HPE0-S59 Test Braindumps - HPE0-S59 Pass-Sure Torrent & HPE0-S59 Test Questions

Our HPE0-S59 learning prep boosts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our HPE0-S59 exam torrent before they purchase our product and can download our HPE0-S59 study materials immediately after the client pay successfully. And if there is the update of our HPE0-S59 learning guide

the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our HPE0-S59 latest question is absolutely good choices for you.

HP HPE0-S59 exam is a certification exam that focuses on HPE Compute Solutions. HPE0-S59 exam is designed for those who work with HPE solutions and want to prove their expertise in this area. Passing HPE0-S59 Exam is a great way to showcase your skills and knowledge in HPE solutions and to advance your career in this field.

HPE Compute Solutions Sample Questions (Q107-Q112):

NEW QUESTION # 107
You configured a vVoI datastore using HPE Storage integration Pack for VMware vCenter.
Which storage object should you check using SSMC to verify whether vVol datastore is configured property?

- A. Storage Container
- B. App Volume Set
- C. virtual Volume
- D. Virtual Volume Set

Answer: A

Explanation:
When you configure a vVol datastore using the HPE Storage Integration Pack for VMware vCenter, the storage object to check in SSMC (HPE StoreServ Management Console) is the Storage Container. The Storage Container is a logical storage entity that houses virtual volumes (vVols) and represents the vVol datastore in the storage system. Verifying the Storage Container ensures that the vVol datastore is properly configured and managed.

NEW QUESTION # 108
Your customer plans to expand an existing nPar based on a single HPE Superdome Flex chassis. Which statement about workload availability during expansion is true?

- A. HPE Superdome Flex does not support expansion of powered on nPars
- B. Online expansion is available only if RMC is used for management.
- C. Powered nPar can be expanded only if HPE Superdome Flex 280 is used
- D. Powered nPar can be expanded if it does not use HPE Persistent Memory

Answer: D

Explanation:
HPE Superdome Flex allows for the expansion of powered-on nPars (nPartitions), but this capability is subject to certain conditions. One of these conditions is that the nPar does not use HPE Persistent Memory.
Expanding an nPar with Persistent Memory typically requires a shutdown to reconfigure the memory settings safely.

NEW QUESTION # 109
Your customer has 6 logical enclosures spanning 18 HPE Synergy frames. The customer needs to add one more logical enclosure based on 5 HPE Synergy frames How will this change impact the customer environment?

- A. The customer can add a new logical enclosure to an existing setup once all required licenses are added to HPE OneView and associated with the new frames.
- B. The customer has to create a new management ring for new logical enclosure because the maximum number of frames m a single management ring is reached.
- C. The customer has to expand the management ring capacity either by adding HPE Composer 2 modules or adding memory to reach 128GB per module.
- D. The customer can add a new logical enclosure to the existing setup because the maximum number of logical enclosures in a single management ring is not reached.

Answer: B

Explanation:
HPE Synergy management rings have a maximum capacity for the number of frames they can manage. With

18 frames already managed in 6 logical enclosures, adding 5 more frames would exceed this capacity.

Therefore, the customer needs to create a new management ring for the new logical enclosure to ensure proper management and operation.

NEW QUESTION # 110

A logical interconnect group can span on multiple HPE Synergy frames for which interconnect type?

- A. HPE virtual Connect SE 32 Gb FC Module for Synergy
- B. HPE Synergy 12 Gb SAS Connection Module
- C. Brocade 32GB Fibre Channel Switch Module for HPE Synergy
- D. HPE Virtual Connect SE 100 Gb F32 Module tor Synergy

Answer: D

NEW QUESTION # 111

One of the administrators added some connections within a server profile that was created using a template.

This server profile did not report inconsistency.

What is the most likely reason for this behavior?

- A. The administrator removed FC connections that are not monitored by default.
- B. Consistency check for connections is set to Minimum or Not checked.
- C. Connections defined in the server profile are not monitored for compliance.
- D. The server is in maintenance mode and does not report any issues.

Answer: B

NEW QUESTION # 112
