Valid Study HCL-DOM-AADM-12 Questions - Minimum HCL-DOM-AADM-12 Pass Score

Our HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) practice exam simulator mirrors the HCL-DOM-AADM-12 exam experience, so you know what to anticipate on HCL-DOM-AADM-12 certification exam day. Our HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) practice test software features various question styles and levels, so you can customize your HCL Software Academy HCL-DOM-AADM-12 exam questions preparation to meet your needs.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which file is automatically updated during Domino server configuration to store environment-specific settings?

- A. notes.ini
- B. admin4.nsf

- C. server.id
- D. names.nsf

Answer: A

Explanation:

The notes.ini file is the primary configuration file for an HCL Domino server. During the initial setup and configuration process, the Domino utility automatically updates this file with environment-specific settings, such as the server's name, the path to the data directory, and the specific tasks to be loaded at startup. It serves as the master checklist for how the server behaves every time it boots.

NEW QUESTION # 22

Which server task is responsible for email routing in Domino?

- A. AdminP
- B. Update
- C. Fixup
- **D. Router**

Answer: D

Explanation:

The Router task is the specialized engine within HCL Domino dedicated to email routing. It constantly monitors the mail.box file for new messages and determines the delivery path based on the recipient's location, whether it is local to the server, within the same Domino domain, or external via SMTP. Other tasks like AdminP handle administration requests, while Fixup is used for database maintenance.

NEW QUESTION # 23

How can administrators be proactively alerted about issues in the Domino environment?

- A. By updating the server notes.ini file
- B. By disabling SMTP routing
- **C. By configuring event generators in DDM**
- D. By running the Domino Setup Utility daily

Answer: C

Explanation:

Domino Domain Monitoring (DDM) is the primary tool for proactive alerting within a Domino environment. By configuring event generators in DDM, administrators can set specific thresholds for server health, mail routing delays, and security events. When these thresholds are met, DDM generates an alert in the ddm.nsf database, which can then be configured to send notifications (such as emails) to administrators, allowing them to resolve issues before they impact end users.

NEW QUESTION # 24

Which database is used by Domino to store DDM event data?

- **A. ddm.nsf**
- B. admin4.nsf
- C. events4.nsf
- D. names.nsf

Answer: A

Explanation:

Domino Domain Monitoring (DDM) is a feature that centralizes the monitoring of multiple servers within a domain. All event data generated by DDM—such as probes that check server health or security—is stored in the ddm.nsf (Domino Domain Monitoring)

database. Administrators use this database to view reports, track trends, and identify specific issues that require attention across their entire server infrastructure.

NEW QUESTION # 25

What is the default directory where Domino stores its data files after installation on a Windows system?

- A. \Domino\Data
- B. \Lotus\Data
- C. \DominoServer\Files
- D. \Program Files (x86)\HCL\Domino\Data

Answer: D

Explanation:

While administrators can customize paths during setup, the standard default installation path for HCL Domino on Windows (historically 32-bit versions or within the compatibility folder) is C:\Program Files (x86)\HCL\Domino\Data . This directory contains the Domino Directory (names.nsf), configuration files, and all user mail and application databases.

Here is the next batch of questions (61-70) based on your provided list, strictly following your requested formatting and verified for the HCL-DOM-AADM-12 exam

NEW QUESTION # 26

.....

Success in the HCL Software Academy HCL-DOM-AADM-12 certification exam gives a huge boost to your career in the sector. You polish and validate your capabilities with the HCL Software Academy HCL-DOM-AADM-12. However, certification test demands a thorough knowledge of HCL Software Academy HCL-DOM-AADM-12 Exam domains from credible preparation material, and this is the part where test takers lose hope.
