ServiceNow learning site

ServiceNow CIS-Discovery Certification is ideal for IT professionals who are interested in working with ServiceNow Discovery and want to gain an in-depth understanding of its features and functionality. Certified Implementation Specialist - Discovery certification validates the knowledge and skills required to configure and manage ServiceNow Discovery in a variety of environments, including on-premise and cloud-based environments.

Introduction to Certified Implementation Specialist - Discovery (CIS Discovery) Exam

ServiceNow Accredited Deployment Expert - Exploration is open to ServiceNow clients, associates, staff, and those involved in being a ServiceNow Implementer or Administrator. Exam questions are focused on the official teaching materials of ServiceNow, the ServiceNow documentation site, and the ServiceNow developer site. Research materials shared publicly elsewhere. If you have been accredited as a ServiceNow, you will achieve market appreciation, comparative distinction, improved efficiency and performance, increased customer group loyalty, and a concrete indicator of your educational expenditure.

Demand for ServiceNow developers is rising. ServiceNow qualification offers members the expertise and trust to take full advantage of the ServiceNow platform. Throughout the training and qualification programs, learners can create apps by designing application tables, constructing and implementing forms, controlling the direction, and incorporating workflows into apps.

CIS Discovery exam test Material is split into Learning Realms that agree on important topics and events usually experienced during ServiceNow implementations. Specific learning goals have been established and evaluated in each Learning Domain. The learning realms, weightings, and sub-skills were assessed by this analysis, and the percentage of questions represented in each portion.

The ServiceNow Accredited Deployment Specialist-Discovery Test certifies that a qualified applicant has the expertise and experience required to contribute to the configuration, management, implementation, and help of unique Discovery applications on the ServiceNow network.

Pass Guaranteed 2026 ServiceNow CIS-Discovery: Authoritative Certified Implementation Specialist - Discovery Pdf Files

With the help of our CIS-Discovery training guide, your dream won't be delayed anymore. Because, we have the merits of intelligent application and high-effectiveness to help our clients study more leisurely on our CIS-Discovery practice questions. If you prepare with our Certified Implementation Specialist actual exam for 20 to 30 hours, the exam will become a piece of cake in front of you. And the pass rate of our CIS-Discovery learning guide is high as 98% to 100%, you will be satisfied with it if you buy it.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q119-Q124):

NEW QUESTION # 119

It is advisable for a MID Server to have access to _____ .

Response:

- A. install.servicenow.com
- B. **install.service-now.com**
- C. servicenow.com
- D. docs.servicenow.com

Answer: B

NEW QUESTION # 120

Which are the core CMDB Tables in ServiceNow.

Response:

- A. cmdb_core_rel_ci
- B. **cmdb_ci**
- C. **cmdb_rel_ci**
- D. cmdb_core_ci

Answer: B,C

NEW QUESTION # 121

What related list on a classifier dictates which Horizontal Pattern probe is launched?

- A. Discovery Log
- B. Classification Criteria
- C. Triggers probes
- D. Pattern probes

Answer: C

Explanation:

A classifier is a set of rules that identifies a device type based on the results of a probe. A classifier can have one or more related lists that define the classification criteria, the pattern probes, and the triggers probes. The pattern probes related list specifies which horizontal discovery pattern to run for the device type. The triggers probes related list specifies which probes to run after the device is classified, and before the horizontal discovery pattern is executed. The triggers probes can be used to gather additional information or credentials that are needed for the horizontal discovery pattern¹².

NEW QUESTION # 122

For the Parse Variable pattern operation, what is required to have two different parsing methods to populate variables?

- A. Two different Debug Mode sessions.
- B. Two different steps.
- C. Two different Define Parsing selections on the same step.
- D. A tabular and a scalar variable.

Answer: C

NEW QUESTION # 123

For the Parse Variable pattern operation, what is required to have two different parsing methods to populate variables?

- A. Two different steps.
- B. Two different Debug Mode sessions.
- C. Two different Define Parsing selections on the same step.
- D. A tabular and a scalar variable.

Answer: A

Explanation:

The Parse Variable pattern operation allows you to extract information from the output of a previous operation and save it in a variable. You can choose from different parsing methods, such as JSON File, XML File, Regular Expression, or Custom Script. To have two different parsing methods to populate variables, you need to use two different steps, each with a different Define Parsing selection. For example, you can use one step to parse a JSON file and another step to parse an XML file. You cannot use two different parsing methods on the same step, as the Define Parsing selection is unique for each step.
