100% Pass Salesforce-Data-Cloud - Salesforce Data Cloud Accredited

Professional Exam –Valid Valid Exam Testking

Our Salesforce-Data-Cloud real exam helps you not only to avoid all the troubles of learning but also to provide you with higher learning quality than other students'. At the same time, our Salesforce-Data-Cloud exam materials have been kind enough to prepare the App version for you, so that you can download our Salesforce-Data-Cloud practice prep to any electronic device, and then you can take all the learning materials with you and review no matter where you are.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q114-Q119):

NEW QUESTION # 114

How does Data Cloud handle an individual's right to be forgotten?

- A. Deletes the specified Individual and records from any DMO/DLO related to the Individual.
- **B. Deletes the specified Individual and records from any DSO mapped to the Individual DMO.**
- C. Deletes the specified Individual record and its Unified Individual Link record.
- D. Deletes the records from all DSOs and any downstream DMOs are updated at the next scheduled ingestion.

Answer: B

Explanation:

Explanation

This is how Data Cloud handles an individual's right to be forgotten. It deletes the individual record from the Individual data model object (DMO) and any related records from the data stream objects (DSOs) that are mapped to it.

NEW QUESTION # 115

A consultant is planning the ingestion of a data stream that has profile information including a mobile phone number.

To ensure that the phone number can be used for future SMS campaigns, they need to confirm the phone number field is in the proper E164 Phone Number format. However, the phone numbers in the file appear to be in varying formats.

What is the most efficient way to guarantee that the various phone number formats are standardized?

- A. Create a formula field to standardize the format.
- B. Create a calculated insight after ingestion.
- C. Edit and update the data in the source system prior to sending to Data Cloud.
- **D. Assign the PhoneNumber field type when creating the data stream.**

Answer: D

Explanation:

The most efficient way to guarantee that the various phone number formats are standardized is to assign the PhoneNumber field type when creating the data stream. The PhoneNumber field type is a special field type that automatically converts phone numbers into the E164 format, which is the international standard for phone numbers. The E164 format consists of a plus sign (+), the country code, and the national number. For example, +1-202-555-1234 is the E164 format for a US phone number. By using the PhoneNumber field type, the consultant can ensure that the phone numbers are consistent and can be used for future SMS campaigns.

The other options are either more time-consuming, require manual intervention, or do not address the formatting issue. References: Data Stream Field Types, E164 Phone Number Format, Salesforce Data Cloud Exam Questions

NEW QUESTION # 116

Which data model subject area should be used for any Organization, Individual, or Member in the Customer 360 data model?

- A. Membership
- B. Individual
- C. Global Account
- **D. Party**

Answer: D

Explanation:

Explanation

The party subject area should be used for any organization, individual, or member in the Customer 360 data model. It includes information such as name, address, email, phone, and loyalty membership.

NEW QUESTION # 117

Which data model subject area defines the revenue or quantity for an opportunity by product family?

- A. Sales Order
- B. Product
- C. Engagement
- D. Party

Answer: A

Explanation:

The sales order subject area defines the revenue or quantity for an opportunity by product family. It also includes information about the opportunity stage, close date, and owner. References:

NEW QUESTION # 118

Which data stream category should be assigned to use the data for time-based operations in segmentation and calculated insights?

- A. Individual
- B. Engagement
- C. Sales Order
- D. Transaction

Answer: D

Explanation:

The transaction data stream category should be assigned to use the data for time-based operations in segmentation and calculated insights. This category indicates that the data stream contains events that occur at a specific point in time and have a duration.
