## Demo JN0-363 Test | Latest JN0-363 Test Questions

Considering current situation, we made a survey and find that most of the customers are worried about their privacy disclosure. Here our JN0-363 exam prep has commitment to protect every customer' personal information. About customers' privacy, we firmly safeguard their rights and oppose any illegal criminal activity with our JN0-363 Exam Prep. We promise to keep your privacy secure with effective protection measures if you choose our JN0-363 exam question. Given that there is any trouble with you, please do not

hesitate to leave us a message or send us an email; we sincere hope that our JN0-363 test torrent can live up to your expectation.

Juniper JN0-363 exam is a certification exam designed for individuals who want to specialize in service provider routing and switching. JN0-363 exam is commonly referred to as the JNCIS-SP exam and is part of the Juniper Networks Certification Program. Service Provider Routing and Switching, Specialist (JNCIS-SP) certification is recognized globally and validates the knowledge and skills required to work with Juniper Networks devices in a service provider environment.

The JN0-363 Exam is intended to test the knowledge and skills of candidates in areas such as BGP, OSPF, IS-IS, MPLS, Layer 2 VPNs, Layer 3 VPNs, and other related topics. JN0-363 exam is not easy, and it requires a significant amount of preparation and study time to pass successfully.

## **Juniper Service Provider Routing and Switching, Specialist (JNCIS-SP) Sample Questions (Q24-Q29):**

### **NEW QUESTION # 24**

You are adding an IPv6 configuration to an Interface on a Junos device.

In this scenario, which statement is correct?

- A. The link local address is automatically created using the MAC address within the fe80::/10 prefix range.
- B. The link local address is automatically created using the MAC address within the fd00::/8 prefix range.
- C. The link local address must be manually configured within the fe80::/10 prefix range.
- D. The link local address must be manually configured within the fd00::/8 prefix range.

**Answer: A**

Explanation:

IPv6 link-local addresses are automatically generated for each interface and have a prefix of fe80::/10. The interface's MAC address is typically used as part of the process to create the Interface Identifier (IID) in the link-local address, following the EUI-64 format.

### **NEW QUESTION # 25**

You are adding nonforwarding route reflectors to your network. Which three actions ensure that VPN routes are advertised properly? (Choose three.)

- A. Add the route reflectors to the same IGP domain as their clients.
- B. Add MPLS LSPs between the route reflectors and their client routers.
- C. Use rib-groups to add VPN routes to inet.0 and/or inet6.0 on the route reflectors.
- D. Use rib-groups to add IGP routes to inet.3 and/or inet6.3 on the route reflectors.
- E. Add a static default route to inet.3 and/or inet6.3 on the route reflectors.

**Answer: B,D,E**

### **NEW QUESTION # 26**

Click the Exhibit.

```
[edit]
user@router# show policy-options
policy-statement next-hop-self {
    term 1 {
        from {
            protocol bgp;
            neighbor 10.10.25.5;
        }
        then {
            next-hop self;
        }
    }
}
```

JUNIPER  
NETWORKS

Your router has an external peering session to 10.10.25.5 and several internal peers. However, routes learned from EBGP peers are showing up in a hidden state on IBGP peers.

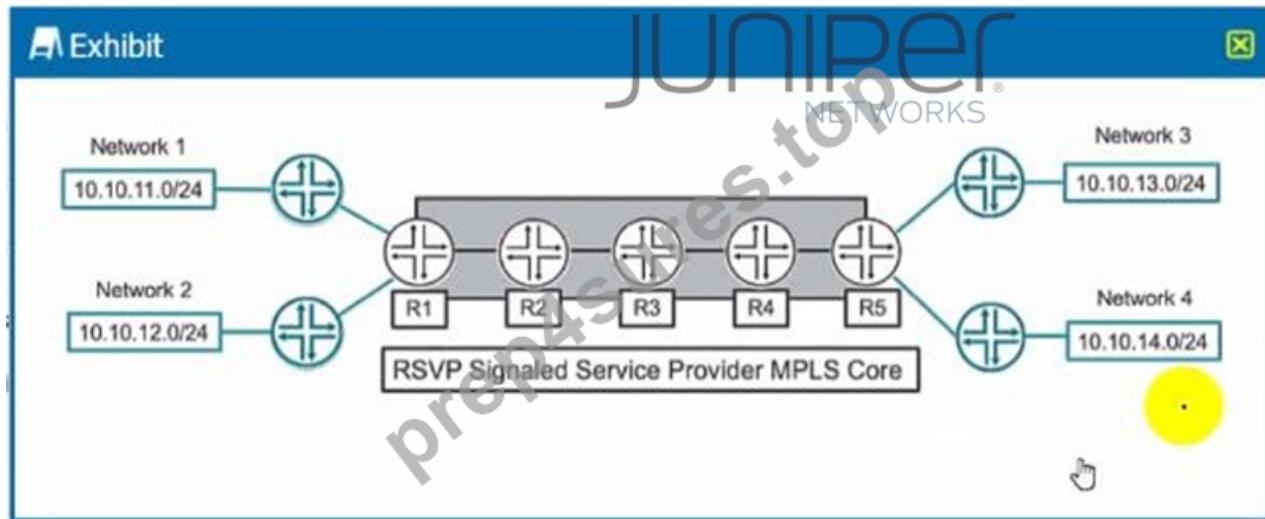

Where would you apply the policy shown in the exhibit to solve this issue?

- A. Apply the next-hop-self as an import policy to the internal BGP peers.
- B. **Apply the next-hop-self as an export policy to the internal BGP peers.**
- C. Apply the next-hop-self as an export policy to the external BGP peers.
- D. Apply the next-hop-self as an import policy to the external BGP peers.

**Answer: B**

#### NEW QUESTION # 27

Exhibit

Which two statements are correct about the service provider MPLS network shown in the exhibit? (Choose two.)

- A. R3 is considered a transit router.
- B. R3 is considered a PE router.
- C. R3 is considered an ingress router.
- D. **R3 is considered a P router.**

**Answer: A,D**

#### NEW QUESTION # 28

You have created a routing instance named vr3 that will provide access to Server 2 (10.0.0.2) (or the hosts on the 10.10.10.0/24 network. Which command would you use to test connectivity between vr3 and Server 2?

- A. user@router1> ping 10.0.0.2 routing-instance vr3 count 5
- B. **user@router1> ping 10.0.0.2 count 5**
- C. user@vr3> ping 10.0.0.2 count 5 source 10.10.10.1

- D. user@vr3> ping 10.0.0.2 count 5

**Answer: B**

## NEW QUESTION # 29

Prep4sures Juniper JN0-363 Practice Test give you the opportunity to practice for the Juniper JN0-363 new exam questions. By using Juniper Practice Test, you can get the ideal possibility to know the actual Service Provider Routing and Switching, Specialist (JNCIS-SP) exam, as they follow the same interface as the real exam. This way, you can become more confident and comfortable while taking the actual exam.
