BCS Practitioner Certificate in Business Analysis Practice v5.0 Sample Questions (Q26-Q31):

NEW QUESTION # 26

BuildCo is small building company with the stall. The owner to reduce time spent on administration by simplifying the company's paperwork. This paperwork includes provides quotes and invoices, as well as managing orders and receipts for building materials. Most of the paperwork is completed manually and copies are stored in filing cabinets. However, quotes and invoices are produced on a word processor and the stored on a computer, with printed copies also stored in the filing cabinets. The owner is not sure that all the current paperwork is necessary.

Which investigation technique would be MOST effective in establishing the need for item of paperwork?

- A. Workshop
- B. Questionnaire
- C. Document Analysis
- D. Interviews

Answer: C

Explanation:

Document analysis is a technique for collecting information from existing documents within an organisation or project. It helps to understand the current situation or problem and identify any gaps or issues that may exist. Therefore, option D is the correct answer, as document analysis would be the most effective technique in establishing the need for each item of paperwork. Document analysis would help to review the content and purpose of each item of paperwork and compare it with the organisation's objectives and requirements. Document analysis would help to evaluate the usefulness and relevance of each item of paperwork and identify any duplication or redundancy that may exist. Document analysis would help to recommend any changes or improvements to each item of paperwork and justify them with evidence and rationale. Option A is not a correct answer, as questionnaire is not the most effective technique in establishing the need for each item of paperwork. Questionnaire is a technique for collecting information from stakeholders by asking them predefined questions in written form. It helps to elicit quantitative or qualitative data from a large number of stakeholders in an efficient and consistent way. Questionnaire would not be the most effective technique in establishing the need for each item of paperwork, as it may not provide enough detail or explanation for each item of paperwork and may be influenced by stakeholder bias or preference. Option B is not a correct answer, as workshop is not the most effective technique in establishing the need for each item of paperwork. Workshop is a technique for conducting group discussions and activities with stakeholders to elicit, analyse, validate and prioritise their views and needs. It helps to facilitate effective communication and collaboration among stakeholders and resolve conflicts or issues. Workshop would not be the most effective technique in establishing the need for each item of paperwork, as it may not be practical or feasible to involve all relevant stakeholders in a workshop and may be affected by stakeholder dynamics or politics. Option C is not a correct answer, as interviews are not the most effective technique in establishing the need for each item of paperwork. Interviews are a technique for collecting information from stakeholders by asking them open-ended questions in verbal form. It helps to elicit rich and detailed information from individual stakeholders in an interactive and flexible way. Interviews would not be the most effective technique in establishing the need for each item of paperwork, as it may be time-consuming and costly to interview all relevant stakeholders and may be subject to stakeholder interpretation or opinion.

NEW QUESTION # 27

Adiyan has been considering the feasibility of introducing a new payments method into his company His draft report reads 'The new payment method has not yet been widely adopted although it has the backing of all the big phone brands. Our current payments system will be upgraded next month to take payment as part of a scheduled release This method of payment will be supported under our current license deal Trials have shown that the technology will scale to our customer base and cyber security testing is encouraging' Which of the following is the BEST description of the areas of Technical feasibility mentioned in the report?

- A. Proven. Compatible, Secure. Scalable
- B. Timely, Reliable, Proven, Architectural Alignment
- C. Reliable. Compatible, Secure. Architectural Alignment

- D. Timely, Compatible, Secure, Scalable

Answer: A

Explanation:

Explanation

Technical feasibility is the extent to which a proposed business change or solution is possible and realistic from a technical perspective. It helps to assess whether a proposed business change or solution can be developed, implemented and maintained using the available or required technology. Therefore, option A is the correct answer, as it describes the areas of technical feasibility mentioned in the report. Proven is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution has been tested and verified by previous or existing users or applications. It helps to ensure reliability and quality of the technology. An example of proven in the report is the new payment method has not yet been widely adopted although it has the backing of all the big phone brands. Compatible is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can work or integrate with other existing or required technologies. It helps to ensure interoperability and functionality of the technology. An example of compatible in the report is our current payments system will be upgraded next month to take payment as part of a scheduled release. Secure is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can protect or prevent unauthorised access, use, modification or disclosure of data or information. It helps to ensure confidentiality, integrity and availability of the technology. An example of secure in the report is cyber security testing is encouraging.

Scalable is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can handle or adapt to changes in demand, volume or performance. It helps to ensure efficiency and flexibility of the technology. An example of scalable in the report is trials have shown that the technology will scale to our customer base. Option B is not a correct answer, as it does not describe all the areas of technical feasibility mentioned in the report. Timely is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can be developed, implemented and maintained within the available or required time frame. It helps to ensure punctuality and speed of the technology. There is no example of timely in the report. Option C is not a correct answer, as it does not describe all the areas of technical feasibility mentioned in the report. Reliable is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can perform consistently and accurately without errors or failures. It helps to ensure dependability and accuracy of the technology. There is no example of reliable in the report. Architectural alignment is an area of technical feasibility that relates to whether the technology used for the proposed business change or solution can fit or align with other existing or required architectures, such as business, data or application architectures. It helps to ensure consistency and coherence of the technology. There is no example of architectural alignment in the report. Option D is not a correct answer, as it does not describe any of the areas of technical feasibility mentioned in the report.

NEW QUESTION # 28

End users in one business area are unwilling to adopt a new finance management system (recently introduced by the innovation team), as they perceive that it is unnecessarily complicated and not useful. One of the end users in this business area has been very vocal and has been relying support from others since posting about it on the company's intranet homepage.

The introduction finance system was initially supported by senior managers, but now users in other business area are also beginning to question whether they adopt the tool and are raising the issue with their managers.

The sponsor fully supports the decision to go ahead with the now tool and has made it very clear to senior managers that he expects them to support this Initiative.

Which stakeholder management strategy SHOULD be taken with the senior managers?

- A. Watch
- **B. Constant active management**
- C. Keep onside.
- D. Keep informed

Answer: B

Explanation:

The stakeholder management strategy for senior managers should be constant active management. Senior managers have high power and high interest in the project, as they are responsible for overseeing its implementation and ensuring its alignment with organizational goals. They also have influence over other stakeholders, such as end users and employees. Therefore, they need to be regularly engaged, consulted, informed, and involved in decision making throughout the project lifecycle. Option B is the correct answer.

NEW QUESTION # 29

The directors of Swift Despatch believe they might be able to improve their service and reduce costs by opening a distribution centre in Coventry. A team has been created to investigate this further, including representatives of logistics, property and marketing. Yasmin has been asked to advise on how the Business Case should be progressed at this point.

What SHOULD she advise?

- A. Confirm with the directors the costs and benefits
- **B. Create a high level Business Case**
- C. Create a detailed Business Case
- D. It is too early to work on the Business Case

Answer: B

Explanation:

Explanation

A high level Business Case is a document that provides a preliminary rationale and justification for a proposed business change or solution. It helps to establish the feasibility and desirability of the project and secure initial approval and funding for further investigation and development. Therefore, option A is the correct answer, as creating a high level Business Case would be the best activity to undertake at this point for introducing a new procurement system. A high level Business Case would help to define the problem or opportunity that motivates the project, identify and compare different procurement solutions based on their expected benefits, costs, risks and impacts, and recommend the preferred option for further analysis and evaluation. A high level Business Case would provide a solid foundation for proceeding with the project and preparing a detailed Business Case later on. Option B is not a correct answer, as creating a detailed Business Case would not be an appropriate activity to undertake at this point for introducing a new procurement system. A detailed Business Case is a document that provides a comprehensive rationale and justification for a proposed business change or solution. It helps to confirm the viability and worthiness of the project and secure final approval and funding for implementation and delivery. A detailed Business Case would require conducting extensive research and analysis on the preferred procurement solution and presenting its definitive benefits, costs, risks and impacts. A detailed Business Case would be premature and unnecessary at this point, as it would depend on the outcome of the high level Business Case first. Option C is not a correct answer, as it is too early to work on the Business Case would not be an appropriate activity to undertake at this point for introducing a new procurement system. Working on the Business Case is an essential activity for any project that involves significant business change or investment. It helps to provide evidence and support for the project and ensure its alignment with the organisation's strategy and objectives. Working on the Business Case would not be too early at this point, as it would help to establish the feasibility and desirability of the project and secure initial approval and funding for further investigation and development. Option D is not a correct answer, as confirming with the directors the costs and benefits would not be an appropriate activity to undertake at this point for introducing a new procurement system. Confirming with the directors the costs and benefits would require preparing a high level Business Case first to estimate and compare the financial implications of different options and recommend the best one for further development and implementation. Confirming with the directors the costs and benefits without preparing a high level Business Case first would risk providing inaccurate or incomplete information that may not reflect the value or feasibility of the project.

NEW QUESTION # 30

Jayon has been asked to explain the gap analysis process to a new colleague. Which THREE of the following SHOULD Jayon cover?

- **A. Consider possible actions to address the gaps**
- **B. Compare the desired situation and existing situation**
- C. Deliver the solution to close the gaps
- D. Define the solutions to close the gaps
- **E. Understand the existing situation**

Answer: A,B,E

Explanation:

Gap analysis is a process of identifying and assessing the differences between the current state and desired state of an organisation or project. It helps to determine what needs to be done to achieve business objectives or solve business problems. Gap analysis typically involves three main steps: understand the existing situation, compare the desired situation and existing situation, and consider

possible actions to address the gaps. Therefore, options A, B and C are correct answers, as they cover these steps in gap analysis. Option D is not a correct answer, as defining solutions to close gaps is not part of gap analysis itself, but rather a subsequent step that follows gap analysis. Gap analysis helps to identify what needs to be done, but not how it should be done. Option E is not a correct answer, as delivering solutions to close gaps is not part of gap analysis itself, but rather a final step that follows defining solutions. Gap analysis helps to identify what needs to be done, but not how it should be done or implemented.
