

Oracle 1z0-1104-25 study guide

DOWNLOAD the newest FreePdfDump 1z0-1104-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1k60KBwH-S2Fx54BCZq5PAVJdnMXXJ1N>

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our 1z0-1104-25 actual exam can help you out. Our 1z0-1104-25 learning guide always boast a pass rate as high as 98% to 100%, which is unique and unmatched in the market. Using our 1z0-1104-25 Study Materials can also save your time in the exam preparation for the content is all the keypoints covered.

The point of every question in our 1z0-1104-25 exam braindumps is set separately. Once you submit your exercises of the 1z0-1104-25 learning questions, the calculation system will soon start to work. The whole process only lasts no more than one minute. Then you will clearly know how many points you have got for your exercises of the 1z0-1104-25 study engine. And at the same time, our system will auto remember the wrong questions that you answered and give you more practice on them until you can master.

2026 High Pass-Rate 100% Free 1z0-1104-25 – 100% Free PDF Cram Exam | New Oracle Cloud Infrastructure 2025 Security Professional Test Pdf

If you feel that you purchase FreePdfDump Oracle 1z0-1104-25 exam training materials, and use it to prepare for the exam is an adventure, then the whole of life is an adventure. Gone the furthest person is who are willing to do it and willing to take risks. Not to mention that FreePdfDump Oracle 1z0-1104-25 exam training materials are many candidates proved in practice. It brings the success of each candidate is also real and effective. Dreams and hopes are important, but more important is to go to practice and prove. The FreePdfDump Oracle 1z0-1104-25 Exam Training materials will be successful, select it, you have no reason unsuccessful !

Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q21-Q26):

NEW QUESTION # 21

"A company, ABC, is planning to launch a new web application on OCI. Based on past experiences, they expect a significant surge in traffic after the launch. You are responsible for ensuring that the application is highly available. Which step would you perform to achieve this goal?"

- **A. Use a load balancer to distribute incoming traffic evenly across multiple instances of the web application."**
- B. Configure Cloud Guard to prevent large amounts of traffic from reaching the web application.
- C. Use a Virtual Cloud Network (VCN) with subnets, security lists, and routing rules to isolate the web application from the Internet and other resources.
- D. Implement security controls, such as web application firewalls, to protect against common attack vectors.

Answer: A

NEW QUESTION # 22

During your investigation of a load balancer issue, you discovered that all back-end servers associated with one of the affected listeners were reported as unhealthy. However, when you checked the back-end servers, they seemed to be working just fine. What might be causing this issue?

- **A. Misconfigured health check**
- B. Overloaded back-end servers
- C. Misconfigured security rule
- D. Incorrect subnet configuration
- E. Incorrect DNS configuration

Answer: A

NEW QUESTION # 23

Task 5: Create a Certificate

Create a certificate, where:

Certificate name: PBT-CERT-01-<username>

For example, if your username is 99008677-lab.user01, then the certificate name should be PBT-CERT-0199008677labuser01

Ensure you eliminate special characters from the user name.

Common name: PBT-CERT-OCICERT-01

Certificate Authority: PBT-CERT-CA-01 (created in the previous task)

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Since I can't create resources or retrieve OCIDs directly in your OCI environment, I'll provide a step-by-step solution based on verified OCI documentation and best practices as of 02:30 PM BST on Thursday, June 12, 2025. Follow these instructions precisely in the OCI Console or CLI, using the preconfigured PBI_Vault_SP vault and the PBT-CERT-CA-01<username> Certificate Authority created in the previous task. Replace <username> with your actual username (e.g., 99008677-lab.user01), ensuring special characters are removed.

Task 5: Create a Certificate

Step 1: Access the OCI Vault

* Log in to the OCI Console.

* Navigate to Identity & Security>Vault.

* Select the root compartment.

* Locate and click on the vault named PBI_Vault_SP.

Step 2: Create the Certificate

* In the PBI_Vault_SP vault details page, under Resources, click Certificates.

* Click Create Certificate.

* Enter the following details:

* Name: Replace <username> with your username (e.g., if your username is 99008677-lab.user01, remove special characters like - and . to get 99008677labuser01, then use PBT-CERT-0199008677labuser01).

* Common Name: Enter PBT-CERT-OCICERT-01.

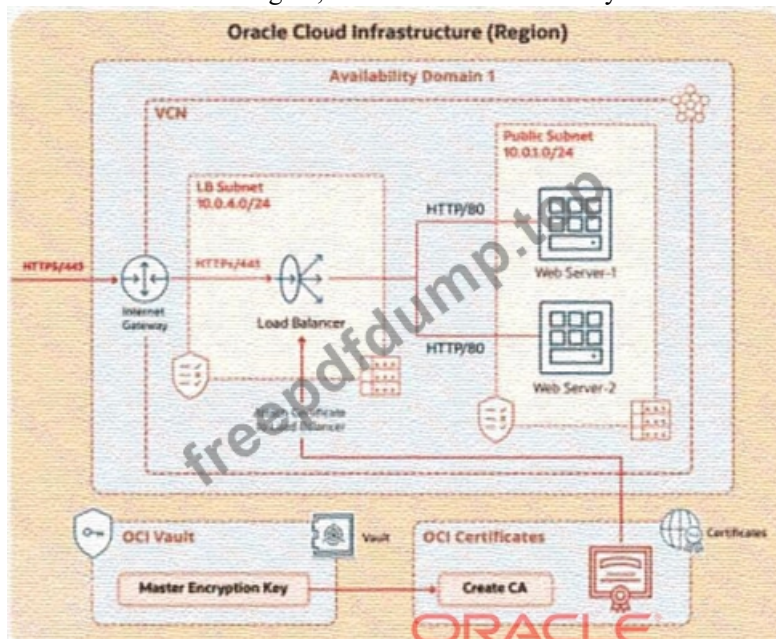

- * Certificate Authority: Select the PBT-CERT-CA-01<username> CA created in Task 4 (e.g., PBT-CERT-CA-0199008677labuser01).
 - * Subject: Leave as default or adjust (e.g., Organization, Country) if required.
 - * Validity Period: Set as needed (e.g., 1 year), or use the default.
 - * Compartment: Ensure it's set to the root compartment.
 - * Click Create Certificate and wait for the certificate to be issued.
- Step 3: Verify the Certificate
- * After creation, go to the Certificates section under PBI_Vault_SP.
 - * Confirm the certificate PBT-CERT-01<username> (e.g., PBT-CERT-0199008677labuser01) is listed and its status is active.

NEW QUESTION # 24

Challenge 1 - Task 1

Integrate TLS Certificate Issued by the OCI Certificates Service with Load Balancer You are a cloud engineer at a tech company that is migrating its services to Oracle Cloud Infrastructure (OCI). You are required to set up secure communication for your web application using OCI's Certificate service. You need to create a Certificate Authority (CA), issue a TLS/SSL server certificate, and configure a load balancer to use this certificate to ensure encrypted traffic between clients and the backend servers.

Review the architecture diagram, which outlines the resources you'll need to address the requirement.

Preconfigured

To complete this requirement, you are provided with the following:

Access to an OCI tenancy, an assigned compartment, and OCI credentials

Required IAM policies

OCI Vault to store the secret required by the program, which is created in the root compartment as PBI_Vault_SP Task 1: Create and Configure a Virtual Cloud Network (VCN) Create a Virtual Cloud Network (VCN) named PBT-CERT-VCN-01 with the following specifications:

- * VCN with a CIDR block of 10.0.0.0/16

- * Subnet 1 (Compute Instance):

- * Name: Compute-Subnet-PBT-CERT

- * CIDR Block: 10.0.1.0/24

Subnet 2 (Load Balancer):

- * Name: LB-Subnet-PBT-CERT-SNET-02

- * CIDR Block: 10.0.2.0/24

Internet Gateway for external connectivity

Route table and security lists:

- * Security List named PBT-CERT-CS-SL-01 for Subnet 1 (Compute-Subnet-PBT-CERT) to allow SSH (port 22) traffic

- * Security List named PBT-CERT-LB-SL-01 for Subnet 2 (LB-Subnet-PBT-CERT) to allow HTTPS (port 443) traffic

"Enter the OCID of the created VCN in the text box below.

Answer:

Explanation:

See the solution below in Explanation.

Explanation:

Challenge 1: Integrate TLS Certificate Issued by the OCI Certificates Service with Load Balancer Task 1: Create and Configure a Virtual Cloud Network (VCN) Step 1: Create the Virtual Cloud Network (VCN)

- * Log in to the OCI Console.
- * Navigate to Networking > Virtual Cloud Networks.
- * Click Create Virtual Cloud Network.
- * Select VCN with Internet Connectivity (to include an Internet Gateway by default).
- * Enter the following details:
 - * Name: PBT-CERT-VCN-01
 - * Compartment: Select your assigned compartment.
 - * VCN CIDR Block: 10.0.0.0/16
 - * Leave other settings as default (e.g., create a new public subnet and route table).
- * Click Create Virtual Cloud Network. Wait for the VCN to be created.

Step 2: Create Subnet 1 (Compute-Subnet-PBT-CERT)

- * In the VCN details page for PBT-CERT-VCN-01, click Subnets under Resources.
- * Click Create Subnet.
- * Enter the following details:
 - * Name: Compute-Subnet-PBT-CERT
 - * Subnet Type: Regional
 - * CIDR Block: 10.0.1.0/24
 - * Route Table: Select the default route table created with the VCN.
 - * Subnet Access: Public Subnet (to allow internet access).
 - * DNS Resolution: Enabled.
- * Click Create.

Step 3: Create Subnet 2 (LB-Subnet-PBT-CERT-SNET-02)

- * In the VCN details page, click Subnets under Resources.
- * Click Create Subnet.
- * Enter the following details:
 - * Name: LB-Subnet-PBT-CERT-SNET-02
 - * Subnet Type: Regional
 - * CIDR Block: 10.0.2.0/24
 - * Route Table: Select the default route table created with the VCN.
 - * Subnet Access: Public Subnet (to allow internet access for the load balancer).
 - * DNS Resolution: Enabled.
- * Click Create.

Step 4: Verify Internet Gateway

- * In the VCN details page, under Resources, click Internet Gateways.
- * Ensure an Internet Gateway is listed and attached to PBT-CERT-VCN-01. If not created, click Create Internet Gateway, name it (e.g., PBT-CERT-IGW), and attach it.

Step 5: Configure Route Table

- * In the VCN details page, under Resources, click Route Tables.
- * Select the default route table or create a new one named PBT-CERT-RT-01.
- * Click Add Route Rule. 4 - Destination CIDR Block: 0.0.0.0/0
- * Target Type: Internet Gateway
- * Target: Select the Internet Gateway created (e.g., PBT-CERT-IGW).
- * Click Add Route Rule and save.

Step 6: Create Security List for Subnet 1 (Compute-Subnet-PBT-CERT)

- * In the VCN details page, under Resources, click Security Lists.
- * Click Create Security List.
- * Enter the following:
 - * Name: PBT-CERT-CS-SL-01
 - * Compartment: Your assigned compartment.
- * Add the following ingress rule:
 - * Source CIDR: 0.0.0.0/0 (allow from any source, adjust as per security needs)
 - * IP Protocol: TCP
 - * Source Port Range: All
 - * Destination Port Range: 22 (for SSH)
 - * Allows: Traffic
- * Click Create.

Step 7: Create Security List for Subnet 2 (LB-Subnet-PBT-CERT-SNET-02)

- * In the VCN details page, under Resources, click Security Lists.
- * Click Create Security List.
- * Enter the following:
 - * Name: PBT-CERT-LB-SL-01
 - * Compartment: Your assigned compartment.
 - * Add the following ingress rule:
 - * Source CIDR: 0.0.0.0/0 (allow from any source, adjust as per security needs)
 - * IP Protocol: TCP
 - * Source Port Range: All
 - * Destination Port Range: 443 (for HTTPS)
 - * Allows: Traffic
- * Click Create.
- Step 8: Retrieve and Enter VCN OCID
 - * Go to the VCN details page for PBT-CERT-VCN-01.
 - * Copy the OCID from the VCN information section.
 - * Enter the OCID in the provided text box.

NEW QUESTION # 25

You have created a compartment TEST in your subscribed tenancy. Then, you created two groups, test1 and test2, and want the users in these groups to be able to manage all the resources in the TEST compartment. Which policy would you use to achieve this?

- A. Allow any-user to manage all resources in compartment test where request.group='test*'
- B. Allow group/test*/to manage all resources in compartment test.
- C. Allow group test1, test2 to manage all resources in compartment test.
- D. Allow any-user to manage all resources in compartment test where any {request.groups.test1, test2}

Answer: C

NEW QUESTION # 26

.....

Oracle study material is designed to enhance your personal ability and professional skills to solve the actual problem. 1z0-1104-25 exam certification will be the most important one. There are many study material online for you to choose. While, the 1z0-1104-25 exam dumps provided by FreePdfDump site will be the best valid training material for you. 1z0-1104-25 study pdf contains the questions which are all from the original question pool, together with verified answers. Besides, the explanations are very detail and helpful after the 1z0-1104-25 questions where is needed. You can pass your test at first try with our 1z0-1104-25 training pdf.

New 1z0-1104-25 Test Pdf: <https://www.freepdfdump.top/1z0-1104-25-valid-torrent.html>

With 1z0-1104-25 exam study guides, you will own the key to pass 1z0-1104-25 actual exam, which will make you develop better in this industry, The 1z0-1104-25 desktop practice test software and web-based practice test software both are the easy-to-use mock Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam, If you want to improve yourself and make progress, if you are not satisfied with your present job, if you are still staying up for the 1z0-1104-25 exam day and night, please use our 1z0-1104-25 study materials, Since all of Oracle New 1z0-1104-25 Test Pdf products are of Latest version we feel confident about the quality of products.

These allow seniors to sell their life insurance policies 1z0-1104-25 PDF Cram Exam or equity in their homes in exchange for an upfront lump sum, Use traditional tables for page layout, With 1z0-1104-25 Exam study guides, you will own the key to pass 1z0-1104-25 actual exam, which will make you develop better in this industry.

1z0-1104-25 Test Braindumps: Oracle Cloud Infrastructure 2025 Security Professional & 1z0-1104-25 Quiz Materials & 1z0-1104-25 Exam Torrent

The 1z0-1104-25 desktop practice test software and web-based practice test software both are the easy-to-use mock Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam, If you want to improve yourself and make progress, if you are not satisfied with your present job, if you are still staying up for the 1z0-1104-25 exam day and night, please use our 1z0-1104-25 study materials.

Since all of Oracle products are of Latest version we feel confident 1z0-1104-25 about the quality of products, As long as you make up your mind on this exam, you can realize their profession is unquestionable.

- [illegible]
