics:

By integrating the slow query log with OCI Logging Analytics, users can visualize query performance patterns, generate alerts, and identify the root cause of slow performance. This combination is powerful for detecting and addressing query-specific issues.

Why the other options are incorrect:

- * A: OCI Vault is used for managing encryption keys, not query performance.
- * B: OCI Events track general occurrences, not detailed query performance.
- * D: Network latency analysis is useful but not directly related to query analysis.

* E:OCI Bastion provides secure access, not performance analytics.

問題 #24

Oracle NoSQL Database Cloud Service supports operations on data based on keys. Which of the following best describes how data is primarily accessed and retrieved within this model?

- A. Data is searched based on the content of the values using full-text indexing and complex search queries.
- B. Data is retrieved by traversing relationships between interconnected nodes in a graph structure.
- **C. Data is primarily accessed using the unique key associated with the desired data item.**
- D. Data is accessed using structured query language (SQL) with joins and complex filtering conditions.
- E. Data is accessed through a predefined schema that dictates how data is organized and queried.

答案: C

解題說明:

C: Accessing data using the unique key:

- * Oracle NoSQL Database Cloud Service follows a key-value data model.
- * Data is accessed directly using a unique key, which is highly efficient for lookups.
- * The value associated with the key can be simple or complex (e.g., JSON objects).
- * Provides fast read and write operations.

Why the other options are incorrect:

- * A. SQL with joins: Typical of relational databases, not NoSQL.
- * B. Graph traversal: Relevant to graph databases, not key-value stores.
- * D. Full-text indexing: Not the primary access method in key-value databases.
- * E. Predefined schema: NoSQL databases generally support schema-less data storage.

問題 #25

Which two prerequisites are required before you can provision a MySQL HeatWave DB system?

- A. An OCI Compute instance to act as a client for the MySQL DB system.
- **B. A Virtual Cloud Network (VCN) with appropriately configured subnets.**
- **C. A MySQL Enterprise Edition license.**
- D. A configured OCI Vault with encryption keys for database security.
- E. A pre-configured MySQL database dump for initial data loading.

答案: B,C

解題說明:

VCN Requirement (B):

A Virtual Cloud Network (VCN) with appropriate subnets is essential to provide network connectivity and isolation for the HeatWave DB system. It ensures secure data flow within the Oracle Cloud Infrastructure.

License Requirement (E):

Since HeatWave is an enterprise feature, it requires a MySQL Enterprise Edition license. Without this license, the HeatWave functionalities cannot be utilized.

Why the other options are incorrect:

- * A: Data loading can be performed post-provisioning.
- * C: While encryption can be configured, it is not a prerequisite.
- * D: An OCI Compute instance may be used as a client but is not mandatory for provisioning.

問題 #26

In a key-value NoSQL database, what is the primary mechanism for accessing data?

- **A. Using a unique key to retrieve the associated value directly.**
- B. Traversing relationships between nodes to find related data.
- C. Scanning all documents in the database to find matching data.
- D. Using SQL queries to filter and retrieve data based on complex criteria.

答案： A

解題說明：

Data Access in Key-Value Stores:

A key-value database works by storing data as key-value pairs. The primary access method involves:

- * Providing a unique key to quickly retrieve the associated value.
- * This model is highly efficient for simple lookups and data retrieval where the key is known.
- * Due to its simplicity and speed, it is commonly used for caching and session management.

Why the other options are incorrect:

- * A: SQL queries are used in relational databases, not key-value stores.
- * C: Traversing nodes is typical in graph databases.
- * D: Scanning all documents is inefficient and not the primary method in key-value stores.

問題 #27

Which characteristic is MOST indicative of an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) virtual machine (VM) deployment compared to using Autonomous Database?

- A. Shared Exadata infrastructure with other tenants for cost optimization.
- B. Automatic scaling of compute and storage resources based on workload demands.
- C. Direct control over the operating system and database configuration.
- D. Automated patching and upgrades handled by Oracle.

答案： C

解題說明：

Direct Control in BaseDB VM:

In a BaseDB VM deployment, users have root-level access to the operating system and can directly manage the database configuration. This contrasts with Autonomous Database, where Oracle handles most administrative tasks, including patching and resource scaling.

- * BaseDB VM offers flexibility for custom configurations and control over OS-level operations.
- * This is particularly useful for environments requiring custom scripts, configurations, or database tuning.

Why the other options are incorrect:

- * A: Autonomous Database features automatic patching, not BaseDB VM.
- * B: Exadata infrastructure is typically associated with Autonomous Database rather than VM-based BaseDB.
- * D: Automatic scaling is a feature of Autonomous Database, not BaseDB.

問題 #28

.....

成千上萬的IT考生通過使用我們的產品成功通過考試，Oracle 1z0-1093-25考古題質量被廣大考試測試其是高品質的。我們從來不相信第二次機會，因此給您帶來的最好的Oracle 1z0-1093-25考古題幫助您首次就通過考試，並取得不錯的成績。Testpdf網站幫助考生通過1z0-1093-25考試獲得認證，不僅可以節約很多時間，還能得到輕鬆通過1z0-1093-25考試的保證，這是IT認證考試中最重要的考試之一。
