

# Free Plat-Dev-201 Download - Exam Plat-Dev-201 Study Solutions

## Question 1: (Single Select)

A company's engineering department is conducting a month-long test on the scalability of an in-house-developed software that requires a cluster of 100 or more servers. Which of the following models is the best to use?

- A: PaaS
- B: SaaS
- C: BaaS
- D: IaaS

Correct Answer: D

### Explanation:

Infrastructure as a Service (IaaS) is the best model for the scenario described because it provides on-demand access to compute, storage, and networking resources that are ideal for a scalable server cluster. IaaS allows the engineering team to rent infrastructure resources without having to invest in physical hardware, making it perfect for temporary or fluctuating workloads, such as scalability testing.

### Key Characteristics of IaaS:

Full control over the operating systems and applications running on the servers.

Flexible resource allocation to support high scalability.

Ideal for custom software testing where specific server configurations may be needed.

### Why not the other options?

**PaaS (Platform as a Service):** While PaaS is excellent for application development and deployment, it abstracts the infrastructure layer, which would limit the engineering team's control over the cluster's configuration.

**SaaS (Software as a Service):** SaaS delivers fully managed applications, not infrastructure or testing environments. It's irrelevant for this use case.

**BaaS (Backend as a Service):** BaaS is tailored to mobile or web application backend.

A developer must create a lightning component that allows users to input contact record information to create a contact record, including a salary\_\_c custom field. what should the developer use, along with a lightning-record-edit form, so that salary\_\_c field functions as a currency input and is only viewable and editable by users that have the correct field levelpermissions on salary\_\_C?

- A. <lightning-formatted-number value="Salary\_\_c" format-style="currency"> </lightning-formatted-number>
- B. <lightning-input-currency value="Salary\_\_c"> </lightning-input-currency>
- C. <lightning-input type="number" value="Salary\_\_c" formatter="currency"> </lightning-input>
- D. <lightning-input-field field-name="Salary\_\_c"> </lightning-input-field>

**Answer: D**

### NEW QUESTION # 171

What are two benefits of using declarative customizations over code? Choose 2 answers

- A. Declarative customizations generally require less maintenance.
- B. Declarative customizations automatically update with each Salesforce release.
- C. Declarative customizations automatically generate test classes.
- D. Declarative customizations cannot generate run time errors.

**Answer: A,B**

### NEW QUESTION # 172

A developer is designing a new application on the Salesforce platform and wants to ensure it can support multiple tenants effectively. Which design framework should the developer consider to ensure scalability and maintainability?

- A. Model-View-Controller (MVC)
- B. Waterfall Model
- C. Flux (view, action, dispatcher, and store)
- D. Agile Development

**Answer: D**

### NEW QUESTION # 173

.....

The unmatched and the most workable study guides of TorrentValid are your real destination to achieve your goal. The pathway to pass Plat-Dev-201 was not so easy and perfectly reliable as it has become now with the help of our products. Just you need to spend a few hours daily for two week and you can surely get the best insight of the syllabus and command over it. The Plat-Dev-201 Questions and answers in the guide are meant to deliver you simplified and the most up to date information in as fewer words as possible.
