

New Drupal-Site-Builder Test Blueprint, Valid Drupal-Site-Builder Test Blueprint

Sample Test Blueprint

Example of a Test Blueprint for Dental Hygiene 101 Pre and Post Assessment

Program Objective/ Learning Outcome	Course Objective/ Learning Outcome	Bloom's Taxonomy Classification*	Number of Test Items	Point Value	% Weight of Test
An ability to apply knowledge of dental hygiene to personal care	identifies active ingredient in toothpaste	Knowledge	1	2	2.4
	Explains why teeth should be cleaned at least twice per year	Comprehension	1	4	4.7
	relates poor dental hygiene to poor overall health	Analysis	2	12	14.1
---	---	---	---	---	---
TOTALS			23	85	100

*Classification of Learning
Note: Other learning classifications may be used in accordance with a program's accreditation standards.
Number of Test Items and Point Values are determined by faculty.

In order to meet the different need from our customers, the experts and professors from our company designed three different versions of our Drupal-Site-Builder exam questions for our customers to choose, including the PDF version, the online version and the software version. Though the content of the Drupal-Site-Builder Study Materials is the same, but the displays are totally different to make sure that our customers can study our Drupal-Site-Builder learning guide at any time and condition.

We provide top quality verified Drupal-Site-Builder certifications preparation material for all the Drupal-Site-Builder exams. Our Drupal-Site-Builder certified experts have curated questions and answers that will be asked in the real exam, and we provide money back guarantee on Drupal-Site-Builder Preparation material. Moreover, we also offer Drupal-Site-Builder desktop practice test software that will help you assess your skills before real Acquia exams.

Valid Acquia Drupal-Site-Builder Test Blueprint & Drupal-Site-Builder Exam Labs

Subjects are required to enrich their learner profiles by regularly making plans and setting goals according to their own situation, monitoring and evaluating your study. Because it can help you prepare for the Drupal-Site-Builder exam. If you want to succeed in your exam and get the related exam, you have to set a suitable study program. If you decide to buy the Drupal-Site-Builder Study Materials from our company, we will have special people to advise and support you. Our staff will also help you to devise a study plan to achieve your goal.

Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 Sample Questions (Q20-Q25):

NEW QUESTION # 20

You have installed a contributed module called "Sample Module" that looks like it will be a great fit for the business case you are trying to solve. However, upon closer examination, it looks like the module only supplies a drush command; it does not have an admin interface.

As a site builder with no command-line experience, this will not work for you! You need a web user interface to use this module. How should you request a web UI in the module's issue queue?

- A. Create a "Plan" issue for the module with the subject line, "Create web UI for Sample Module."
- **B. Create a "Feature Request" issue for the module with the subject line, "Create web UI for Sample Module."**
- C. Create a "Feature Request" issue for the module with the subject line, "URGENT: Module Broken!!!Needs UI."
- D. Create a "Bug Report" issue for the module with the subject line, "Create web UI for Sample Module."

Answer: B

Explanation:

Drupal's issue queue guidelines clearly distinguish between different issue types. A Bug Report is used when existing functionality is

broken or not working as intended. In this case, the module is functioning correctly- it simply does not provide a UI-so option A is incorrect.

A Feature Request is the correct issue type when asking for new functionality or enhancements to an existing module. Requesting a web-based UI for a module that currently only provides Drush commands is a classic example of a feature enhancement, making option C correct.

Option B ("Plan") is typically used for outlining larger initiatives or coordinated development efforts, not for requesting a specific feature. Option D is incorrect because Drupal issue queue best practices emphasize clear, descriptive, and professional issue titles, avoiding urgency or misleading wording like "Module Broken!!!" when it is not actually broken.

Drupal.org documentation encourages contributors to categorize issues properly and write clear, concise summaries so maintainers and the community can effectively review and respond. Therefore, submitting a Feature Request with a clear subject line is the correct and recommended approach.

NEW QUESTION # 21

You manage a popular news portal which has a very busy comments section. You've been asked to add several new fields and a View for the news area of a site. The QA team wants to review your work in staging before rolling everything out to production at once. The editorial team has specified that the site's comments activity should not be affected by these changes.

How can you meet these requirements without having to create the new functionality independently in both environments?

- A. Copy the production database into the staging environment. Create the fields and View there. Once QA is satisfied, copy the staging database into the production environment.
- B. Configuration created in the staging environment is automatically available to the production environment since they share a database.
- C. Create the fields and View in a fresh installation of Drupal core. Export the site configuration into your site's existing codebase, push the code to the staging environment, and import the site configuration there. Once QA is satisfied, repeat the process in production.
- **D. Create the fields and View in a development copy of the site. Export the site configuration to code. Push that code to the staging environment and import the site configuration there. Once QA is satisfied, repeat the process in production.**

Answer: D

Explanation:

Drupal's configuration management system is specifically designed to move site configuration -such as content types, fields, vocabularies, and Views-between environments by exporting configuration to files and then importing it elsewhere. Drupal documentation explicitly describes configuration as the administrative settings that determine how the site functions, and it lists fields and views as examples of configuration.

That makes option D the correct workflow: build the new fields and View on a development copy of the site, export the configuration to code, deploy that code to staging, import it for QA review, and then repeat the import in production after approval. This preserves live editorial activity such as comments, because comments are site content, not configuration, and configuration deployment avoids overwriting production content with a copied database.

Option A is risky because copying the staging database back to production could overwrite live comments and other newly created production content. Option B is false because staging and production do not automatically share configuration through one database in a normal deployment workflow. Option C is inferior because configuration should be created from a development copy of the actual site, where the existing modules, schema, and site setup already match the target environments.

NEW QUESTION # 22

What are the new features built into Drupal 10 core?

- A. Webforms, Web Tokens, Page Rules, User Profiles
- B. User Groups, Taxonomy Access Control, Flags, Social Media Integration
- **C. Decoupled Menu, Starterkit for theme, Improved Layout Builder, CKEditor5**
- D. SEO Tools, Analytics, Social Sharing, Single Sign On (SSO)

Answer: C

Explanation:

Drupal 10 introduced several important enhancements and modernizations in core, focusing on improving developer experience, site building, and front-end capabilities. One of the most significant updates is the replacement of CKEditor 4 with CKEditor 5, which provides a modern editing experience and better extensibility.

Drupal 10 also includes the Starterkit theme generator, which replaces older base themes and allows developers to create custom

themes more cleanly and maintainably. Additionally, improvements were made to Layout Builder , enhancing usability and flexibility for managing layouts without requiring custom code. Drupal continues to support decoupled/Headless architectures using built-in APIs like JSON:API, and improvements in this area are reflected in Drupal 10's capabilities. The other options list features typically provided by contributed modules , not Drupal core. For example, Webforms, SEO tools, social sharing, and flags are not part of Drupal core and must be added separately. Thus, option A correctly represents features and improvements included in Drupal 10 core.

NEW QUESTION # 23

You are building a gaming site where users are teamed based on their favorite weapon. How will you provide the ability for users to select their favorite weapon?

- **A. In Account settings, go to Manage fields and add field for "Favorite weapon"**
- B. Create a Content Type "Users" which has "Favorite Weapon" field. Use the content type as user profiles.
- C. Create a Content Type "Weapons" and create a view. Show this view on /user.
- D. Create a vocabulary with a list of weapons as terms and check the "Display on user profile" checkbox.

Answer: A

Explanation:

In Drupal 10 and Drupal 11, user accounts are fieldable entities , which means you can add custom fields directly to user accounts through the administrative UI. Drupal's field documentation explains that fields can be added to various entity types, including users , not just content types. So if you want each user to choose a favorite weapon, the correct site-building approach is to add a field such as Favorite weapon to the User entity using the Manage fields interface for user accounts. This makes option A correct. This approach is also flexible. The field could be a plain list, an entity reference, or a taxonomy term reference if the site needs a controlled list of weapons. The important point is that the selection belongs to the user profile/account , because the requirement is about storing a preference for each user.

The other options are not the correct primary solution. Option B creates taxonomy terms but does not by itself provide the user-selection field. Option C uses content and Views instead of storing a value on user accounts. Option D is incorrect because Drupal users are not modeled as a content type. Therefore, adding a field to user accounts is the proper Drupal-native solution.

NEW QUESTION # 24

Your site has three Content types with a Media reference field. The field is configured to Media type as Image. You noticed that some users are adding animated GIF files while adding the content, which are very distracting. How can you disallow adding files with .gif extension on all the Content types which use the Media reference field?

- A. Edit the Content types and disallow .gif extension in the Media reference field settings.
- B. Edit the Content types and update Media field settings in Manage form display tab.
- C. Edit the Media type Image and update media type settings to disallow .gif files.
- **D. Edit the Media type Image and remove gif from "image" field settings in the Manage fields tab.**

Answer: D

Explanation:

Because all three content types use a Media reference field that allows the Image media type , the actual uploaded file restrictions are controlled by the source field on the Media type , not by each content type's reference field. In Drupal, the Image media type contains an image field as its source field, and image/file fields have settings such as allowed file extensions . Drupal's Image module documentation states that image fields can be configured with settings including allowed extensions . Therefore, to block GIF uploads everywhere this Image media type is used, you edit the Image media type , go to Manage fields , edit its image source field , and remove gif from the allowed extensions. Since all three content types reference that same media type, the restriction applies consistently across all of them. This is the most efficient and Drupal-native solution. Option A is incorrect because the media reference field on a content type controls which media types may be referenced, not which file extensions the media type's source field accepts. Option C concerns form widget display, not file validation. Option D is too general; the actual extension restriction lives on the image field settings within the media type.

NEW QUESTION # 25

.....

PassSureExam has put emphasis on providing our Drupal-Site-Builder exam questions with high quality products with high passing rate. Many exam candidates are uninformed about the fact that our Drupal-Site-Builder preparation materials can help them with higher chance of getting success than others. It is all about efficiency and accuracy. And what is more charming than our Drupal-Site-Builder Study Guide with a passing rate as 98% to 100%? The answer is no. Our Drupal-Site-Builder practice quiz is unique in the market.

Valid Drupal-Site-Builder Test Blueprint: <https://www.passsureexam.com/Drupal-Site-Builder-pass4sure-exam-dumps.html>

It is well known that Adobe Valid Drupal-Site-Builder Test Blueprint certification training is experiencing a great demand in IT industry area, With the help of latest and authentic Valid Drupal-Site-Builder Test Blueprint - Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 dumps exam questions, you can find the best Valid Drupal-Site-Builder Test Blueprint - Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 exam preparation kit here and you will also get the 100% guarantee for passing the Acquia Valid Drupal-Site-Builder Test Blueprint exam, So you do not have to spend plenty of time on the Drupal-Site-Builder test dumps: Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 with the method like head of the thigh, cone beam.

Continuous quality assurance, which provides superior Valid Drupal-Site-Builder Test Blueprint solutions using efficient, predictable techniques, Do you have questions or inquiries about our products, It is well known that Drupal-Site-Builder Exam Vce Adobe Drupal 10/11 certification training is experiencing a great demand in IT industry area.

PassSureExam: Your Reliable Acquia Drupal-Site-Builder Exam Companion

With the help of latest and authentic Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 dumps exam questions, Drupal-Site-Builder you can find the best Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 exam preparation kit here and you will also get the 100% guarantee for passing the Acquia exam.

So you do not have to spend plenty of time on the Drupal-Site-Builder test dumps: Acquia Certified Drupal Site Builder Exam for Drupal 10, 11 with the method like head of the thigh, cone beam, If you have not any sufficient experience in test or you are taking test at your first try, our Drupal-Site-Builder test engine will be your good helper in the way to success.

Our Drupal-Site-Builder exam materials give real exam environment with multiple learning tools that allow you to do a selective study and will help you to get the job that you are looking for.
